

Washington State Department of Natural Resources (DNR)

Bidder's/Purchaser's Inspection of Sale Area and Forest Products

Acreage estimates and volume estimates contained within each timber notice of sale and each timber sale contract are made only for administrative and identification purposes. Except as expressly provided by the timber sale contract, the purchaser shall be responsible for paying the entire purchase price, even if the actual acreage or timber volume varies from the estimated quantity or volume shown.

All prospective bidders have the opportunity and are expected to inspect the sale area and the forest products located thereon. Bidders shall not rely on any representations by the State including, but not limited to, acreage estimates, volume estimates, appraisal or pre-bid documentation. The successful bidder/purchaser will further warrant that they have entered the timber sale contract without any reliance upon the DNR's volume estimates, acreage estimates, appraisals, pre-bid documentation, or any other representation by the DNR.

Any timber sale contract arising out of these public auctions will require the successful purchaser to warrant that they are entering the timber sale contract based solely upon their own judgment of the value of the forest products, formed after their own examination and inspection of both the timber sale area and the forest products being sold.

Exclusion and Disclaimer of Warranties

The PARTIES AGREE that the IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, and ALL OTHER WARRANTIES EXPRESS OR IMPLIED, ARE EXCLUDED from this transaction, and shall not apply to the goods sold. For example, THE FOLLOWING SPECIFIC MATTERS ARE NOT WARRANTED, and are EXCLUDED from this transaction:

a. ***The merchantability of the forest products.*** The use of the term “merchantable” in any document is not intended to vary the foregoing.

b. ***The condition of the forest products.*** All forest products will be conveyed “AS IS.”

c. ***The acreage contained within any sale area.*** Any acreage descriptions appearing in the timber notices of sale, timber sale contract, timber sale map or other documents are estimates only, provided solely for administrative and identification purposes.

d. ***The volume, quality, or grade of the forest products.*** The descriptions of the forest products to be conveyed are estimates only, made solely for administrative and identification purposes.

e. ***The correctness of any soil or surface conditions, presale construction appraisals, investigations, and all other pre-bid documents prepared by or for the State.*** These documents have been prepared for the State’s appraisal purposes only.

f. ***That the sale area is free from threatened or endangered species, or their habitat.*** The State is not responsible for any interferences with forestry operations that result from the presence of any threatened or endangered species, or the presence of their habitat, within the sale area.

g. ***That the forestry operations to be performed under this contract will be free from regulatory actions by governmental agencies.*** The State is not responsible for actions to enforce regulatory laws, such as the Washington Forest Practices Act (Chapter 76.09 RCW), taken by the Department of Natural Resources or any other agency that may affect the operability of these timber sales.

h. Items contained in any other documents prepared for or by the State.

Please also see timber sale contract clause G-060 for further information.

BIDDING PROCEDURES FOR TIMBER AUCTIONS

The general requirements that follow are a part of all Timber Notices of Sale to be auctioned by the Department of Natural Resources (DNR).

General Information

The State reserves the right to waive minor irregularities and the right to reject any or all bids.

A. This book contains the timber notices of sale and maps for each timber sale scheduled to be auctioned. More specific information can be obtained by contacting the appropriate region office at the number listed on the back cover of this book.

B. The timber notice of sale is a summary of sale information. For more specific information, interested parties are encouraged to view the Appraisal Packets on the DNR Internet Site @ www.dnr.wa.gov, this will take you directly to the Product Sales Section. The Appraisal Packets contain **DRAFT** copies of the timber notice of sale, map, contract, road plan, cruise data, precruise and cruise narrative, Forest Practices Application (FPA), Hydraulics Project Approval (HPA).

C. The sale preview packets may be obtained at no charge for individual sales by visiting the appropriate region office.

D. Timber sale contracts contain extensive terms and conditions that will be binding upon successful high bidders. Each bidder should carefully review all terms contained in the appropriate **DRAFT** timber sale contract prior to bidding on a sale, and should review the final contract prior to signing. **DRAFT** timber sale contracts are contained in the preview and presales packets and are available upon request at the respective region office.

E. Sales advertised in this book have not been approved by the Board of Natural Resources and are subject to the Board's approval before they will be sold. The Board meets and approves sales approximately six weeks prior to auction. All sales are subject to confirmation by the DNR under RCW 79.15.120.

F. The State does not guarantee the accuracy of any information contained herein pertaining to particular sales. Therefore, all prospective purchasers are expected to make their own independent inspections and appraisals prior to bidding.

G. If any conflict exists between the information in the Timber Notice of Sale, timber sale map, sale preview packets and that in the timber sale contract, the signed contract will prevail.

H. Timber sales are subject to the Washington State Forest Excise Tax (RCW Chapter 84.33).

I. Within 30 days of sale confirmation, the apparent high bidder will provide to the State the Performance Security specified on each Notice of Sale.

J. Each DNR region office has information about sales offered in that region. For further information, contact the respective DNR region office. Region office addresses and telephone numbers appear on the back cover of this booklet.

K. The purchaser assumes the responsibility for any costs associated with extra maintenance or repair levied by a county for any county road used by the purchaser.

BIDDING PROCEDURES FOR TIMBER AUCTIONS (Continued)

Bidding Process

- A. All timber will be auctioned using the sealed bid method.
- B. Bids submitted on day of auction must be in the bid box at the specified auction location before 10:00 a.m. The respective DNR region office must receive mailed bids by 4:30 p.m., on the last business day before the auction. Bidders assume all risk for the method of delivery.
- C. The DNR has the right to reject bid forms that are completed incorrectly. *All bid forms must have an original signature on behalf of the person or entity submitting the bid, and must be on the form provided in this booklet or a photocopy thereof. Revised documents are not permissible.* Bidding instructions are on the back of the Sealed Bid Form. A bid deposit must be included in the sealed bid envelope unless using a Timber Sale Statewide Bid Bond.
- D. All bids must include the completed Sealed Bid Form and bid deposit.
- E. Bids will be opened in each respective region in the order in which sales appear in the Public Auction Sale of Timber book (alphabetically by county and by agreement number).
- F. If a tie bid occurs, the names of the tie bidders will be placed in a hat and the successful bidder will be determined by a drawing.
- G. The apparent high bidder on a particular sale will have the option of withdrawing additional sealed bids submitted for any remaining sales to be auctioned. The apparent high bidder must exercise this option within two minutes after the apparent high bidder is announced.

Auction Time and Location

Auctions will start at 10:00 a.m. and close at 4:00 p.m. on the date and at the location specified in each Timber Notice of Sale.

Bid Deposits

- A. Required bid deposits are listed on each Timber Notice of Sale.
- B. Bid deposits must be in the form of cash, certified check, cashiers' check, money order or bid bond.
- C. Bid bonds may be either a Timber Sale Statewide Bid Bond or a Timber Sale Per Sale Bid Bond.
- D. All bid deposits shall be submitted by the person or entity submitting the bid and made payable to the Department of Natural Resources. **Third party deposits will not be accepted.**

Timber Sale Per Sale Bid Bonds

- A. The Per Sale Bid Bond shall guarantee payment of the bid deposit **within ten days of auction.**
- B. The balance between the bid bond and the Initial Deposit payment is due by 4:30 p.m., **on the day of auction.**
- C. Additional forms and instructions for a Per sale Bid Bond are available at any DNR region office.

