WASHINGTON STATE DEPARTMENT OF
Natural Resources

PR 14-006-050

Controlling Invasive Plants and Noxious Weeds

Cancels: New Procedure

Date: October 2007

Application: All forested state trust lands

DISCUSSION

This procedure describes the department's responsibility for action in controlling invasive plants and noxious weeds on forested state trust lands.

Action

Regions will participate in control efforts directed at invasive plants and noxious weeds in concert with/in support of county and other governmental authorities. As budgets and staffing allow, the department may participate in other types of cooperative partnerships that address invasive species and/or noxious weeds in an integrated manner across ownerships.
