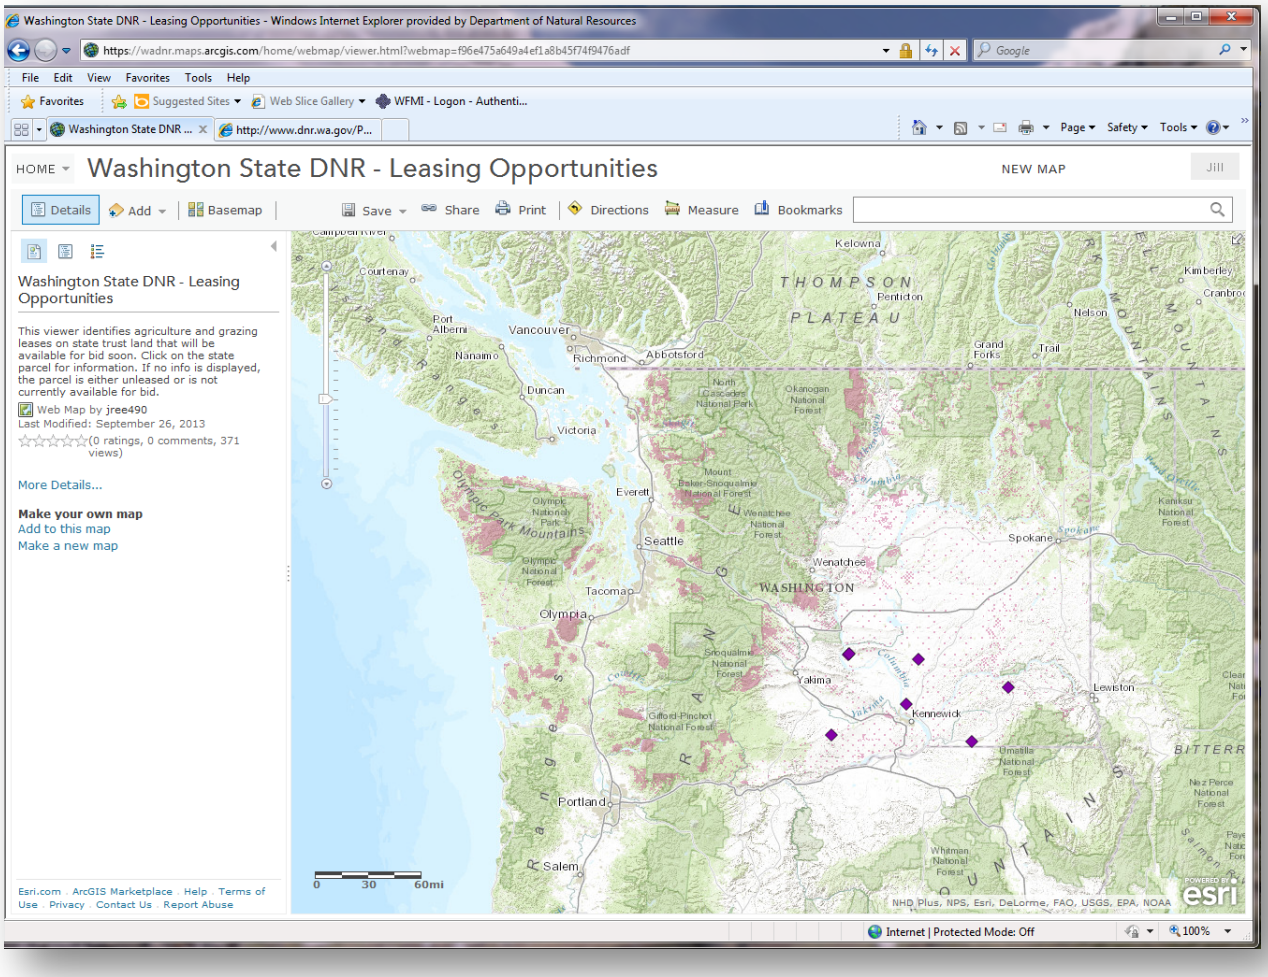
Agriculture & Grazing Lease Viewer
Detailed User Guide

This viewing tool is hosted by ArcGIS online. It displays all agricultural and grazing leases on state trust land that will be offered for bid in upcoming months.