Timber Sale Statewide Bid Bond

- A. Statewide Bid Bonds shall guarantee payment of the Initial Deposit on any statewide timber sale while the bond is in effect.
- B. The Statewide Bid Bond must be received by the Department of Natural Resources, Product Sales & Leasing Division, PO BOX 47016, Olympia, Washington, 98504-7016, ten days in advance of the auction date. The bond shall be in the amount of \$150,000.00.
- C. The bidder must supply a list of persons authorized to bid using the bond. Bid bonds are subject to approval by the Department of Natural Resources.
- D. Successful bidders using a Statewide Bid Bond must pay the total Initial Deposit payment (10 percent of the total bid price) **by 4:30 p.m. on the day of auction.**
- E. A Statewide Bid Bond cannot be used to secure the Initial Deposit payment due the day of auction.
- F. Additional forms and instructions for a statewide bid bond are available at any DNR region office.

Payments

The initial deposit for a sale is 10% of the total bid value as submitted by the apparent high bidder (25% if the bidder is a defaulter as defined under WAC 332-140-300) and never less than \$5,000.00 for lump sum sales. For Lump Sum sales appraised at less than \$5,000.00, the entire bid value is due on day of auction.

- a. Apparent high bidders using cash, certified check, cashiers' check or money order as a bid deposit must pay the total Initial Deposit amount by 4:30 p.m. on auction day.
- b. Apparent high bidders using a Timber Sale Per Sale Bid Bond as a bid deposit must pay the difference between the bid deposit and the total initial deposit by 4:30 p.m., on the day of auction. The bid bond amount must be replaced with a certified check, cashier's check, bank draft, cash, money order, or wire transfer within ten days of the auction.
- c. Apparent high bidders using a Timber Sale Statewide Bid Bond must pay the entire Initial Deposit amount by 4:30 p.m. on the day of auction.

Fees due on the day of sale must be paid by 4:30 p.m.

All payments must be in the form of a certified check, cashier's check, bank draft, cash, money order or wire transfer.

Eligibility to Bid

In order to bid on State timber sales you must be:

- 18 years of age (or have a co-signer who meets the eligibility requirements),
- Licensed to do business in the State of Washington,
- Eligible to bid on Export Restricted timber, and
- Capable of meeting all contract obligations.

Authorized Representatives

Companies may only use authorized representatives or company officers to bid on State sales, sign State documents or sign checks. A list of authorized representatives and their specific authorities must be submitted in writing to the Department of Natural Resources Product Sales & Leasing Division, PO BOX 47016, Olympia, Washington, 98504-7016, ten days in advance of the auction. A company owner or officer must sign this submittal.

Rock for construction under this contract may be obtained from any commercial source as approved in writing by the Contract Administrator. Purchaser shall drill, shoot and crush a minimum of 4,221 cubic yards truck measure of 2½ INCH MINUS CRUSHED rock, of which, 3,000 cubic yards truck measure is to be stockpiled at the Walville Quarry pit and a minimum of 1,221 yards shall be used as road surfacing material as per the Road Plan. Any damage to any road resulting from any harvest operations will be repaired at the Purchasers expense unless authorized by the Contract Administrator. Road construction will not be permitted from September 30 to July 1 unless authorized in writing by the Contract Administrator.

ACREAGE DETERMINATION

CRUISE METHOD: The sale acres were determined by GPS. The sale area was cruised using a variable plot cruise method. Harvesting activities are estimated to be approximately 10% ground-based and 90% cable harvesting.

FEES: \$50,000.00 is due on day of sale. \$14.54 per MBF is due upon removal. These are in addition to the bid price.

