Average spacing of 19 feet x 19 feet

To accomplish this prescription, fallers shall harvest trees starting with smallest diameter trees working up to the larger trees (thin from below). The following take tree preference shall be followed to achieve the desired residual stand spacing:

RIPARIAN FOREST RESTORATION STRATEGY TREES

- RMZ's shall have an 8-13 inch diameter limit, as reviewed and directed by the Contract Administrator.

- These enhancement trees are in addition to the residual stocking targets mentioned above,
- The following should be distributed evenly throughout the RMZs, as approved by the Contract Administrator, also considering proximity to county road:
Unit 1 RMZs: 51 trees felled, and 34 trees for snag creation.