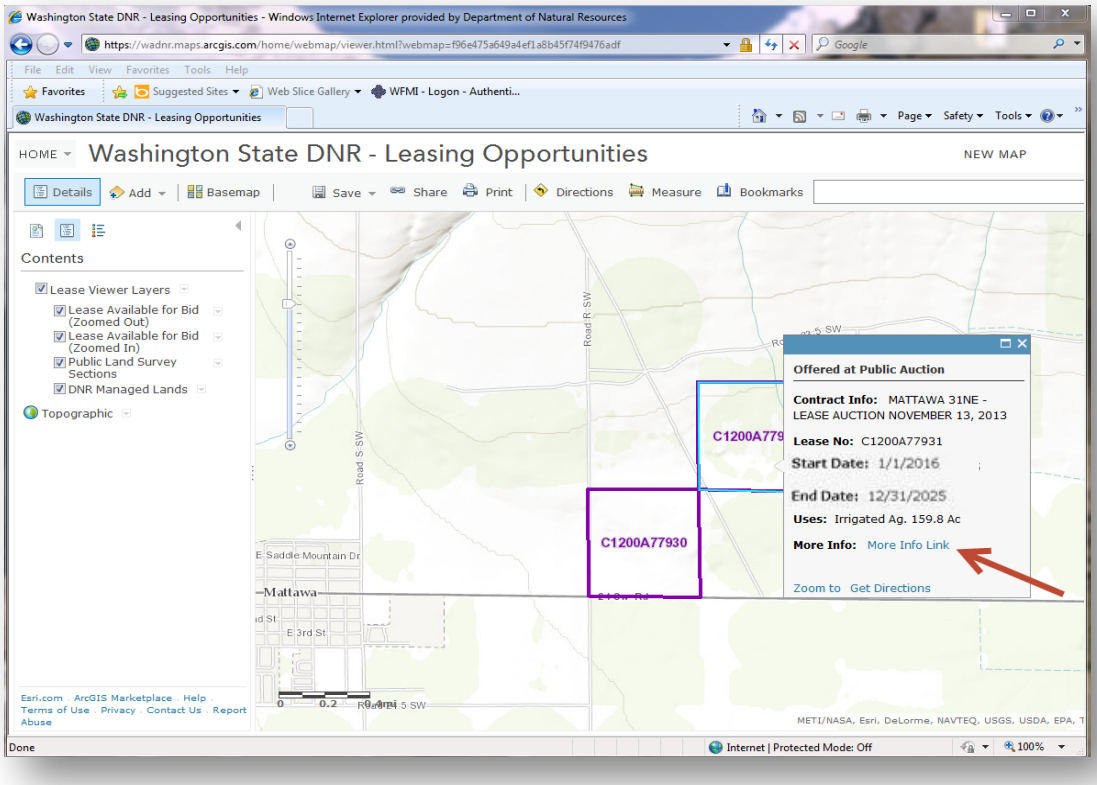


Disclaimer

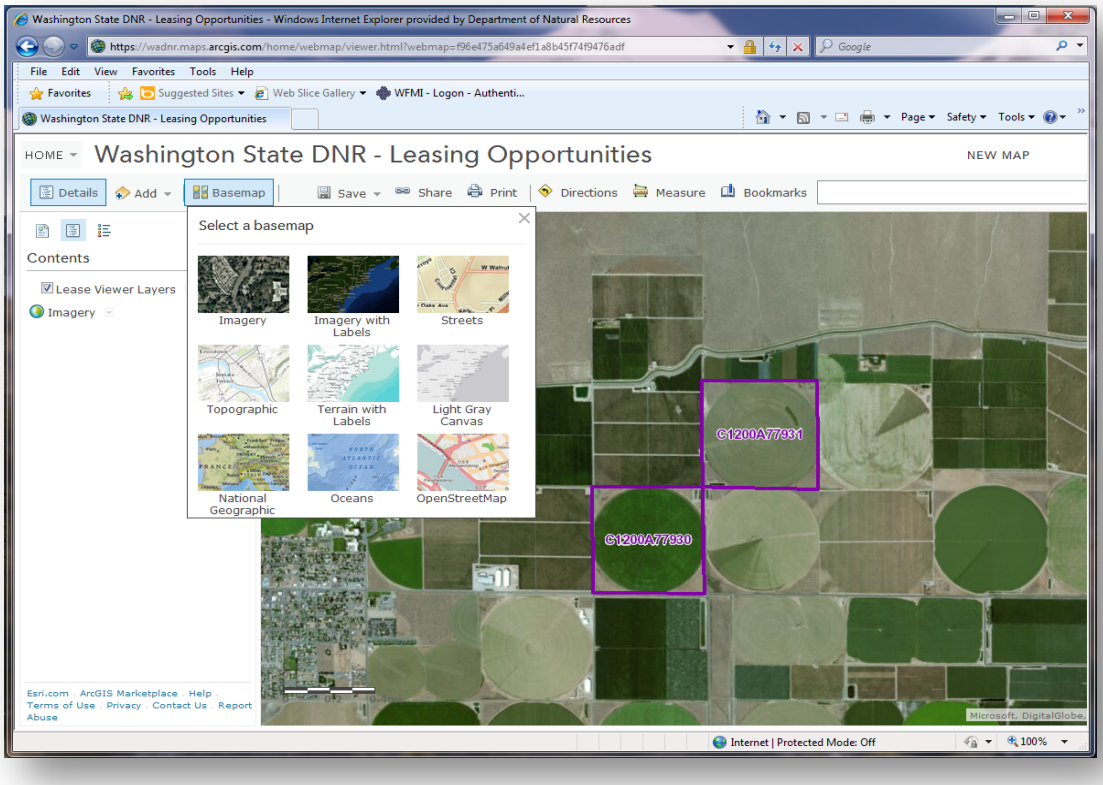
The geographic data and maps provided herein are provided ‘as is’ without warranty of any kind, either expressed or implied, including, but not limited to, the implied warranties of merchantability and fitness for a particular use. The Washington Department of Natural Resources will not be liable to the user of this product for any activity involving the product with respect to the following: (a) lost profits, lost savings, or any other consequential damages; (b) the fitness of the product for a particular purpose; or (c) use of the product or results obtained from the use of the product.

The agricultural lease maps presented here are meant only as a guide to delineate the general area of the lease. They cannot be used to make final determinations of the lease contract and do not include specific lease information and restrictions. Please refer to posted lease documents for more site specific information.

Click on an individual lease area to bring up the general lease information.
If no information is displayed, the parcel is either not leased or not currently available for bid.
Clicking on "**More Info Link**" will direct you to an ftp site where documents pertaining to the lease can be viewed or downloaded.

