Public Auction Sale of Timber

Book 880

.....
June 2009

WASHINGTON STATE DEPARTMENT OF
Natural Resources

Peter Goldmark - Commissioner of Public Lands

Caring for
your natural resources ...
now and forever

IMPORTANT NOTICES

Natural Resources (DNR)

Governmental Regulatory Actions or Orders

The purchaser assumes the risk of liabilities related to regulatory actions or orders by any government agency that may affect the operability of these timber sales. Such regulatory actions or orders include, but are not limited to, actions taken pursuant to the State Forest Practices Act, Chapter 76.09 RCW, and the Federal Endangered Species Act, 16 U.S.C. §§ 1531-1544. Please see timber sale contract clauses G-066 and G-220 for further information.

Threatened and Endangered Species

DNR cannot verify the presence or absence of **any** threatened or endangered species that may affect the operability of the timber sale. Purchasers must rely on their own assessments.

Export Restricted

All timber purchased under these state DNR contracts shall not be exported outside of the United States until the timber has been processed. Purchasers shall not violate any of the prohibitions in WAC 240-15-015 (relating to the prohibitions on export and substitution), WAC 240-15-025 (relating to reporting requirements), and WAC 240-15-030 (relating to enforcement). If purchasers knowingly violate WAC 240-15-015, purchasers shall be barred from bidding on or purchasing export restricted timber as provided.

Cover photos

Timber Sales in this book are from state trust lands, managed to help build K-12 public schools, state universities, colleges, prisons, mental hospitals, the state Capitol; and to support local services in many counties.

Top left: State Forest Lands are managed to provide revenue to the counties in which they are located such as the Pacific County Courthouse in South Bend, Washington. Northwest Bridge Company of Portland, Oregon completed construction of the courthouse building in June of 1911. One unusual feature of the historic building is an "art glass dome" that crowns the structure. The courthouse is listed on the National Register of Historic Places.

Natural Resources
Doug Sutherland - Commissioner of Public Lands

Certification Opportunities for DNR Timber Purchasers

Certified forests are grown to an approved set of standards which demonstrate environmentally responsible, socially beneficial, and economically viable management practices that promote responsible stewardship and sustainable forestry. This unique commitment to sustainable forestry recognizes that forest landowners play a critical role in ensuring the long-term health and sustainability of our forests.

Forest Stewardship Council (FSC) is an independent, non-profit organization that promotes responsible management of the world's working forests through the development of forest management standards, a voluntary certification system, and trademarks that provide recognition and value to products bearing the FSC label in the marketplace. FSC standards ensure forestry is practiced in an environmentally responsible, socially beneficial, and economically viable way.

Sustainable Forestry Initiative® (SFI) is an independent non-profit organization internationally endorsed and accepted around the world. The SFI program is based on the premise that responsible environmental behavior and sound business decisions can co-exist. Its three-chamber Board of Directors governs all aspects of the SFI program, with equal representation from the environmental, economic and social sectors.

Currently, all Department of Natural Resources (DNR)-managed forested state trust lands in Washington State are certified under the Sustainable Forestry Initiative® (SFI) Standard. Lands within DNR's South Puget Habitat Conservation Plan Planning Unit, located within parts of King, Pierce, Thurston, Lewis, Kitsap, and Mason counties, are dually certified under the Forest Stewardship Council Pacific Coast Regional Standard (FSC) and the SFI Standard.

Certification under each standard (FSC and SFI) involves an inspection audit of the landowner's forest management activities by an independent third-party accredited team to verify that it meets specified forest management principles. If the forest unit complies with the specific standard, the landowner receives a certificate of conformance characterizing their forests as "green." Both standards encourage integration of perpetual growing and harvesting of trees with strong measures to protect wildlife, plants, soil, water, and air quality. Both standards provide a seal of approval that forests certified under these principles are well-managed. The global marketplace recognizes and endorses multiple forest certification standards. Each standard has individual market niches. By being dually certified, DNR can maximize its customer base and provide choices to the consumer.

Forest Stewardship Council

DNR's FSC Certificate number is: BV-FM / COC-080501

SUSTAINABLE FORESTRY INITIATIVE

DNR's SFI Certificate number is: 164041

DNR-managed forested state trust lands within the South Puget Habitat Conservation Plan Planning Unit (map below), located within parts of King, Pierce, Thurston, Lewis, Kitsap, and Mason counties, are certified as being in compliance with the Forest Stewardship Council Pacific Coast Regional Standard, which would make that planning unit dually certified under both the FSC and SFI Standards.

To learn more about chain-of-custody and demonstrating that your timber is derived from a responsibly managed forest and/or desires of becoming a "program participant" in the FSC Program and use the Licensed Marks, visit www.fscus.org.

To learn more about DNR timber sales certified under this standard, please visit www.dnr.wa.gov.