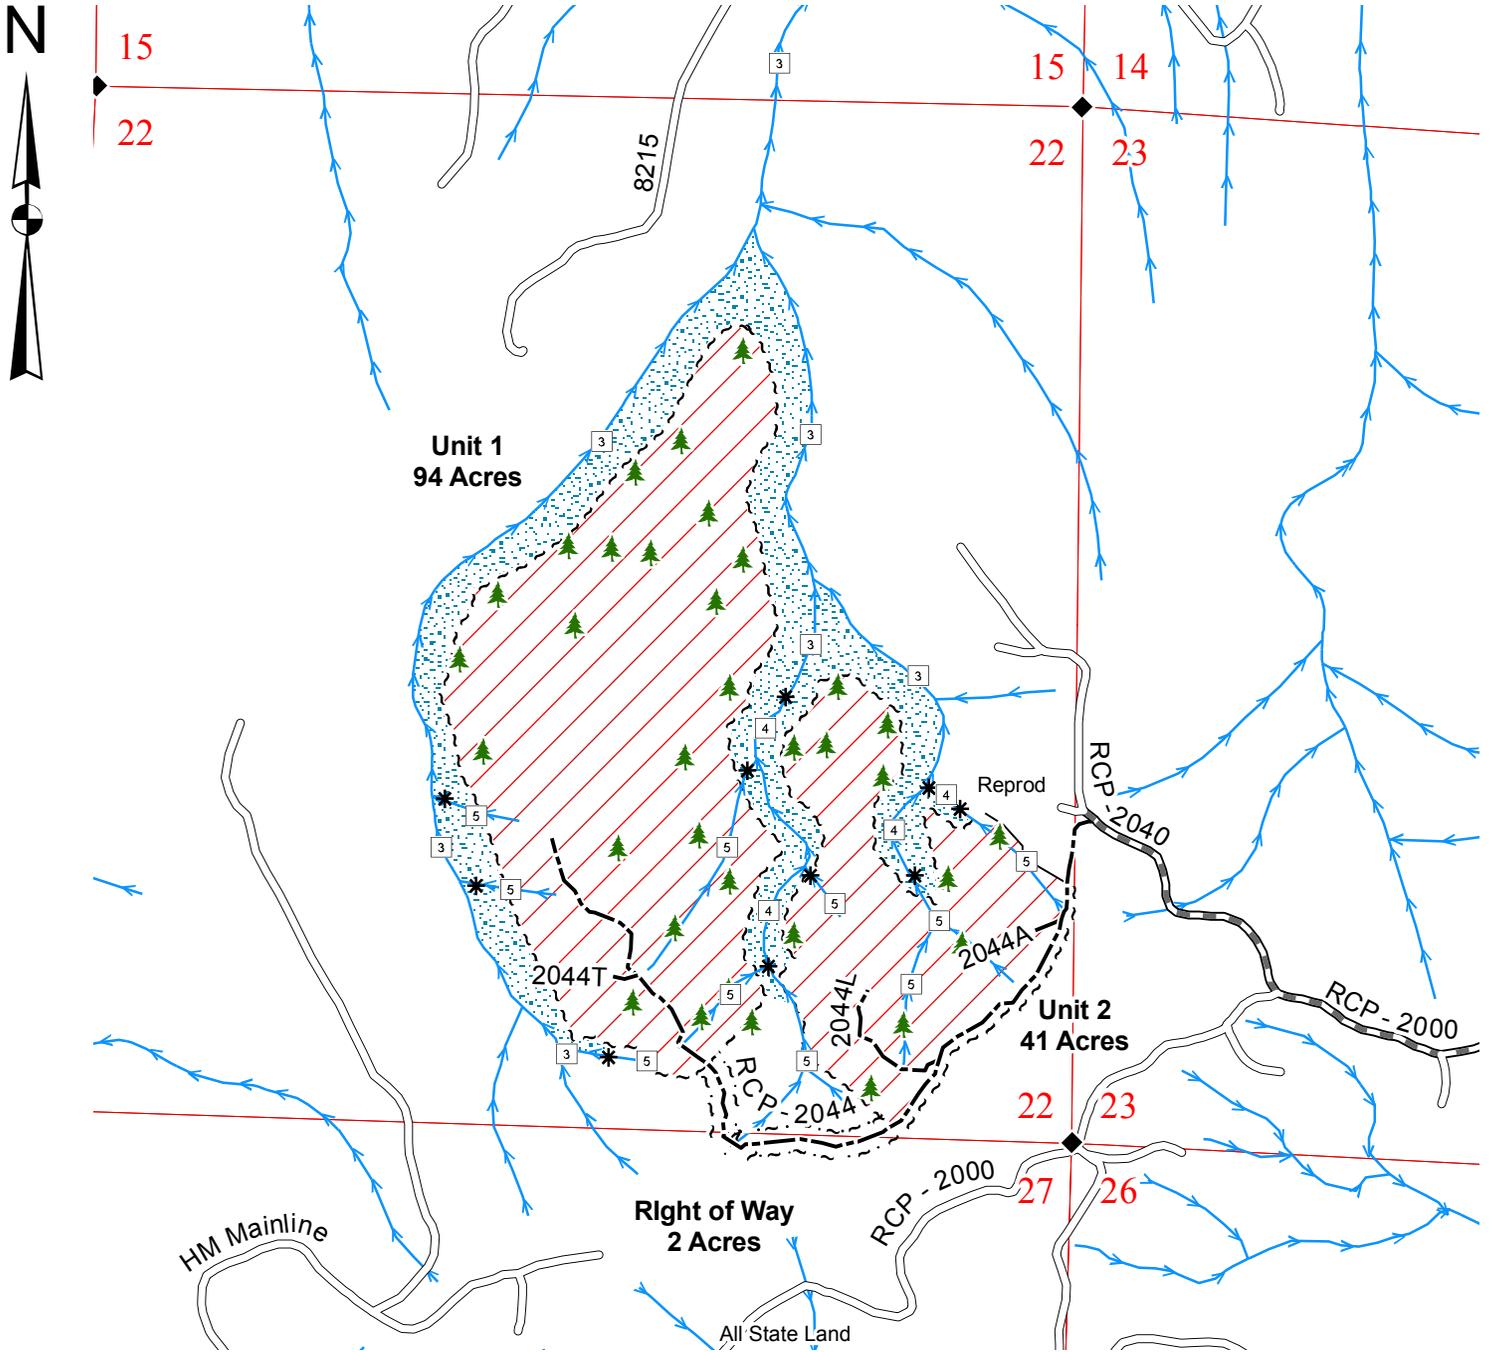

SPECIAL REMARKS: Intermediate support may be required to prevent soil rutting in Unit #1 off all roads. Full suspension is required on all slopes greater than 70%.

EXPIRATION DATE: September 30, 2009 **ALLOCATION:** Export Restricted

BIDDABLE SPECIES: Douglas fir

BID DEPOSIT: \$29,300.00 or Bid Bond. Said deposit shall constitute an opening bid at the appraised price.

HARVEST METHOD: Cable; cable or rubber-tired forwarder on slopes 35% or less. In addition, yarding by tracked equipment with lead end suspension shall be allowed east of the AL-23 Road in Unit #1. Cutting and yarding in the small wood thinning portion of the timber sale will not be permitted during the bark slippage season unless authorized in writing by the Contract Administrator. This season is estimated to run from April 1 to July 15 but will vary dependent on weather conditions. If permission is granted to operate during the bark slippage season the purchaser will be required to provide a plan outlining mitigation measures. Falling and Yarding will not be permitted from November 1 to March 31 unless authorized in writing by the Contract Administrator (THIS PERTAINS TO GROUND-BASED YARDING ONLY) to reduce soil damage and erosion.

ROADS: 27.32 stations of required construction. 52.93 stations of required reconstruction. 76.38 stations of optional construction. 76.38 stations of road to be abandoned if built.

Development of an existing hardrock source at station 199+25 of the AL-ML Road will involve drilling, shooting, and processing rock to generate approximately 4,500 cubic yards of riprap and 3-inch-minus ballast.

Use of the existing 3-inch-minus ballast stockpiles in the pit at station 199+25 of the AL-ML Road.

Use of the existing 2-inch-minus surfacing stockpile in the pit at station 199+25 of the AL-ML Road. Use of this stockpile is limited to the quantities as specified in this road plan. The hauling of forest products will not be permitted from November 1 to March 31 unless authorized in writing by the Contract Administrator to reduce soil damage and siltation.

ACREAGE DETERMINATION

TIMBER NOTICE OF SALE

CRUISE METHOD: Acres determined by GPS traverse. 325.2 acres gross. Acreage deducted for green tree retention clump and RMZ 25-foot core buffer. 304.7 acres net (including r/w). Cruised using variable plot method in Unit #1 Regen; and fixed plot in Unit #2 and #1. Expansion factor used is 40.00 for VP and 1/20 for FP. Sighting height is 4.5 feet. Grid size plot spacing is 300x300 feet for Unit #1 Regen; 400 x 200 feet Units #1 and #2. Plot ratio cruise count is Cruised All.

FEES: \$36,159.25 is due on day of sale. \$1.20 per ton is due upon removal. These are in addition to the bid price.

SPECIAL REMARKS: Clearcut Area=24 Acres; Thinning Area= 281 Acres

Intermediate supports may be necessary on this sale.

Utility price for P-024 Clause is \$2.00 per Ton.

Schedule B
Sherwood Thin Prescription

Sherwood Thin Prescription

Designated Leave Trees:

	Trees per acre	Spacing (feet)	Diameter Limits (inches)	Down Woody Debris
Unit 1	100 - 105	21 X 21	17	35
Unit 2	105 - 110	20 X 20	16	135

Unit 1:

- Leave 100 to 105 trees per acre (tpa) across entire unit with an average spacing of approximately 21 feet by 21 feet.
- Leave all conifers greater than 17 inches diameter breast height (dbh), unless the trees are severely deformed as defined below or need to be removed for corridors.
- Cut a total of 35 conifers for down woody debris recruitment. These trees should be cut within 25 feet of the boundary tags for all type 4 streams, and should be of a similar diameter as other cut and yarded trees. These trees should be felled toward the stream channel where feasible and should be proportionally distributed across all type 4 streams.

Unit 2:

- Leave 105 to 110 tpa across entire unit with an average spacing of approximately 20 feet by 20 feet.
- Leave all conifers greater than 16 inches dbh, unless the trees are severely deformed as defined below or need to be removed for corridors.
- Cut a total of 135 conifers for down woody debris recruitment. These trees should be cut within 25 feet of the boundary tags for all type 4 streams, and should be of a similar diameter as other cut and yarded trees. These trees should be felled toward the stream channel where feasible and should be proportionally distributed across all type 4 streams.

All Units:

- Leave all western red cedar.
- If no conifers exist, hardwood species must be used to fulfill the spacing requirements. If conifers do exist, remove all hardwoods.
- Openings created by felling trees shall not exceed 30 feet between leave trees. If openings in the stand exceed this distance, sufficient trees shall be left on the perimeter of the opening to maintain the appropriate trees per acre.

Leave Tree Definition

Leave trees in the unit will be selected by comparing their characteristics with other trees in the stand. Leave trees will be the best trees from the largest diameter classes available and evenly distributed over the landscape.

Preferred leave tree species in order of preference are:

1. Western Red Cedar (no cut except for corridors)
2. Douglas-fir
3. Western Hemlock
4. Pacific Silver Fir
5. Big Leaf Maple

Best tree definition is having the following characteristics:

- Fullest and most vigorous crowns
- Free of disease, major defect and damage
- Best form: tallest tree, straightest boles, and smallest limb diameters

Deformed tree:

A tree that has forked tops, broken tops, or severe cat faces (bark removed on more than half the circumference of the tree).

Ground-based Yarding Corridors:

Corridors are limited to 14 feet wide (including rub trees) and no less than 75 feet apart as measured from the center of the corridor. Where possible, corridors should be located in a manner to minimize the damage to or removal of leave trees.

