

Progress Report
January 2009

Project Name: Tailed Frog Literature Review
Project Status: Final Report
Contact Person: Darin Cramer, 360-902-1088, darin.cramer@dnr.wa.gov

Background and Current Status

The goal of this project is to develop a comprehensive literature review of the tailed frog that will be used to develop the scoping for a meta-analysis of this species' behavior in managed systems. All available published and unpublished literature for the tailed frog will be assembled, synthesized, and used to scope the meta-analysis. A draft literature review was completed by a consultant through a personal services contract in May 2001. However, LWAG was not satisfied with this report and did not approve it. WDFW is currently re-working the report and intends to deliver a completed literature review in FY 2009.

Budget

Total Allocated: \$13,138
Total Spent: \$13,122.68
Budget Remaining: \$0, Contract closed June 30, 2001