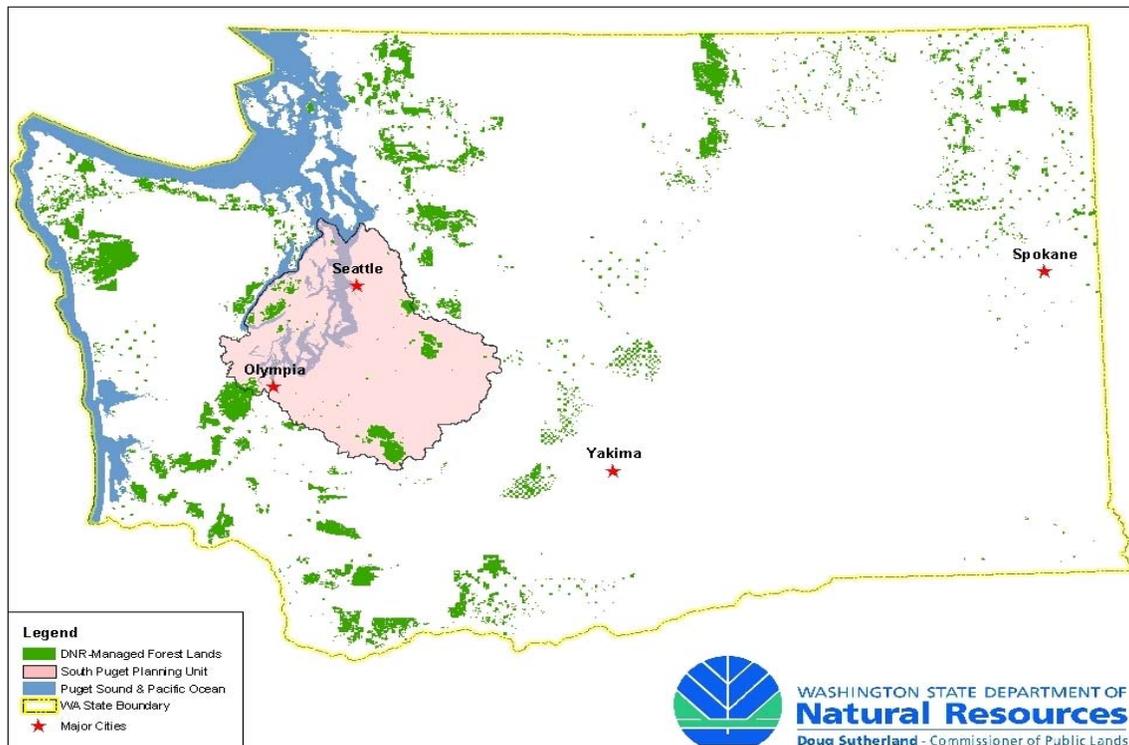

Forest Stewardship Council owns all right, title, and interest in and to the Forest Stewardship Council Program Marks.

All DNR-managed forested state trust lands across the state have been certified as being in compliance with the 2005-2009 Sustainable Forestry Initiative® Program.

To learn more about chain-of-custody and demonstrating that your timber is derived from a responsibly managed forest and/or desires of becoming a "program participant" in the SFI Program and use the Licensed Marks, visit www.sfiprogram.org.

To learn more about DNR timber sales certified under this standard, please visit www.dnr.wa.gov.

Sustainable Forestry Initiative, Inc. owns all right, title, and interest in and to the Sustainable Forestry Initiative® (SFI) Program group of service marks and collective membership marks.

To learn more about certification on DNR-managed forested state trust lands, visit <http://www.dnr.wa.gov/BusinessPermits/TimberSales> or contact the following:

Washington State Department of Natural Resources (DNR)

Bidder's/Purchaser's Inspection of Sale Area and Forest Products

Acreage estimates and volume estimates contained within each timber notice of sale and each timber sale contract are made only for administrative and identification purposes. Except as expressly provided by the timber sale contract, the purchaser shall be responsible for paying the entire purchase price, even if the actual acreage or timber volume varies from the estimated quantity or volume shown.

All prospective bidders have the opportunity and are expected to inspect the sale area and the forest products located thereon. Bidders shall not rely on any representations by the State including, but not limited to, acreage estimates, volume estimates, appraisal or pre-bid documentation. The successful bidder/purchaser will further warrant that they have entered the timber sale contract without any reliance upon the DNR's volume estimates, acreage estimates, appraisals, pre-bid documentation, or any other representation by the DNR.

Any timber sale contract arising out of these public auctions will require the successful purchaser to warrant that they are entering the timber sale contract based solely upon their own judgment of the value of the forest products, formed after their own examination and inspection of both the timber sale area and the forest products being sold.