Cable Yarding Corridors:

Corridors are limited to 12 feet wide (including rub trees) and no less than 100 feet apart as measured from the center of the corridor. Where possible, corridors should be located in a manner to minimize the damage to or removal of leave trees. Landing will be located to provide for parallel yarding corridors whenever possible. When radial yarding corridors are required from a central landing, the distance between yarding corridors must be no closer than 100 feet where the corridor leaves the unit as measured from the center of the corridor.

Compliance:

A 1/20 acre fixed radius plot (26.3 feet) will also be measured to determine trees per acre. The number of trees in a plot will be multiplied by 20 to determine the trees per acre for that plot. The average of all plots in a unit will determine the trees per acre for that unit. Only trees greater than or equal to 6.5" DBH will be measured.

Unit divisions for assessment of damage:

Per contract clauses H-012 and D-040.

Unit 1 Three compartments are delineated for assessment of damage. These are marked on the supplemental map to the Contract Administrator and labeled as 1A, 1B, and 1C.

Unit 2 Three compartments are delineated for assessment of damage. These are marked on the supplemental map to the Contract Administrator and labeled as 2A, 2B, and 2C.

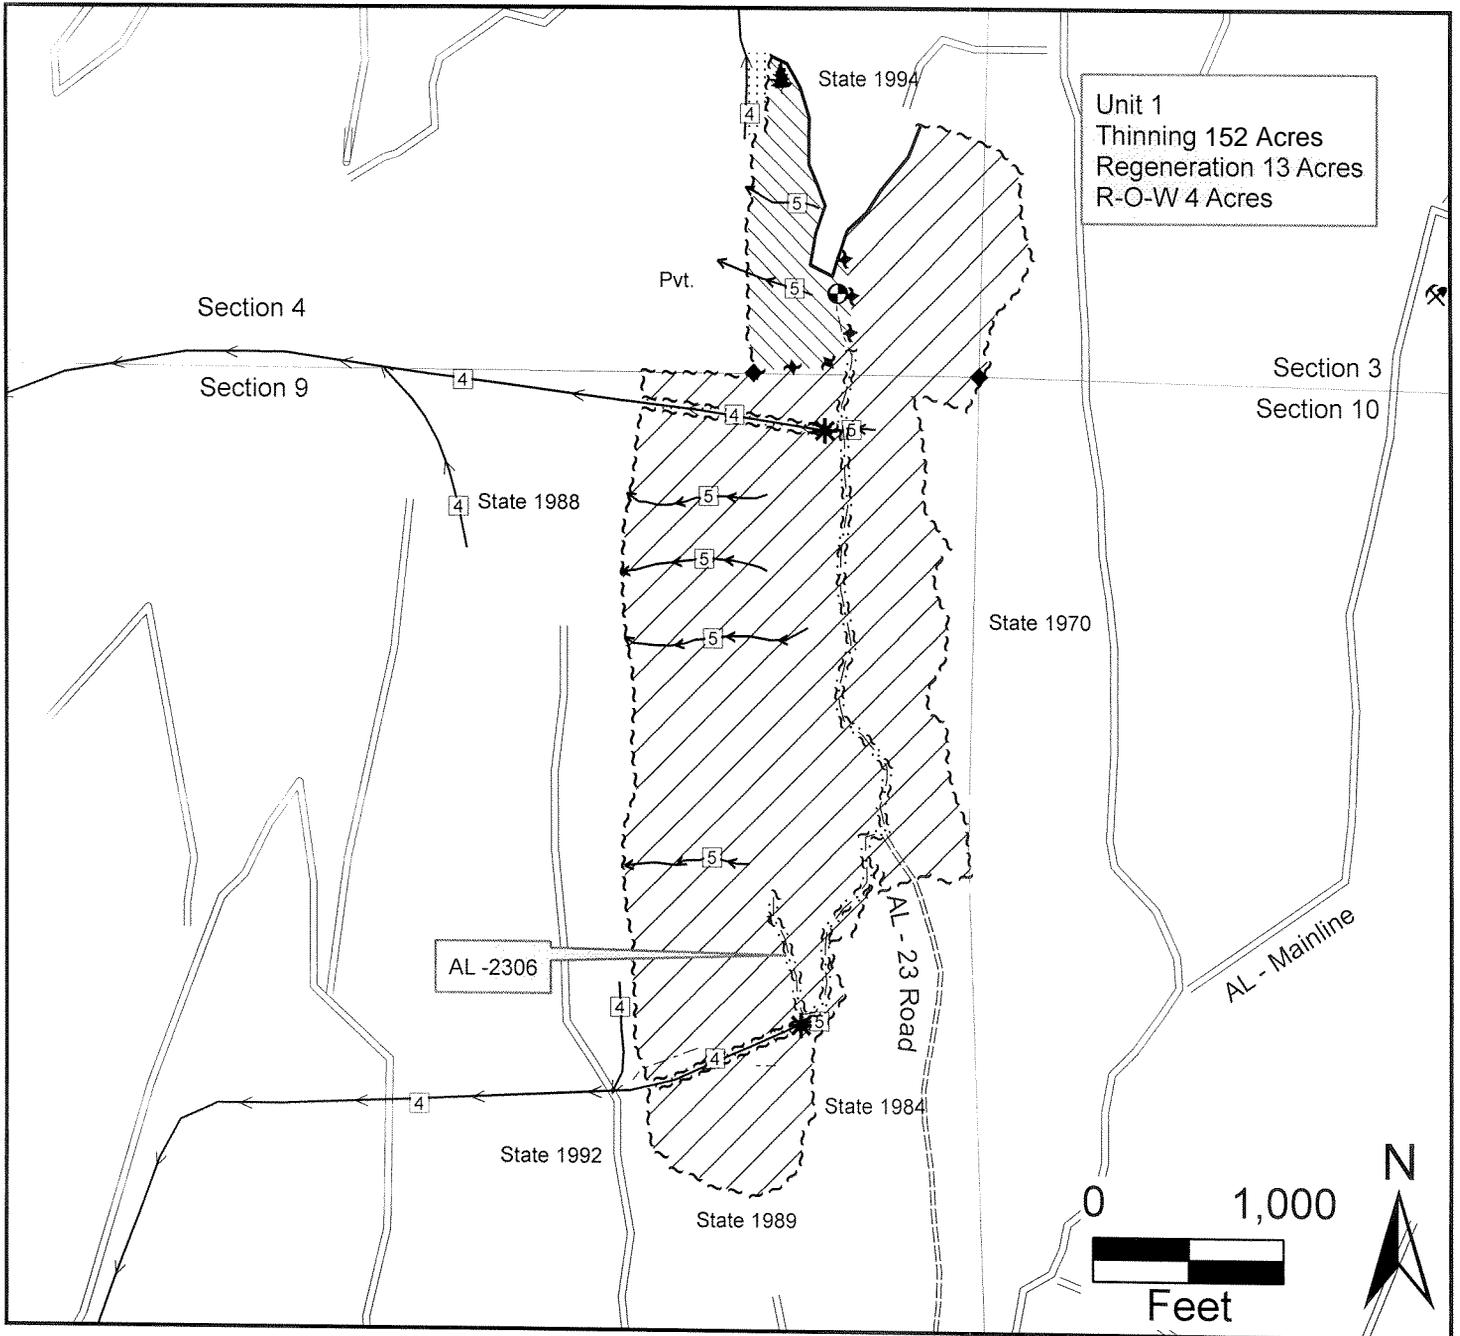

Certification of Fallers and Yarder Operators (additional requirements beyond those outlined in the H-011)

The contract administrator and faller/harvest operator will jointly review the take tree selection criteria as outlined in Schedule B of the sale contract. In conjunction with the Contract administrator, the faller/ harvest operator will mark a designated area as a test plot within the sale area boundary. Satisfactory thinning of the test plot completes the certification process. Certifications will be issued to individuals when they demonstrate to the Contract administrator their ability to perform within the requirements set forth in the contract.

