Forest Health Workshops

The Commissioner of Public Lands has declared a “**Forest Health Hazard Warning**” for portions of Okanogan, Ferry, Klickitat and Yakima counties. This workshop is designed to help small forest landowners learn about the two insects responsible for most of the forest damage in the region: western spruce budworm and pine bark beetles. At this workshop landowners will learn to:

- Identify western spruce budworm and pine beetle damage.
- Evaluate your forest to determine if it is at high risk for severe damage from forest insects.
- Understand actions you can take to protect the health of your forest.
- Work with forestry professionals that can provide financial and technical assistance to improve the health of your forest.

FOREST HEALTH WORKSHOP

AGENDA

- Forest Health Hazard Warning: Learn why a forest health hazard warning was issued.

*Chuck Hersey, Forest Health Specialist,
WA DNR*

- Western spruce budworm and pine bark beetles: Identification, life cycles, types of damage and control options for these common pests of eastern Washington forests.

Glenn Kohler, Forest Entomologist, WA DNR

- Management options for reducing forest susceptibility to western spruce budworm and pine bark beetle attack.

Andy Perleberg, WSU Extension Forester