Exclusion and Disclaimer of Warranties

The PARTIES AGREE that the IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, and ALL OTHER WARRANTIES EXPRESS OR IMPLIED, ARE EXCLUDED from this transaction, and shall not apply to the goods sold. For example, THE FOLLOWING SPECIFIC MATTERS ARE NOT WARRANTED, and are EXCLUDED from this transaction:

- a. ***The merchantability of the forest products.*** The use of the term “merchantable” in any document is not intended to vary the foregoing.
- b. ***The condition of the forest products.*** All forest products will be conveyed “AS IS.”
- c. ***The acreage contained within any sale area.*** Any acreage descriptions appearing in the timber notices of sale, timber sale contract, timber sale map or other documents are estimates only, provided solely for administrative and identification purposes.
- d. ***The volume, quality, or grade of the forest products.*** The descriptions of the forest products to be conveyed are estimates only, made solely for administrative and identification purposes.
- e. ***The correctness of any soil or surface conditions, presale construction appraisals, investigations, and all other pre-bid documents prepared by or for the State.*** These documents have been prepared for the State’s appraisal purposes only.
- f. ***That the sale area is free from threatened or endangered species, or their habitat.*** The State is not responsible for any interferences with forestry operations that result from the presence of any threatened or endangered species, or the presence of their habitat, within the sale area.

g. *That the forestry operations to be performed under this contract will be free from regulatory actions by governmental agencies.* The State is not responsible for actions to enforce regulatory laws, such as the Washington Forest Practices Act (Chapter 76.09 RCW), taken by the Department of Natural Resources or any other agency that may affect the operability of these timber sales.

h. Items contained in any other documents prepared for or by the State.

Please also see timber sale contract clause G-060 for further information.

BIDDING PROCEDURES FOR TIMBER AUCTIONS

The general requirements that follow are a part of all Timber Notices of Sale to be auctioned by the Department of Natural Resources (DNR).

General Information

The State reserves the right to waive minor irregularities and the right to reject any or all bids.

A. This book contains the timber notices of sale and maps for each timber sale scheduled to be auctioned. More specific information can be obtained by contacting the appropriate region office at the number listed on the back cover of this book.

B. The timber notice of sale is a summary of sale information. For more specific information, interested parties are encouraged to view the Appraisal Packets on the DNR Internet Site @ www.dnr.wa.gov, this will take you directly to the Product Sales Section. The Appraisal Packets contain **DRAFT** copies of the timber notice of sale, map, contract, road plan, cruise data, precruise and cruise narrative, Forest Practices Application (FPA), Hydraulics Project Approval (HPA).

C. The sale preview packets may be obtained at no charge for individual sales by visiting the appropriate region office.

D. Timber sale contracts contain extensive terms and conditions that will be binding upon successful high bidders. Each bidder should carefully review all terms contained in the appropriate **DRAFT** timber sale contract prior to bidding on a sale, and should review the final contract prior to signing. **DRAFT** timber sale contracts are contained in the preview and presales packets and are available upon request at the respective region office.

E. Sales advertised in this book have not been approved by the Board of Natural Resources and are subject to the Board's approval before they will be sold. The Board meets and approves sales approximately six weeks prior to auction. All sales are subject to confirmation by the DNR under RCW 79.15.120.

F. The State does not guarantee the accuracy of any information contained herein pertaining to particular sales. Therefore, all prospective purchasers are expected to make their own independent inspections and appraisals prior to bidding.

G. If any conflict exists between the information in the Timber Notice of Sale, timber sale map, sale preview packets and that in the timber sale contract, the signed contract will prevail.

H. Timber sales are subject to the Washington State Forest Excise Tax (RCW Chapter 84.33).

I. Within 30 days of sale confirmation, the apparent high bidder will provide to the State the Performance Security specified on each Notice of Sale. The successful bidder also agrees to return a signed contract to the State within 30 days of confirmation. Failure to provide a signed contract to the state within 30 days of confirmation may result in a loss of bidder's rights to the products sold and forfeiture of initial deposit moneys.

J. Each DNR region office has information about sales offered in that region. For further information, contact the respective DNR region office. Region office addresses and telephone numbers appear on the back cover of this booklet.

K. The purchaser assumes the responsibility for any costs associated with extra maintenance or repair levied by a county for any county road used by the purchaser.

BIDDING PROCEDURES FOR TIMBER AUCTIONS (Continued)

Bidding Process

- A. All timber will be auctioned using the sealed bid method.
- B. Bids submitted on day of auction must be in the bid box at the specified auction location before 10:00 a.m. The respective DNR region office must receive mailed bids by 4:30 p.m., on the last business day before the auction. Bidders assume all risk for the method of delivery.
- C. The DNR has the right to reject bid forms that are completed incorrectly. *All bid forms must have an original signature on behalf of the person or entity submitting the bid, and must be on the form provided in this booklet or a photocopy thereof. Revised documents are not permissible.* Bidding instructions are on the back of the Sealed Bid Form. A bid deposit must be included in the sealed bid envelope unless using a Timber Sale Statewide Bid Bond.
- D. All bids must include the completed Sealed Bid Form and bid deposit.
- E. Bids will be opened in each respective region in the order in which sales appear in the Public Auction Sale of Timber book (alphabetically by county and by agreement number).
- F. If a tie bid occurs, the names of the tie bidders will be placed in a hat and the successful bidder will be determined by a drawing.
- G. The apparent high bidder on a particular sale will have the option of withdrawing additional sealed bids submitted for any remaining sales to be auctioned. The apparent high bidder must exercise this option within two minutes after the apparent high bidder is announced.