TIMBER NOTICE OF SALE

FEES: \$54,325.00 is due on day of sale. \$1.14 per ton is due upon removal. These are in addition to the bid price.

SPECIAL REMARKS: (1) Intermediate supports may be necessary in Unit #2. (2) This sale requires the girdling of 93 trees, marked with double bands of yellow paint on the bole. (3) Utility price for P-024 Clause is \$2.00 per Ton.

Schedule B
Deer Peak PC Thinning Prescription

Unit 1:

- Cut all Hardwoods
- Cut WH 6 to 13 inches DBH
- Cut PSF 6 to 14 inches DBH
- An additional 945 trees may be removed from Unit 1. These additional trees must meet the following criteria: 1) must be western hemlock, 2) must be between 14" and 21" DBH, 3) must be double-stemmed trees where the double stem originates within the first 32' log. If trees that meet this criteria are removed from the corridors, they will not count toward the total number allowed for removal.

Unit 2:

- Cut all Hardwoods
- Cut WH 6 to 13 inches DBH
- Cut PSF 6 to 14 inches DBH
- An additional 1,304 trees may be removed from Unit 2. These additional trees must meet the following criteria: 1) must be western hemlock, 2) must be between 14" and 21" DBH, 3) must be double-stemmed trees where the double stem originates within the first 32' log. If trees that meet this criteria are removed from the corridors, they will not count toward the total number allowed for removal.

Special Thinning Conditions:

- In areas where thinning is not necessary, i.e., prescription is met, do not put in yarding corridors.
- If optional construction is not built, purchaser is not authorized to remove the right of way timber. This must be identified by the purchaser and agreed upon in advance by the Contract Administrator.
- The number of additional trees described above represents the maximum allowed. Operational constraints or other considerations may prohibit removal. Additional trees shall not be cut if their removal creates an opening greater than 40 feet between leave trees.
- Corridors must be pre-marked and approved by the Contract Administrator prior to falling.
- Additional trees that will be removed shall be pre-marked by the operator and approved by the Contract Administrator prior to falling. The cut stump of each tree 14" and above that is removed shall be tagged by the Purchaser with tags provided by the State. Corridors will not be approved until all additional trees tributary to each setting are marked and approved.

Cable corridors: Landings will be located to provide for parallel yarding corridors whenever possible. All corridors will be field located by the Purchaser and approved by the Contract Administrator prior to falling. Where possible, minimize the number of streams that will be crossed with each corridor. Removal of wood from corridors that cross multiple streams or that would require yarding parallel to streams within the 100' riparian management zone will not be approved. Corridors will be limited to 12-feet including rub trees. Corridors will be at least 100 feet apart when parallel as measured from the center of the corridors. When radial yarding corridors are necessary from a central landing, the distance between yarding corridors must be no closer than 100 feet where the corridor leaves the unit as measured from the center of the corridors. Where possible corridors should be located in a manner to minimize the damage to or removal of leave trees. When corridors are field located, only leave trees within 3 – 5 feet of the center of the corridor should be removed prior to yarding. Following completion of yarding of each corridor, rub trees within 6 feet of the center of the corridor may be felled and yarded to the landing. It is not required to remove all leave trees from the 12-foot corridor.

Ground-based corridors: Ground-based yarding corridors will be limited to 14 feet including rub trees and no less than 70 feet apart as measured from the center of each corridor. All corridors will be field located and approved by the Contract Administrator prior to falling. Where possible, corridors should be located in a manner to minimize the damage to or removal of leave trees. No ground-based yarding will take place on slopes greater than 25%. Ground-based yarding equipment and corridors are prohibited within 25' of the inner zone of the riparian management zone. Trees felled along the inner zone must be felled into the unit and not into the inner zone.

Compartments for assessment of damage
Per contract clauses H-012 and D-040.

- A In Unit 1 from BD-5507 road south to unit boundary.
- B In Unit 1 from BD-5507 north to unit boundary.
- C In Unit 2 from BD-5509 south to unit boundary.
- D In Unit 2 from BD5509 north to unit boundary.

Down wood and snag recruitment: Trees marked with yellow bands have been designated for riparian habitat enhancement and are to be treated as listed in the chart below:

	Girdle (double yellow bands)	Leave for future snag/down wood recruitment (single yellow band)
Unit 1	24	94
Unit 2	69	185

Certification of Fallers and Yarder Operators
(additional requirements beyond those outlined in H-011)

The Contract Administrator and faller/harvester operator will jointly review the take tree selection criteria as outlined in Schedule B of the sale contract.

In conjunction with the Contract Administrator, the faller/harvest operator will mark a designated area as a test plot within the sale area boundary. Satisfactory thinning of the test plot completes the certification process.

