					WRC	P+1	60	2940				Minimum seedling distance = 6 feet.				
Total Acres for Item 2				848					305,280							

Item 2 contract period is from Monday January 11, 2010 through Wednesday, March 31, 2010. Please note that January 18 and February 15 are state holidays.

Minimum crew size refers to number of tree planters/packers and not crew foremen.

Western redcedar and noble fir are required to be evenly distributed throughout unit. Satisfactorily planted, as referenced in 4-21.03, includes the even distribution of species. For example, if 400 tpa are specified for the unit and 100 of them are cedar, then in a 50th acre plot there should be two cedar present. The Contract Administrator can identify excessive or missing species as "unsatisfactorily planted". The exception is to concentrate cedar in wet areas, as directed.

As referenced in 3-32, the minimum seedling distance between planted trees is 6 feet. Natural conifer should be ignored unless directed differently by the Contract Administrator. Spacing of seedlings around slash piles should be 6 feet between planted trees.