Auction Time and Location

Auctions will start at 10:00 a.m. and close at 4:00 p.m. on the date and at the location specified in each Timber Notice of Sale.

Bid Deposits

- A. Required bid deposits are listed on each Timber Notice of Sale.
 - B. Bid deposits must be in the form of cash, certified check, cashiers' check, money order or bid bond.
 - C. Bid bonds may be either a Timber Sale Statewide Bid Bond or a Timber Sale Per Sale Bid Bond.
 - D. All bid deposits shall be submitted by the person or entity submitting the bid and made payable to the Department of Natural Resources. **Third party deposits will not be accepted.**
-

Timber Sale Per Sale Bid Bonds

- A. The Per Sale Bid Bond shall guarantee payment of the bid deposit **within ten days of auction.**
- B. The balance between the bid bond and the Initial Deposit payment is due by 4:30 p.m., **on the day of auction.**
- C. Additional forms and instructions for a Per sale Bid Bond are available at any DNR region office.

Timber Sale Statewide Bid Bond

- A. Statewide Bid Bonds shall guarantee payment of the Initial Deposit on any statewide timber sale while the bond is in effect.
- B. The Statewide Bid Bond must be received by the Department of Natural Resources, Product Sales & Leasing Division, PO BOX 47016, Olympia, Washington, 98504-7016, ten days in advance of the auction date. The bond shall be in the amount of \$150,000.00.
- C. The bidder must supply a list of persons authorized to bid using the bond. Bid bonds are subject to approval by the Department of Natural Resources.
- D. Successful bidders using a Statewide Bid Bond must pay the total Initial Deposit payment (10 percent of the total bid price) **by 4:30 p.m. on the day of auction.**
- E. A Statewide Bid Bond cannot be used to secure the Initial Deposit payment due the day of auction.
- F. Additional forms and instructions for a statewide bid bond are available at any DNR region office.

Payments

The initial deposit for a sale is 10% of the total bid value as submitted by the apparent high bidder (25% if the bidder is a defaulter as defined under WAC 332-140-300) and never less than \$5,000.00 for lump sum sales. For Lump Sum sales appraised at less than \$5,000.00, the entire bid value is due on day of auction.

- a. Apparent high bidders using cash, certified check, cashiers' check or money order as a bid deposit must pay the total Initial Deposit amount by 4:30 p.m. on auction day.
- b. Apparent high bidders using a Timber Sale Per Sale Bid Bond as a bid deposit must pay the difference between the bid deposit and the total initial deposit by 4:30 p.m., on the day of auction. The bid bond amount must be replaced with a certified check, cashier's check, bank draft, cash, money order, or wire transfer within ten days of the auction.
- c. Apparent high bidders using a Timber Sale Statewide Bid Bond must pay the entire Initial Deposit amount by 4:30 p.m. on the day of auction.

Fees due on the day of sale must be paid by 4:30 p.m.

All payments must be in the form of a certified check, cashier's check, bank draft, cash, money order or wire transfer.

Eligibility to Bid

In order to bid on State timber sales you must be:

- 18 years of age (or have a co-signer who meets the eligibility requirements),
- Licensed to do business in the State of Washington,
- Eligible to bid on Export Restricted timber, and
- Capable of meeting all contract obligations.

Authorized Representatives

Companies may only use authorized representatives or company officers to bid on State sales, sign State documents or sign checks. A list of authorized representatives and their specific authorities must be submitted in writing to the Department of Natural Resources Product Sales & Leasing Division, PO BOX 47016, Olympia, Washington, 98504-7016, ten days in advance of the auction. A company owner or officer must sign this submittal.

State of Washington
Department of Natural Resources
Peter Goldmark, Commissioner of Public Lands

SEALED BID FORM

Sale Name _____ Agreement Number _____

_____ hereby submits the following bid for timber.
(Print full, legal company name)

(Street address, City, State, Zip Code) (Phone Number)

Weight Scale Sale Bid (Not Including Fees) \$ _____ / **Ton**

Scribner Scale Sale Bid (Not Including Fees) \$ _____ / **MBF**

BID DEPOSIT

Bid Deposit Amount: \$ _____

Bid Deposit Type:

- Cash, certified check, cashier's check, or money order
 Per Sale Bid Bond
 Statewide Bid Bond, Number _____

Within 30 days of confirmation date the successful bidder agrees to furnish Performance Security acceptable to the State in the amount specified on the Notice of Sale. Performance Security must guarantee performance of all provisions of the contract and payment of any damages caused by operations under the contract or resulting from the successful bidders' noncompliance with any rule or law.

Bidder's Warranty and Bid Signature

By signing and submitting this bid as an offer to purchase forest products from the State, the Bidder hereby warrants to the State that they have had an opportunity to fully inspect the sale area and the forest products being sold. Bidder further warrants to the State that they enter this bid based upon their own judgments of the value of the forest products, formed after their own examination and inspection of both the timber sale area and the forest products being sold. Bidder also warrants to the State that they enter this bid without any reliance upon the volume estimates, acreage, appraisals, pre-bid documentation, or any other representation by the Washington State Department of Natural Resources.

