

## Reiter Nonmotorized Trails Planning

June 20, 2018

### **What types of nonmotorized recreational activities do you enjoy or hope to enjoy in Reiter Foothills Forest?**

- Hiking
- Hiking
- Hiking
- Horseback Riding
- Horseback Riding

### **What are your highest priorities for trails in the nonmotorized area of Reiter?**

- We want a study compiled for a Trust Lands Transfer Cas recommended in a letter sent to DNR and State Parks signed by over a dozen organizations (19?) representing over 100,000 members). No logging activities should occur in the areas under consideration until all possible options for a Trust Lands Transfer have been explored and until the CAMP process has been completed, and the Landscape Plan (presented at the last Community conversation) has been fully studied by all interested parties. Hopefully, a plan can be adopted that works for all interested parties. Thanks.
- I want to be able to hike on attractive trails that have not been clear-cut and have not been sprayed with herbicides. I'm a retired teacher (36 years) so I understand the trust lands issues, but DNR has more than one mandate. There are special areas in the Reiter Forest (Singletary, etc.) that should be preserved and protected in perpetuity. Please utilize the Trust Lands Transfer process.
- Alternate parking/trails with access to Wallace Falls. Trails with at least some scenic values.
- Access to safe parking for horse trailers. Honey Bucket on parking site, 2 hr. easy horse trail – no bicycles, no access to quads/ATVs. Cell phone reception for emergencies. These are not family bicyclers anymore; they are very young males with earbuds careening over obstacles. Very frightening for horses.
- I would like to see horseback riding trails that are separate from the biking riding trails that are separate from the biking trails or if there is common trail it is clearly marked minimal common trail would be best for both groups. Hikers could use all trails.
