

### **Aerial Application**

- All label requirements must be followed;
- The first pass of each application should be made parallel to the buffer zones while accounting for potential drift;
- Leave at least a 100 foot no-spray buffer next to agricultural lands (unless label requirements specify larger);
- Leave at least a 200 foot no-spray buffer around homes (unless label requirements specify larger);
- Flag the buffers well and inform the pilot what color of flagging you have used;
- Five days prior to spraying, post signs at all places where people might enter the area. Leave signs posted at least 15 days after application. Signs must include the product name, date of treatment, a contact phone number, and any applicable restrictions.

### **Motorized Ground Application**

- Ground application of pesticides with power equipment is prohibited in the core zone, inner zone, or channel migration zone of any Type S and F streams — unless necessary for noxious weed control. See WAC 222-38-020(5) for other requirements;
- Follow all label requirements;
- The first pass of each application should be made parallel to the buffer zones — but chemicals cannot drift into the buffers;
- Leave a 25' buffer along Type A and Type B Wetlands and on all sides of flowing non-fish (Np and Ns) streams.

### **Hand Application**

- Follow all label requirements;
- Prohibited in the core zone, inner zone, or channel migration zone of any Type S and F streams.