_____ Date _____
(Signature of Authorized Representative submitting this bid)

(Print **name and title** of Authorized Representative submitting this bid)

Note: all sales are subject to confirmation by the Commissioner of Public Lands (Refer 79.15.120)

Instructions for Completing Sealed Bid Form

All bids submitted for the purchase of forest products being sold by the Washington State Department of Natural Resources must have an original signature on behalf of the person or entity submitting the bid, and must be on the form provided in this booklet or a photocopy thereof. The DNR will not accept bids that are not signed, and will not accept bids that are not on the current, approved bid form. All appropriate blanks on bid form must be completed including the bid bond number if the bidder is relying upon a bid bond for bid deposit.

For more specific information, contact the appropriate region office.

In-Person Bids

- A. Sealed bids must be in auction box before 10:00 a.m. on the day of auction at the location specified in the Timber Notice of Sale.
 - B. Sealed bids must be submitted in an envelope with the name of the sale, the bidder's name and the contract number clearly written on the outside of the envelope. The full legal name and business address of the bidder must be inserted where indicated on the form, and must be on the bid bond and timber sale contract. The bid form must be signed by an authorized representative. When a bidder has more than one person authorized to bid, documentation of those persons with signature authority for bidding must accompany the bid or be on file at the region office. Sealed bid envelopes are available at all region offices. One bid per envelope.
 - C. Sealed bid envelopes **must** contain a completed bid form and a bid deposit.
 - D. Sealed bid envelopes **may** contain a check for the Initial Deposit amount and a check for fees.
-

Mailed Bids

- A. Bids that are mailed are required to have printed on the outside: "DO NOT OPEN UNTIL SALE DATE. SEALED BID ENCLOSED". The sealed bid envelope(s) will be enclosed inside the mailed-in envelope. Mailed bids must be submitted in an envelope with the name of the sale, the bidder's name and the agreement number clearly written on the outside of the envelope. The full legal name and business address of the bidder must be inserted where indicated on the form, and must be the same on the bid bond and timber sale contract. The Sealed Bid Form must be signed by an authorized representative. When a bidder has more than one person authorized to bid, then documentation of those persons with signature authority for bidding must accompany the bid or be on file at the region office. Mail-in envelopes are available at all region offices. One bid per mailed-in envelope.
 - B. Bids that are mailed will be accepted up to 4:30 p.m. the last business day before the auction by the region office in which the sale is located. Bidders assume the risk for the method of delivery. The DNR assumes no responsibility for any delays caused by any delivery service.
 - C. Sealed bid envelopes **must** contain a completed bid form and a bid deposit.
 - D. Sealed bid envelopes **may** contain a check for the Initial Deposit amount and a check for fees.
-

Initial Deposit:

Lump Sum Sales - Initial Deposit must equal 10% of the total bid submitted.
(25% if the bidder is a defaulter as defined under WAC 332-140-300)

Weight Scale Sales - Initial Deposit must equal 10% of the bid per ton multiplied by the total sale estimated tonnage. (25% if the bidder is a defaulter as defined under WAC 332-140-300)

Scribner MBF Scale Sales - Initial Deposit must equal 10% of the bid per MBF multiplied by the total sale MBF. (25% if the bidder is a defaulter as defined under WAC 332-140-300)

**State of Washington

Peter Goldmark, Commissioner of Public Lands**

STATEWIDE BID BOND

Bond Number _____

_____ of _____,
(Principal's Name) (City, State)

hereinafter called PRINCIPAL, and _____ hereinafter called SURETY,

a corporation organized under the laws of the State of _____, and authorized to transact surety business in the State of Washington, as SURETY, are held and firmly bound jointly and severally to the State of Washington, Department of Natural Resources, hereinafter called the STATE, in the sum of \$150,000.00 Dollars, lawful money of the United States of America. The PRINCIPAL binds itself, its heirs, executors, administrators, successors, and assigns, and the SURETY binds itself, its successors, and assigns, all jointly and severally.

This bond shall be governed by the laws of the State of Washington. In the event of a lawsuit involving this bond, a venue shall be proper only in Thurston County Superior Court.

Signed, sealed and dated this _____ day of _____, ____.
(month) (year)

This statewide bid bond may be used for bidding between the following dates:

Starting:

Ending:

It Is Hereby Understood and Agreed:

If PRINCIPAL is an apparent high bidder, PRINCIPAL shall before 4:30 p.m., on day of sale, pay to the STATE the amount of the initial deposit in the form of a certified check, cashier's check, bank draft, cash or money order, then this agreement shall be void for the sale on which the payment is made; otherwise, it will remain in force.

SURETY will make payment to the STATE within ten days after demand by the STATE if the PRINCIPAL shall fail to make timely payment as described above.

