STATUS INDEX MAPS:

A series of maps showing the status of various phases of mapping in the United States. Each map is accompanied by a text which gives a detailed explanation. Scale, 1:5,000,000, or about 80 miles to 1 inch. Size, 28 by 42 inches. Free on application to the Geological Survey, Washington 25, D. C. The following maps are available:

Aerial Mosaics of the United States. The fifth edition of an index showing all areas in the United States for which mosaics or photo maps have been prepared from aerial photographs, scale of negatives, dates of photography, and agencies from which copies may be obtained. Color patterns indicate the holdings of the various Federal and state agencies and commercial firms that have reported their coverage to date. 1956.

Aerial Photography of the United States. Shows the status of aerial photography, areas that have been photographed, and agencies holding the film. Coverage of aerial photography is shown to the extent known only if reproductions are generally available for purchase. 1958.

Topographic Mapping in the United States. Shows the status of topographic mapping in the United States by the Geological Survey and other Federal agencies. A general appraisal of the adequacy of these maps is indicated by color patterns. 1958.

Topographic Mapping in Areas outside of Continental United States. Shows the status of topographic mapping in the principal territories and possessions of the United States, by the Geological Survey and other Federal agencies. A general appraisal of the adequacy of these maps is indicated by color patterns. 1958.
