

Accessing the WTMF Tracking Application (WTA) from Outside of the DNR Firewall – External Reviewers

Please contact your regional DNR office with questions about completing the review process. If regional staff are unavailable or the application isn't working as expected (technical difficulties), please contact

Jenny Konwinski, jenny.konwinski@dnr.wa.gov, 360.902.1403

Kevin Smith, kevin.smith@dnr.wa.gov, 360.902.1838

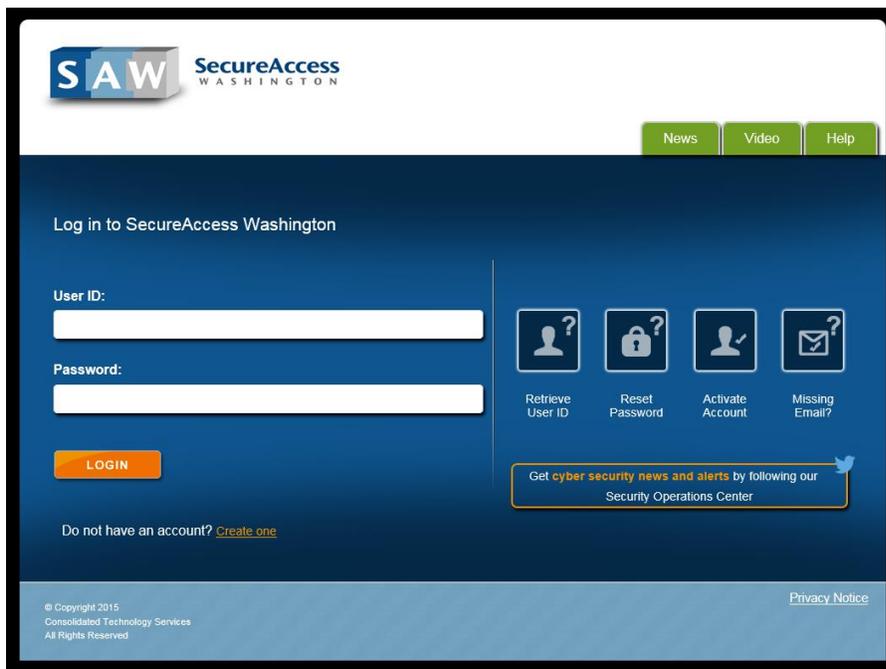

This link, on all pages where it appears, will take you to the summary page for that WTMF

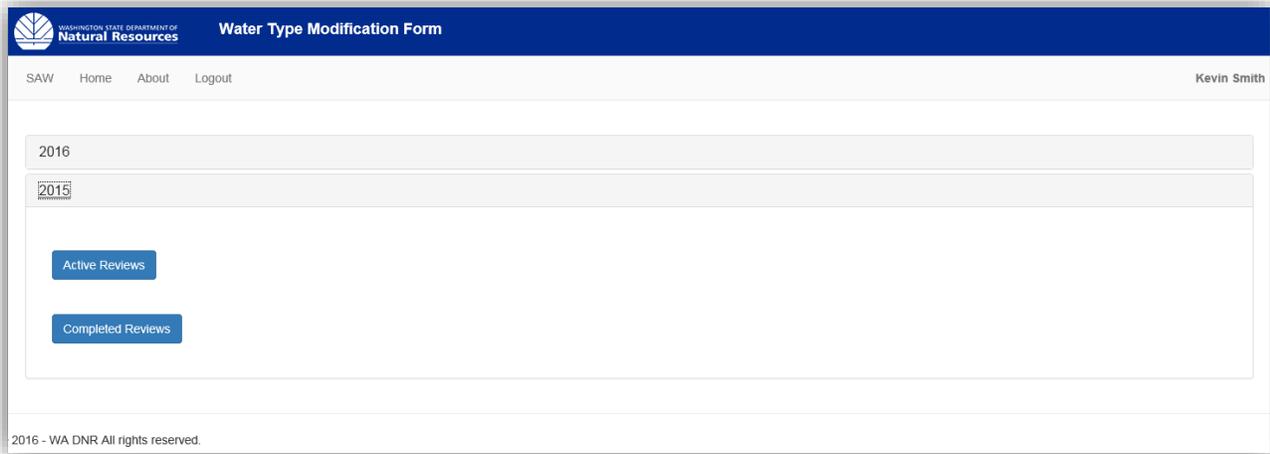

This link, on all pages where it appears, will take you to the scanned PDF of the original WTMF document

1. You must first have a Secure Access Washington (SAW) account. Please see additional help documentation for creating and accessing SAW accounts and services: <https://secureaccess.wa.gov/>

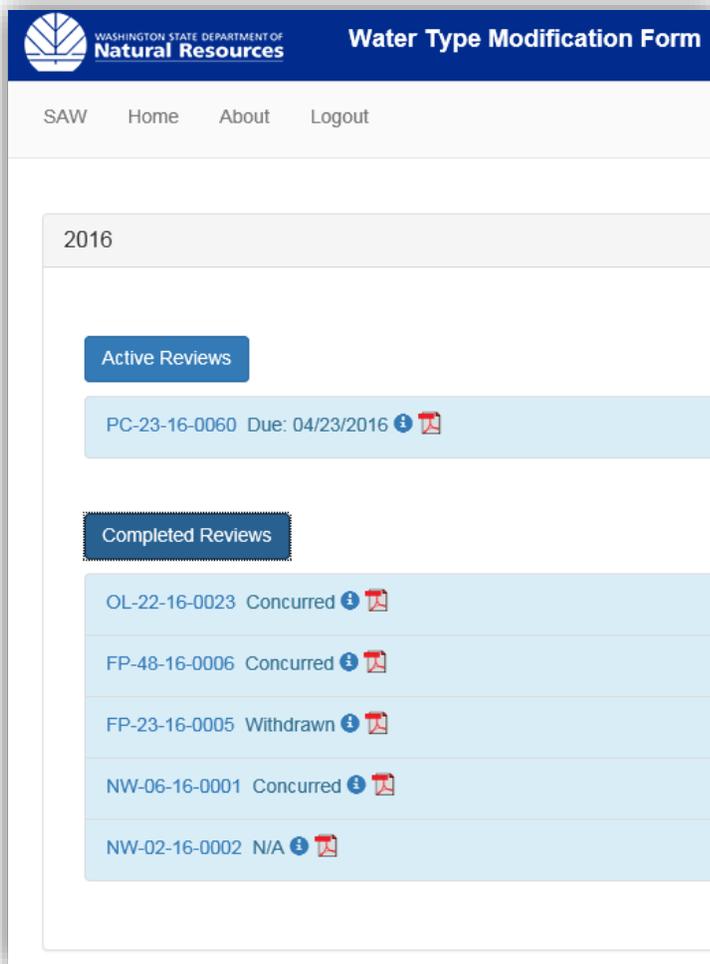

Once you've created an account, you shouldn't need to do it again unless there is a system change or your password expires.

2. After logging into SAW and selecting the Water Type Modification Form service, you should see the Water Type Modification Form page with year links. Each year should have two buttons which show WTMFs by status: **[Active Reviews]** and **[Completed Reviews]**.

Click the buttons to reveal WTMFs in each category. Click the WTMF link to see reviewer comments.

3. **Active Reviews** shows the segments and their legal location and allows the reviewer to make comments and submit their Concurrence or Non-Concurrence. It also shows the responses of other reviewers who have been assigned to that WTMF.