The SURETY may cancel this bond by sending a written notice to the STATE, not less than forty-five days before a cancellation date; liability shall terminate as to acts or omissions of the PRINCIPAL that occur after the cancellation date.

The PRINCIPAL and the SURETY executed this bond on the date first mentioned.

| Enter one or more preferred log lengths for each log length range below. For Ponderosa Pine saw log sorts, enter one or more preferred log lengths for at least two log length ranges listed below. | Bidder's Preferred Log Lengths (Log lengths exclude trim) Minimum of 4 log lengths required. Minimum 2 required for Ponderosa Pine. |
|---|---|
| 12 ft. through 20 ft. | |
| 22 ft. through 30 ft. | |
| 32 ft. through 40 ft. | |

Minimum log trim: _____ inches.

Additional Log or Pole Length Information:

To provide additional preferred cutting information you may attach a separate sheet or "Cutting card".

Log Delivery Information:

1) Designate the point of delivery and address (must be a street address)

(Location Name)

(Street Address)

(City, State and Zip)

2) Designate the state approved Weighing and Scaling facility closest to the point of delivery.

(Location Name)

(Street Address)

(City, State and Zip)

3) Driving instructions:

Write a brief driving instruction narrative describing the most likely or usual and accustomed Haul Route used by trucks delivering logs from this sale area to your designated point of delivery above: (i.e. hwy 12 west, to I-5 north, to hwy 6 west, to Boistfort Rd. south)

Final contract award is contingent upon the State's haul cost analysis. Actual haul route may vary and is subject to change at the State's discretion. Additional terms or conditions requested by the bidder on or attached to the Log Sort Sealed Bid or Supplemental Information Forms are informational only and non-binding.

Instructions for Completing the Log Sort Sealed Bid and Supplemental Information Forms.

All bids submitted for the purchase of forest products being sold by the Washington State Department of Natural Resources must have an original signature on behalf of the person or entity submitting the bid, and must be on the form(s) provided in this booklet or a photocopy thereof. The DNR will not accept bids that are not signed, and will not accept bids that are not on the current, approved bid form. All appropriate blanks including Agreement Number, Sort Number, Bid amount (per mbf or ton as appropriate for the sort), Bid deposit amount and type. Signatures and date on bid form must be completed including the bid bond number if bidder is relying upon a bid bond for bid deposit.

Bids may not be accepted if a completed '**Log Sort Sealed Bid Supplemental Information Form**' is not included with the approved '**Log Sort Sealed Bid Form**'.

For more specific information, contact the appropriate region office.

In-Person Bids

- A. Sealed bids must be in auction box or auction envelope before 10:00 a.m. on the day of sale at the location specified in the notice of sale.
- B. Sealed bids must be submitted in an envelope with the name of the sale, the bidder's name and the contract agreement number clearly written on the outside of the envelope. The full legal name and business address of the bidder must be inserted where indicated on the form, and must be the same as the name on the bid bond and timber sale contract. The bid form must be signed by an authorized person. When a bidder has more than one person authorized to bid, then documentation of those persons with signature authority for bidding must accompany the bid or be on file at the region office. Sealed bid envelopes are available at all region offices. One bid per envelope, please.
- C. Sealed bid envelopes must contain the following:
 1. A completed Log Sort Sealed Bid form;
 2. A completed Supplemental Information form; and
 3. A bid deposit

Mailed Bids

- A. Mail-in bid envelopes are required to have printed on the outside: "DO NOT OPEN UNTIL SALE DATE. SEALED BID ENCLOSED." The sealed bid envelope(s) will be enclosed inside the mailed-in envelope. Mailed bids must be submitted in an envelope with the name of the sale, the bidder's name and the agreement number clearly written on the outside of the envelope. The full legal name and business address of the bidder must be inserted where indicated on the form, and must be the same on the bid bond and timber sale contract. The bid form must be signed by an authorized person. When a bidder has more than one person authorized to bid, then documentation of those persons with signature authority for bidding must accompany the bid or be on file at the region office. Mail-in envelopes are available at all region offices. One bid per mailed-in envelope, please.
- B. Mail-in or otherwise delivered bids will be accepted up to 4:30 p.m. the last business day before the auction by the region office in which the sale is located. Bidders assume the risk for the method of delivery they chose. The DNR assumes no responsibility for any delays caused by any delivery service.
- C. Sealed bid envelopes must contain the following:
 1. A completed '**Log Sort Sealed Bid Form**';
 2. A completed '**Log Sort Sealed Bid Supplemental Information Form**' and;
 3. A bid deposit

MINIMUM BID: \$466,000.00 **BID METHOD:** Sealed Bids

PERFORMANCE SECURITY: \$93,200.00 **SALE TYPE:** Lump Sum

EXPIRATION DATE: December 31, 2010 **ALLOCATION:** Export Restricted

BID DEPOSIT: \$46,600.00 or Bid Bond. Said deposit shall constitute an opening bid at the appraised price.