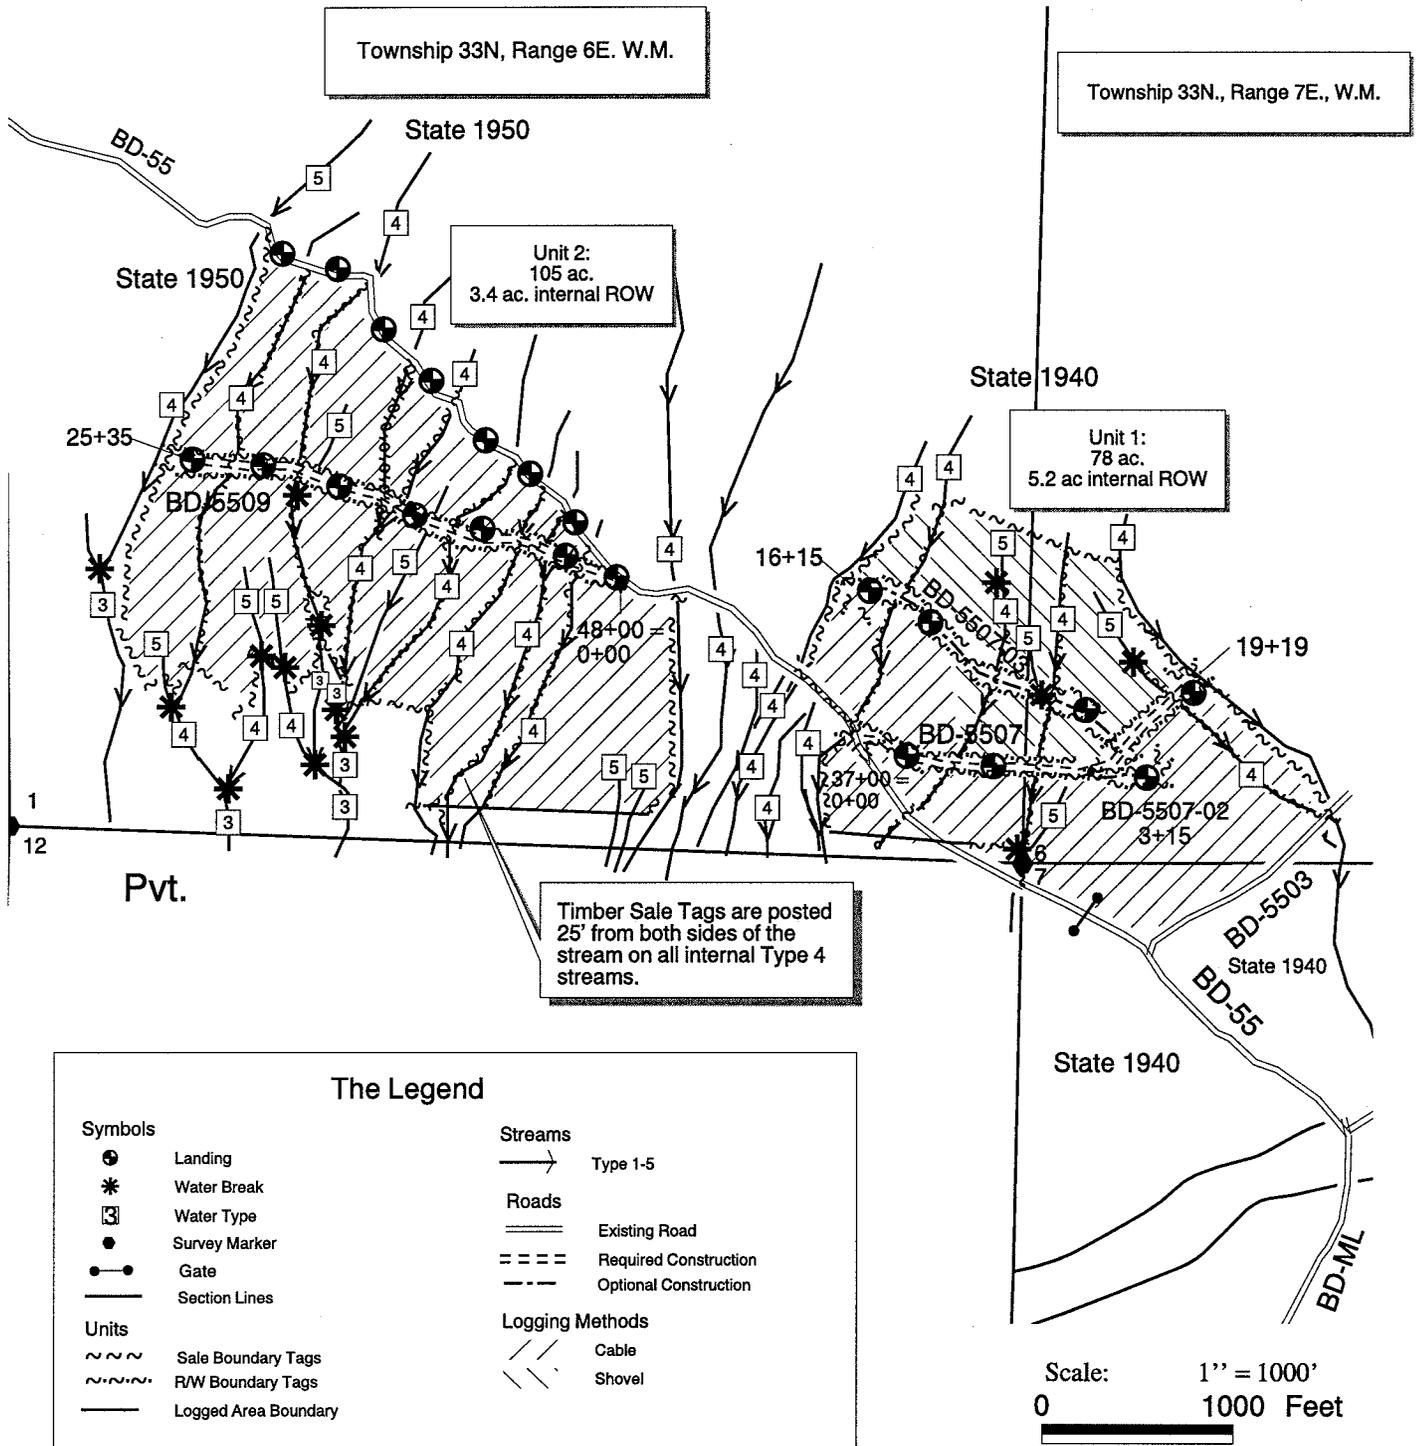

Certifications will be issued to individuals when they demonstrate to the Contract Administrator their ability to perform within the requirements set forth in the contract.

Permission to deviate in any manner from this prescription must be approved in writing by the Contract Administrator.

EXPIRATION DATE: September 30, 2010 **ALLOCATION:** Export Restricted

BID DEPOSIT: \$174,600.00 or Bid Bond. Said deposit shall constitute an opening bid at the appraised price.

HARVEST METHOD: Cable and Ground based equipment. Cable; cable or shovel on slopes 25% or less. Falling and Yarding will not be permitted from October 15 to May 1 unless authorized in writing by the Contract Administrator.

ROADS: 113.55 stations of road construction. 48.48 stations of road reconstruction. 16.77 stations of temporary construction to be abandoned if built.

Rock for road construction will be taken from the existing CH-0101, CH-41 and the EK-6505-07 hard rock pits. Development will involve clearing, stripping, drilling, shooting, and processing rock to generate approximately 388 cubic yards of rip rap and approximately 2,884 cubic yards of (bank run gravel, 3-inch-minus) ballast. This rock is available at no cost on State lands.

Road construction, road reconstruction, and the hauling of rock will not be permitted from November 1 to March 31 unless authorized in writing by the Contract Administrator. The hauling of forest products will not be permitted from November 1 to March 31 unless authorized in writing by the Contract Administrator to reduce soil damage and siltation.

ACREAGE DETERMINATION

CRUISE METHOD: Acres were determined by GPS and hand traverse in Units #1, #2, RMZ's, and WMZ's, and by hand traverse in right of ways. 169.4 acres gross. 4.7 acres were deducted for leave tree clumps, leaving 164.7 acres net. Sale was cruised using variable plot method. Expansion factor used was 54.45. Sighting height was 4.5 feet. Cruise intensity for Units #1 and #2 was 1:3, while all plots were cruised in the WMZ's. All western redcedar were cruised on each plot throughout the sale. Grid size plot spacing for the sale was 400 X 200. A minor boundary adjustment occurred on the RMZ buffer in Unit 2 in late October per direction from Forest Practices. This is estimated to have reduced the unit by approximately 1.1 acres. The volume and acreage has not been removed from the sale

volume and acreage listed above. An updated traverse map for this unit is available at the NW Region Office.

FEES:

(1) Purchaser shall furnish a check to the State made payable to City of Everett in the amount of \$5,963.00, on the day of sale for permit #55-081431. (2) \$81,958.25 is due on day of sale. \$9.00 per MBF is due upon removal. These are in addition to the bid price.

SPECIAL REMARKS: None.

Schedule B
Porkchop WMZ & RMZ Thinning Prescription

Thinning Prescription; Unit #1

No RMZ thinning will occur as all RMZ buffers are no-harvest buffers. The WMZ thinning activity will be a “thinning from below” retaining the most dominant trees on the site. The residual basal area shall average 170 square feet. In any given area the basal area shall not be less than 150 square feet. Leave trees will be selected by comparing their characteristics with other trees in the stand. The best leave trees will have the following characteristics (in descending order of importance):

- 1) Free of disease, major defect and damage.
- 2) Largest diameters and greatest height.
- 3) Fullest and most vigorous crown.
- 4) Best form (tallest tree, straightest bole, smallest limb diameter).