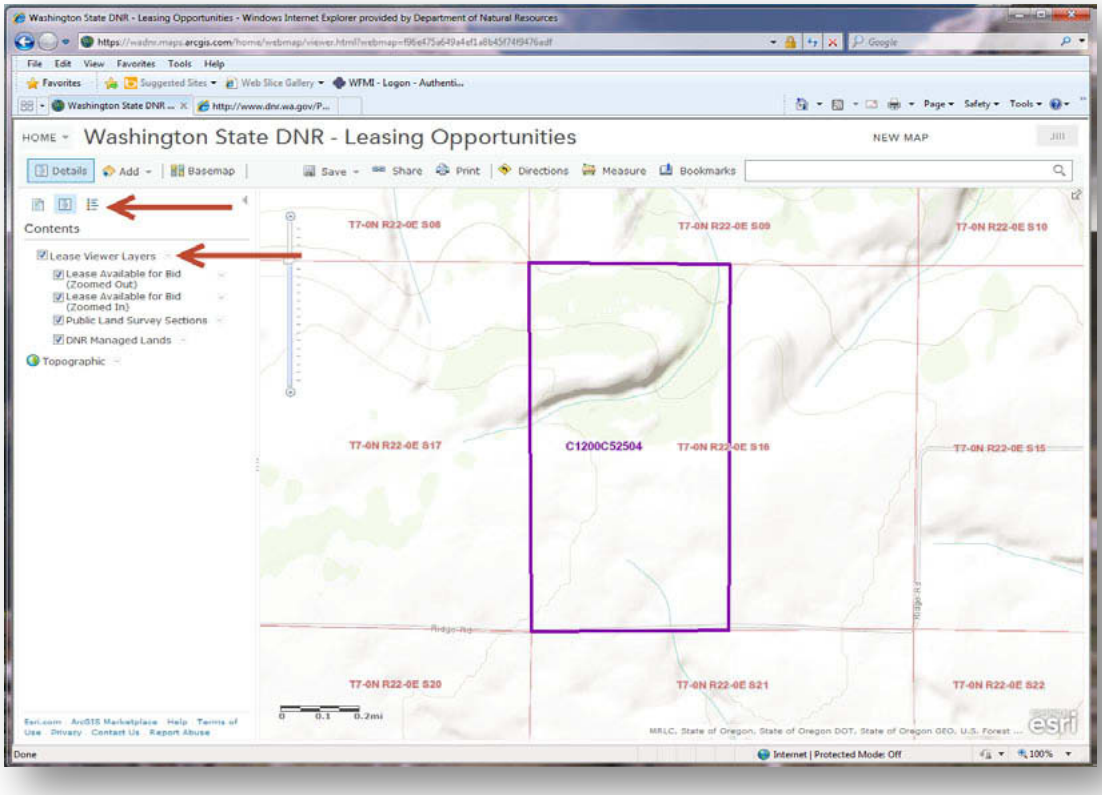


Changing the **Basemap** allows access to a range of map options, including imagery from ESRI Online.

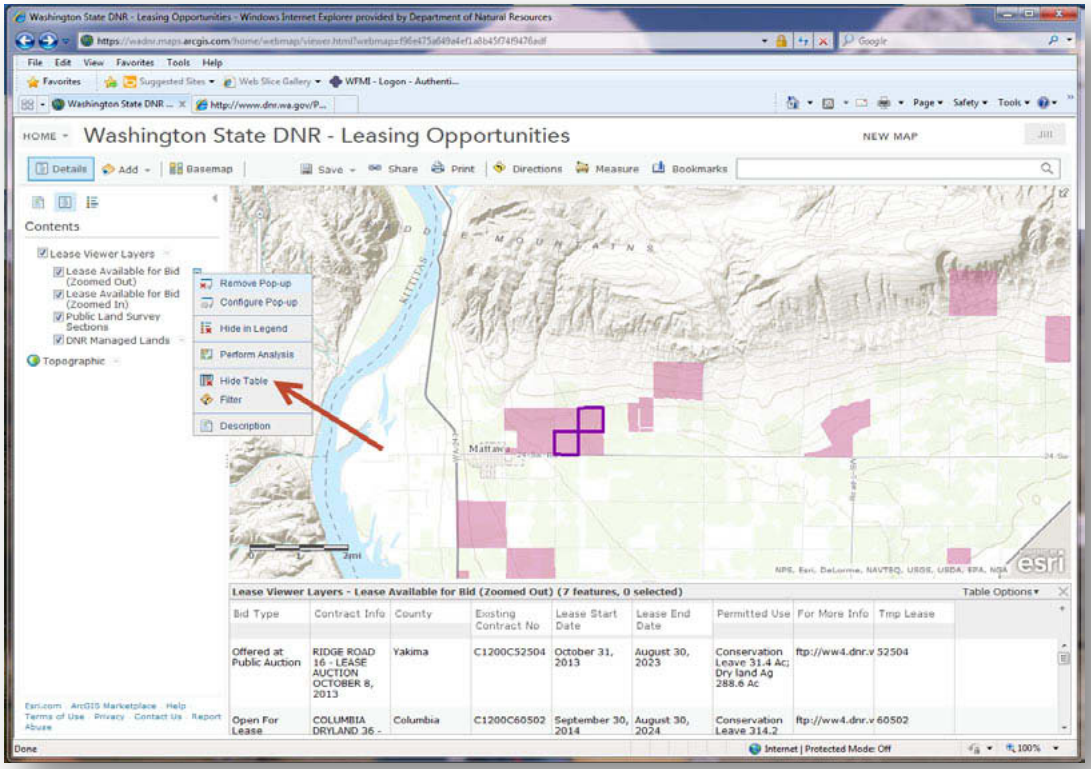


To turn layers **on/off** and to change symbology, click on the **Contents Icon** and the **Lease Viewer Layers** link. Click the check boxes next to each layer to toggle layers on/off.