HARVEST METHOD: Shovel and Track skidder. Shovel and tracked skidder harvesting equipment shall be restricted to slopes of 35% or less, and during dry soil conditions. A detailed felling and yarding plan shall be required prior to any harvest activities and approved in writing by the Contract Administrator. All pole timber to be removed in the unit(s) must be marked

TIMBER NOTICE OF SALE

by the Purchaser and approved by the Contract Administrator prior to falling. Purchaser shall follow the harvesting and marking guidelines in Schedules B, C, and L. Falling and Yarding will not be permitted from October 31 to May 1 unless authorized in writing by the Contract Administrator.

ROADS: 28.51 stations of optional construction. 240.23 stations of required pre-haul maintenance. 28.51 stations of road deactivation. Rock for construction and reconstruction under this contract may be obtained at no cost to the Purchaser from the N-1000 quarry located in Section 16, Township 13 North, Range 05 West, W.M. Any damage to any road resulting from any harvest operations will be repaired at the Purchasers expense unless authorized by the Contract Administrator. Road construction will not be permitted from September 30 to May 15 unless authorized in writing by the Contract Administrator.

ACREAGE DETERMINATION

CRUISE METHOD: The sale acres were determined by dot grid. Units #1 and #4 were cruised using one-tenth acre fixed plots, Units #2 and #5 were 100% cruised, and Unit #3 was strip cruised covering 30% of the unit. Harvesting activities are estimated to be 100% ground-based harvesting.