The preferred species for retention (in descending order of preference) are as follows:

- 1) Douglas-fir
- 2) Western hemlock
- 3) Pacific Silver fir

Thinning Prescription; Unit #2

The WMZ thinning activity will be a “thinning from below” retaining the most dominant trees on the site. The residual basal area shall average 170 square feet. In any given area the basal area shall not be less than 150 square feet and not more than 180 square feet. Residual tree spacing shall be varied to preserve trees of good form and vigor with the largest diameter and height. All trees over 16 inches d.b.h. as measured 4.5 feet above the ground, Western red cedar and Sitka Spruce shall be left unless permission to cut is granted by the Contract Administrator. Leave trees will be selected by comparing their characteristics with other trees in the stand. The best leave trees will have the following characteristics (in descending order of importance):

- 1) Free of disease, major defect and damage.
- 2) Largest diameters and greatest height.
- 3) Fullest and most vigorous crown.
- 4) Best form (tallest tree, straightest bole, smallest limb diameter).

The preferred species for retention (in descending order of preference) are as follows:

- 1) Douglas-fir
- 2) Western hemlock
- 3) Pacific Silver fir

No western red cedar, or Sitka spruce shall be cut unless permission is granted by Contract Administrator for yarding corridors.

Riparian Management Zone (RMZ) special attributes:

- Commercial thinning of RMZs shall follow the WMZ prescription as outlined above.
- No trees shall be harvested nor equipment be within 50 feet of the tagged boundary with the exception of designated road &/or tractor crossing locations.
- 3 trees per RMZ acre shall be selected from the first 25 to 50 feet outside the “No-harvest” 25-foot zone (marked with white “Timber Sale Boundary tags”) and felled towards the typed water to serve as down wood (DW) as designated by the following table and 2 trees per RMZ acre shall be topped at no less than 20’ or double-girdled:

TREES TO BE FELLED FOR DOWN WOOD (DW)

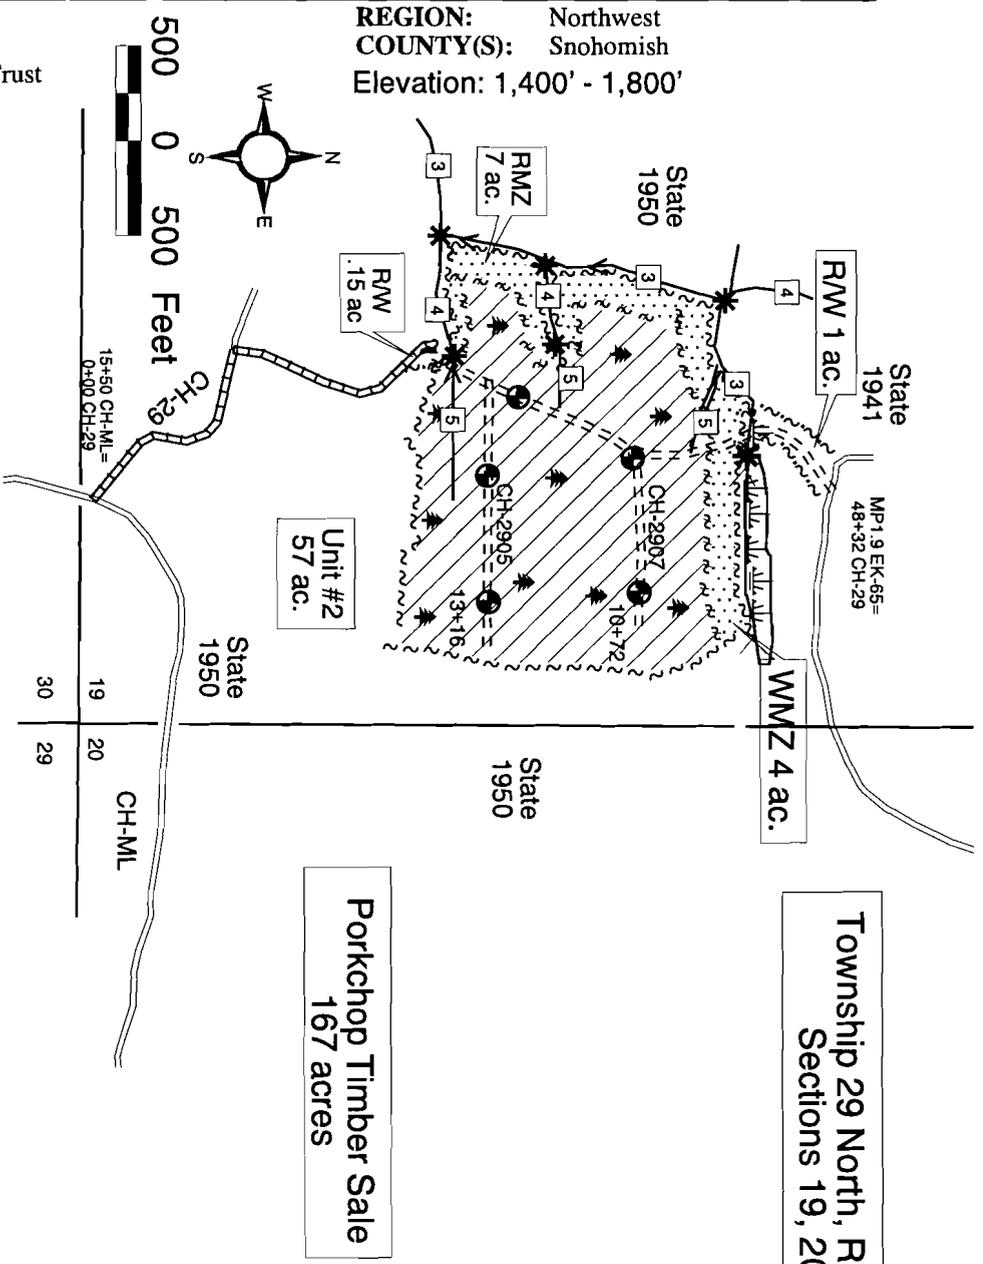

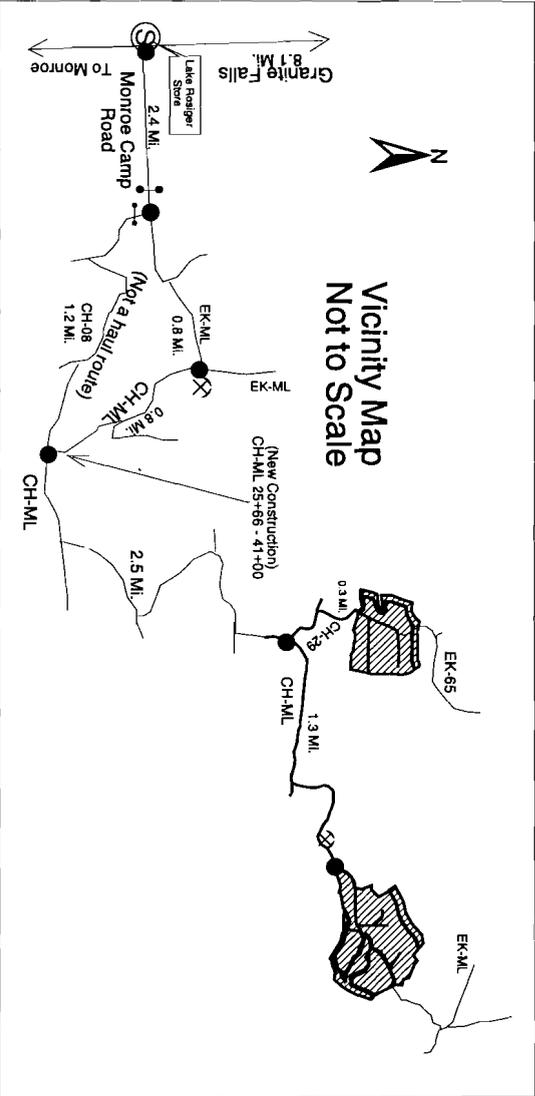

Stream Type	Average Distance between Down Wood Trees	Acceptable Distance Range	Preferred Species as DW	DW DBH Range
Type 3	50'	30 – 70'	1) Douglas-fir 2) Western hemlock	12-16" DBH
Type 4	90'	60 – 120'	1) Douglas-fir 2) Western hemlock	12-16" DBH

- DW trees shall not count towards the basal area per acre target.
- DW trees and snag retention are not required along the WMZ on the northern boundary.