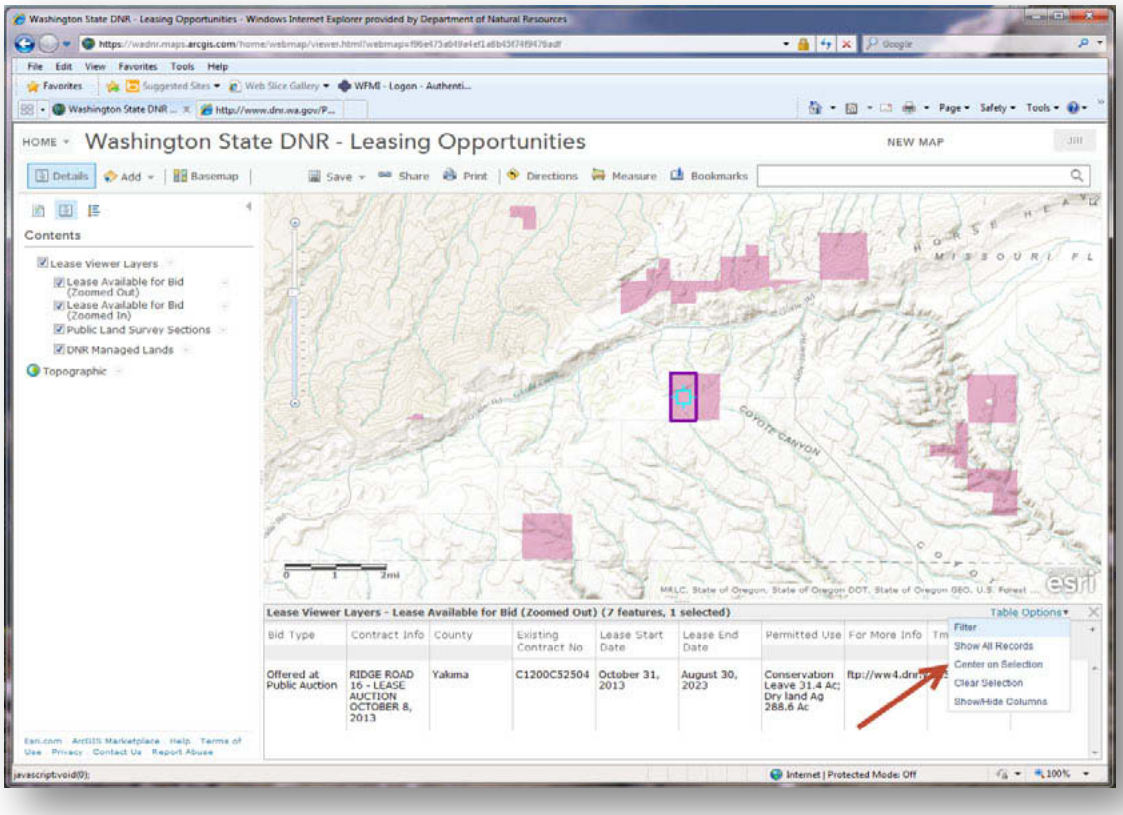
Note: Some layers will turn on and off automatically as you zoom in and out.