Schedule B
Berry View Salvage PC Prescription

Take: All hardwoods, all downed, preexisting damaged (as defined in H-012 clause), and leaning (greater than 20 degrees) conifer (prior to commencement of operations) and snags within the sale area, as approved by the Contract Administrator, or as additionally approved by the Contract Administrator.

YARDING REQUIREMENTS:

Minimum front end suspension.

Cable corridors:

Corridors will be limited to 14-feet including rub trees. Corridors will be at least 100 feet apart when measured from the center of the corridors. When radial yarding corridors are required from a central landing, the distance between yarding corridors must be no closer than 100 feet where the corridor leaves the unit as measured from the center of the corridors. Where possible, corridors should be located in a manner to minimize the damage to or removal of leave trees. When corridors are field located, only leave trees within 6 feet of the center of the corridor should be removed prior to yarding. Following completion of yarding of each corridor, rub trees within 8 feet of the center of the corridor may be felled and yarded to the landing. It is not required to remove all leave trees from the 14-foot corridor.

Use old corridors from Vale View Thinning where possible.

Ground yarding corridors:

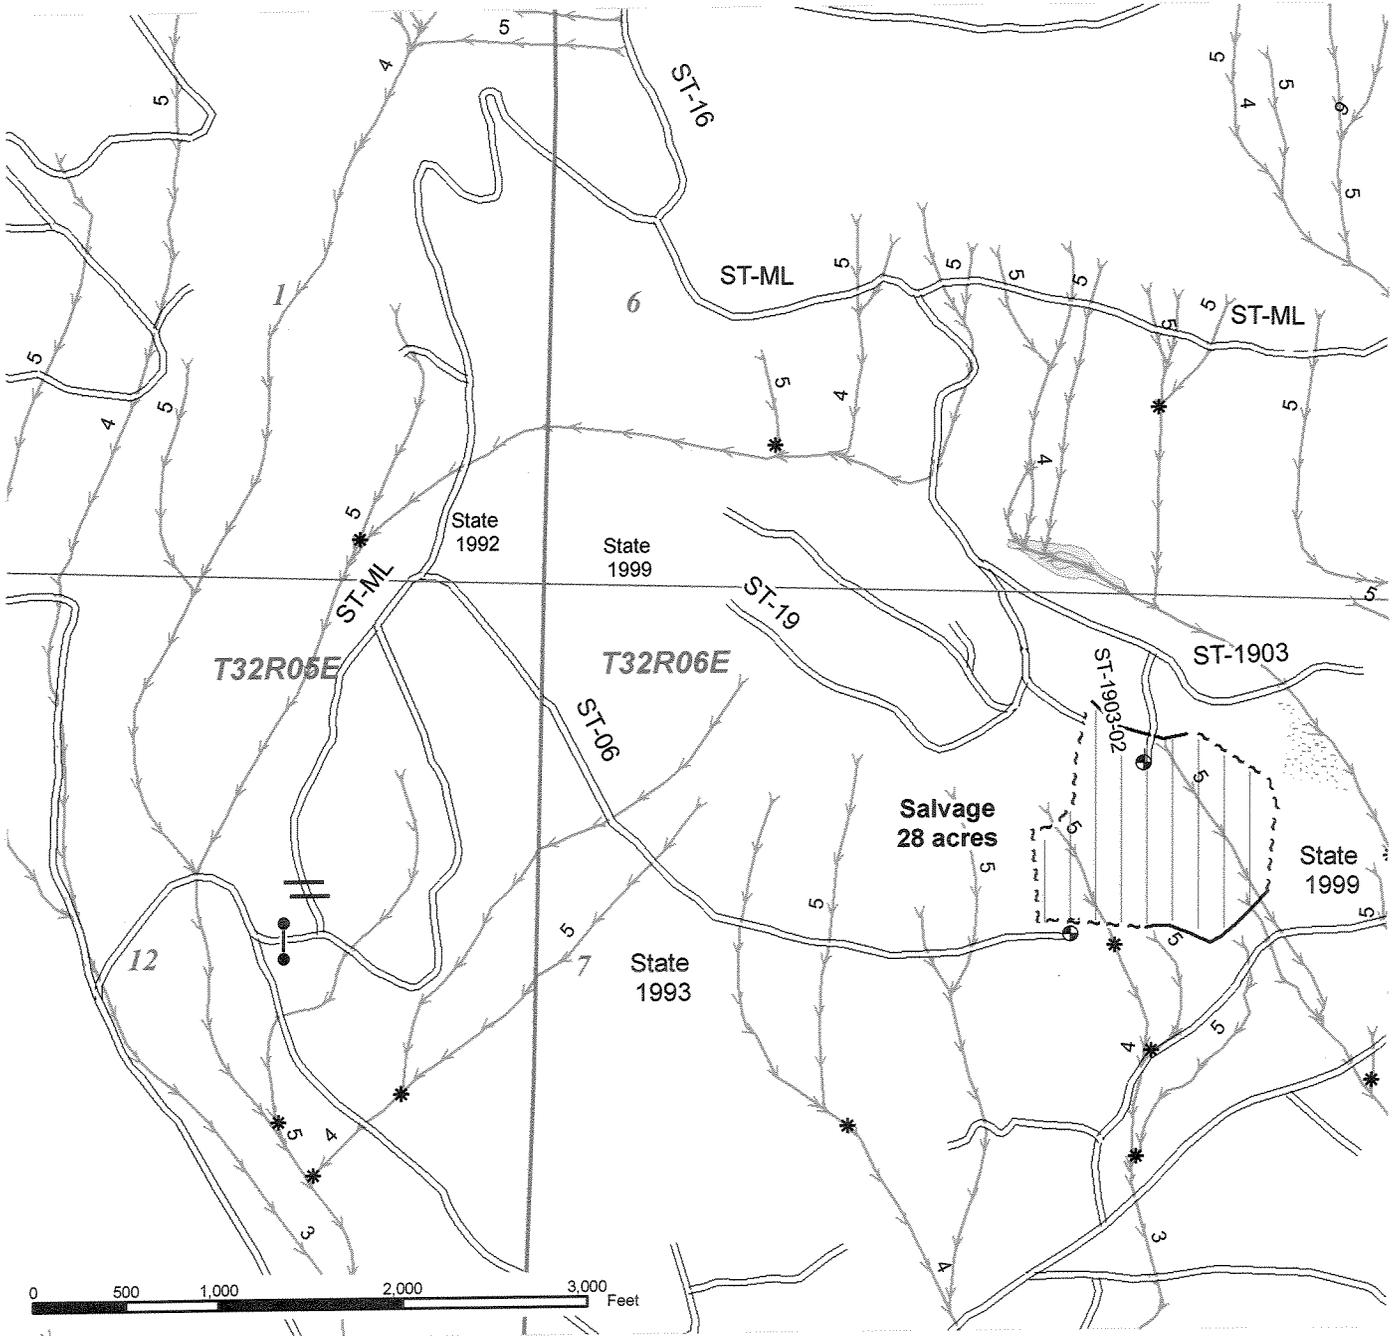

Corridors are limited to 14 feet wide (including rub trees) and no less than 70 feet apart as measured from the center of the corridor. Where possible, corridors should be located in a manner to minimize the damage to or removal of leave trees. No ground yarding will take place on slopes greater than 35%.