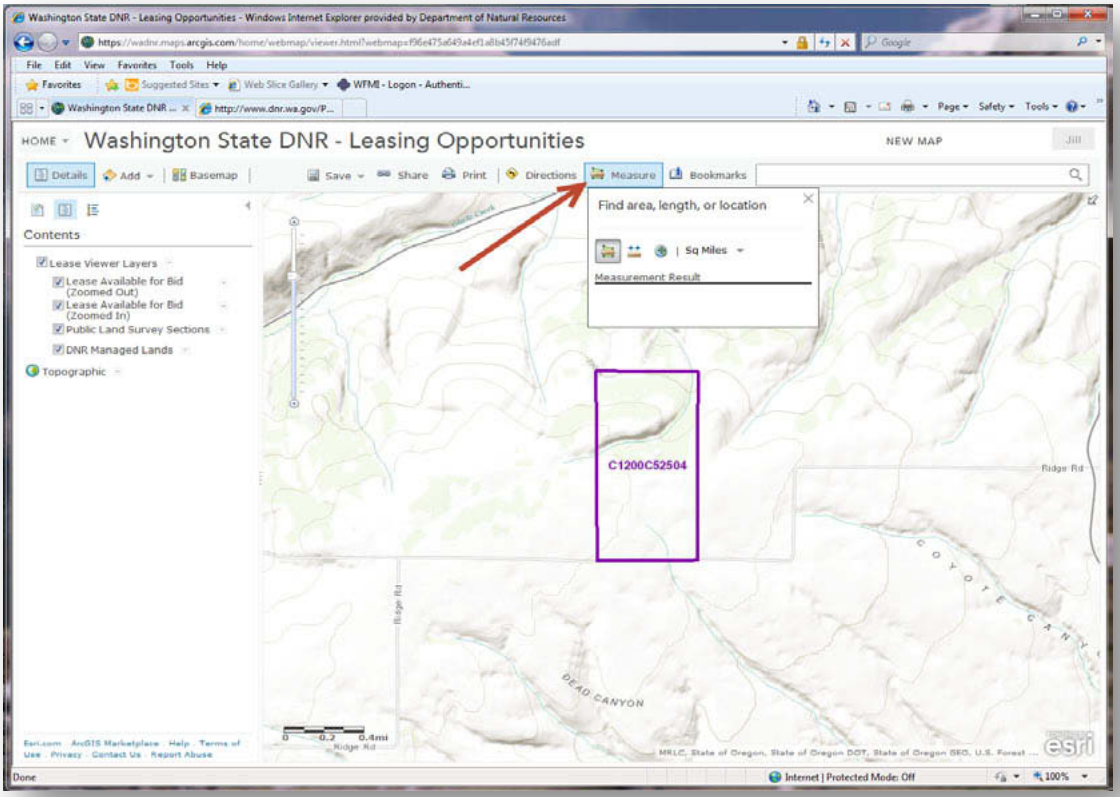
To open a searchable table, click on drop down arrow next to the individual layers and go to **Show Table.**



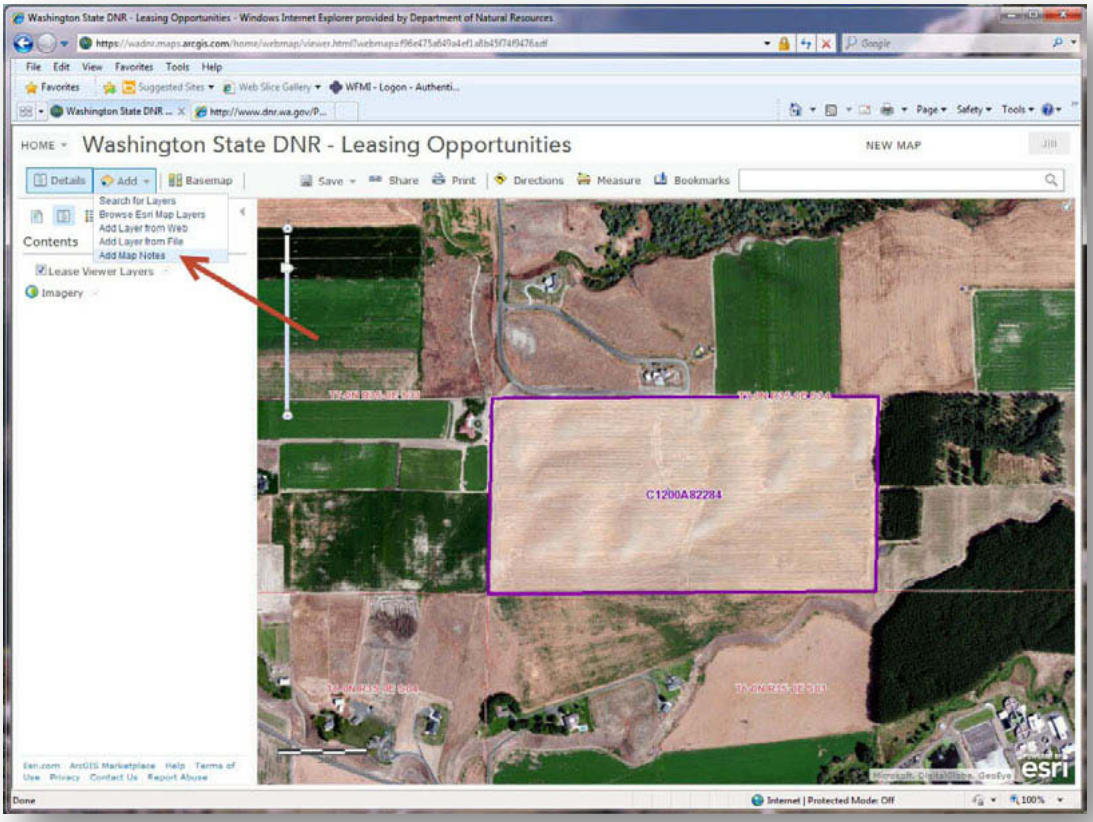
You can select any lease within the table by clicking on it, then click **Table Options > Center on Selection** to zoom to that lease.

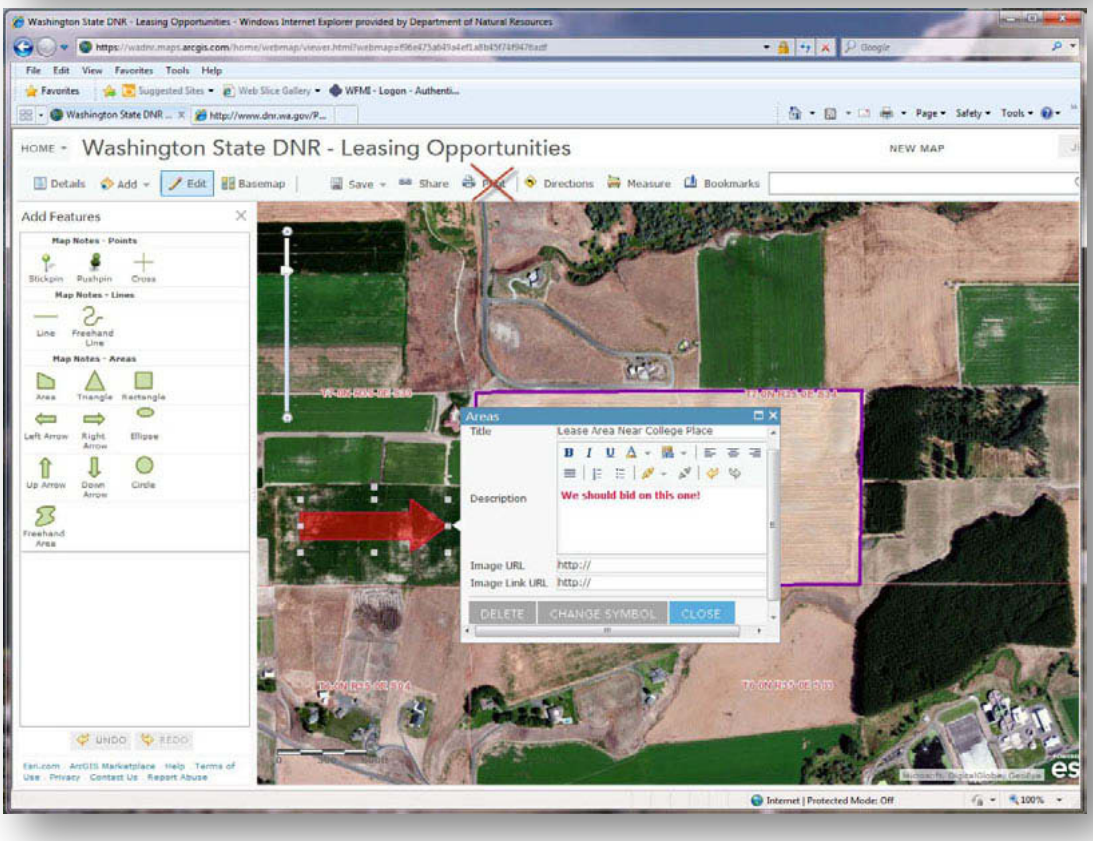


Additional tools allow you to measure area, distance and find the geographic coordinates of any points on the map.



Adding Map Notes allows you to make notes, sketch areas and print, forward or save those notes to your own maps.





NOTE: To print your maps to 8 ½ x 11 format, use your web browser's Print function and not the print button located within the map window.

These maps can also be viewed on your smartphone or tablet by downloading the appropriate ESRI App for your mobile device.