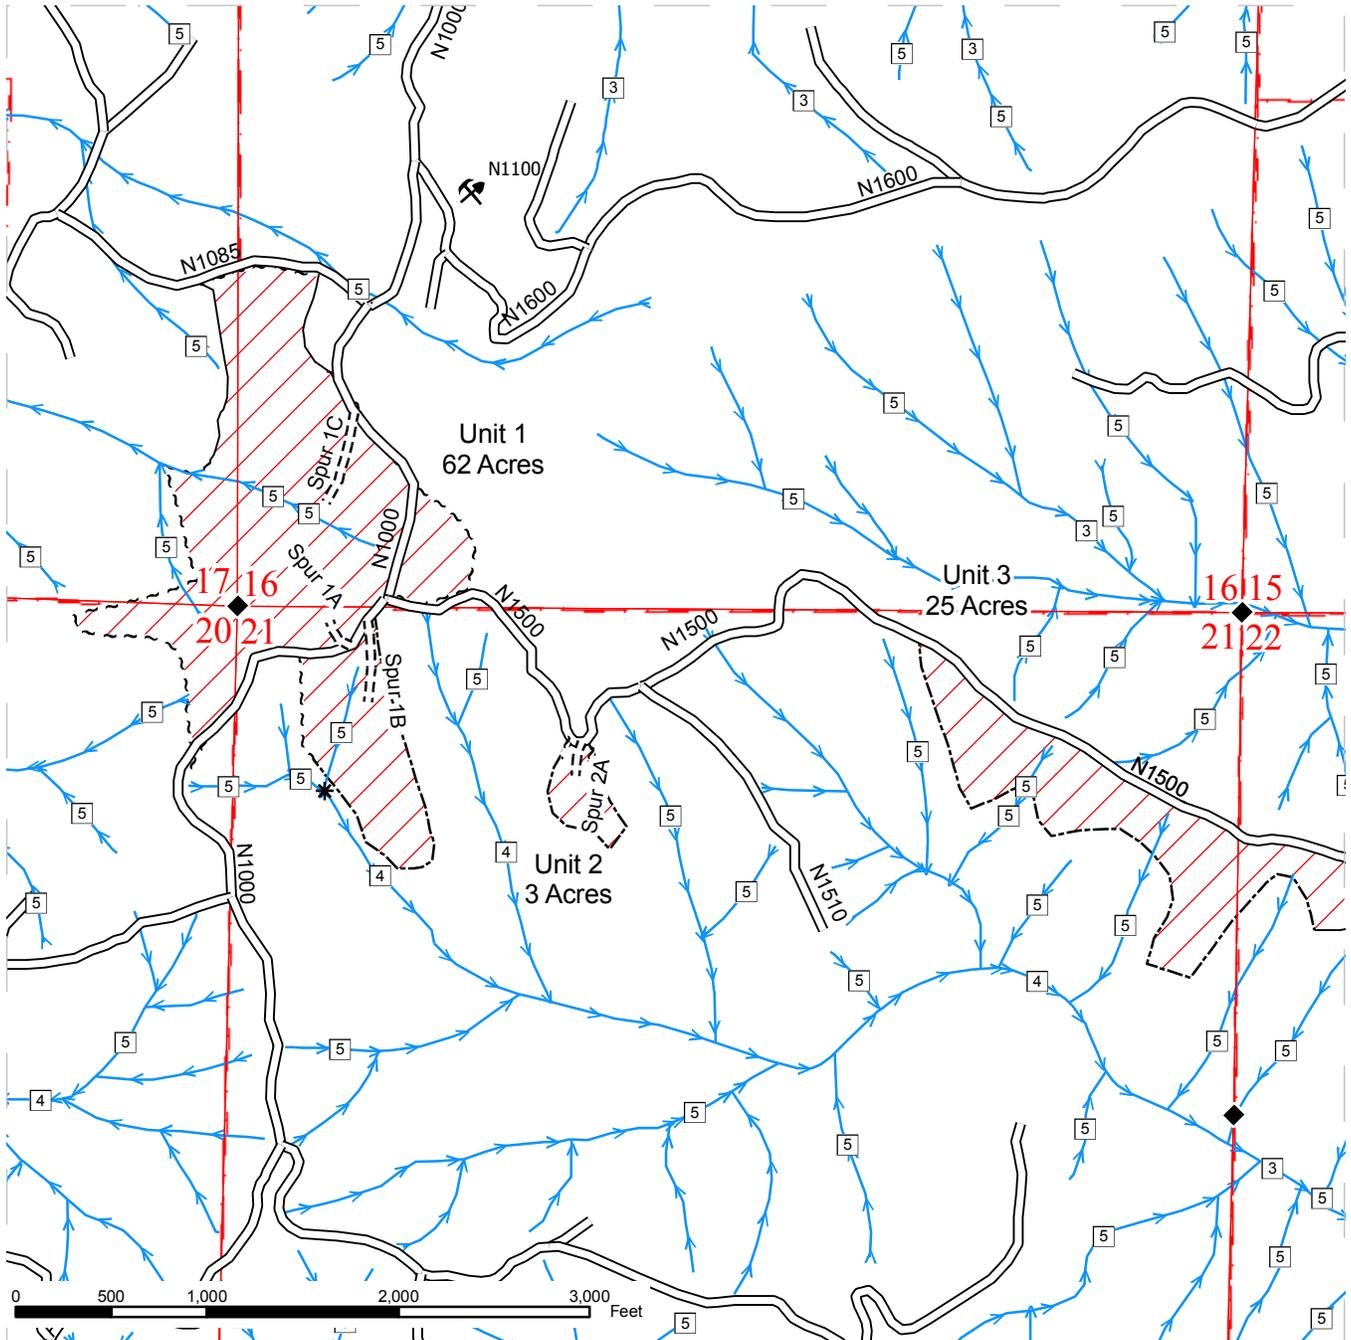

FEES: \$12,389.00 is due on day of sale. \$9.00 per MBF is due upon removal. These are in addition to the bid price.

SPECIAL REMARKS: Gates are locked with PCP1-1 locks. Keys for this lock are available for check-out at the Pacific Cascade Region Office in Castle Rock. See maps for gate locations. There is approximately 15 MBF of 2 saw mini-peelers and 4 MBF of 3 saw mini-peelers.

MINIMUM BID: \$584,000.00 **BID METHOD:** Sealed Bids

PERFORMANCE SECURITY: \$100,000.00 **SALE TYPE:** Lump Sum

EXPIRATION DATE: September 30, 2011 **ALLOCATION:** Export Restricted

BID DEPOSIT: \$58,400.00 or Bid Bond. Said deposit shall constitute an opening bid at the appraised price.

HARVEST METHOD: Cable and ground based harvesting equipment. Ground based harvesting equipment shall be restricted to 35% slopes and less, and during dry soil conditions. See clause H-140 and Schedule L for further harvest requirements. A detailed felling and yarding plan shall be required prior to any harvest activities and approved in writing by the Contract Administrator. Yarding may be suspended at the discretion of the Contract Administrator when soil rutting exceeds four inches as measured from the natural ground line when there is potential for damage to any public resource. If yarding is suspended, the Contract Administrator must be assured that future harvest operations will not potentially damage any public resource. To reduce damage to the soil, the Contract Administrator may require water bars to be constructed and grass seed, hay or straw to be placed on exposed soils. Lead end suspension required on all cable settings. Shovel Yarding will

TIMBER NOTICE OF SALE

not be permitted from September 30 to May 1 unless authorized in writing by the Contract Administrator.

ROADS:

84.42 stations of optional construction. 245.52 stations of required pre-haul maintenance. Rock is available at no charge to the Purchaser from the P&E Ridge Pit, located in the SE¼, Sec. 24, T13N, R07W, W.M. A maximum of 368 cubic yards of 2 1/2 inch minus crushed rock may be removed from the Squally Pit Stockpile, for the purposes of road construction, located in the NE ¼, Sec. 29, T 13N, R06W, W.M. Any damage to any road resulting from any harvest operations will be repaired at the Purchasers expense unless authorized by the Contract Administrator. Road construction will not be permitted from September 30 to May 1 unless authorized in writing by the Contract Administrator.

ACREAGE DETERMINATION

CRUISE METHOD:

The sale acres were determined by GPS. The sale area was cruised using a variable plot cruise method. Harvesting activities are estimated to be approximately 40% ground-based and 60% cable harvesting.

FEES:

\$62,831.50 is due on day of sale. \$9.00 per MBF is due upon removal. These are in addition to the bid price.

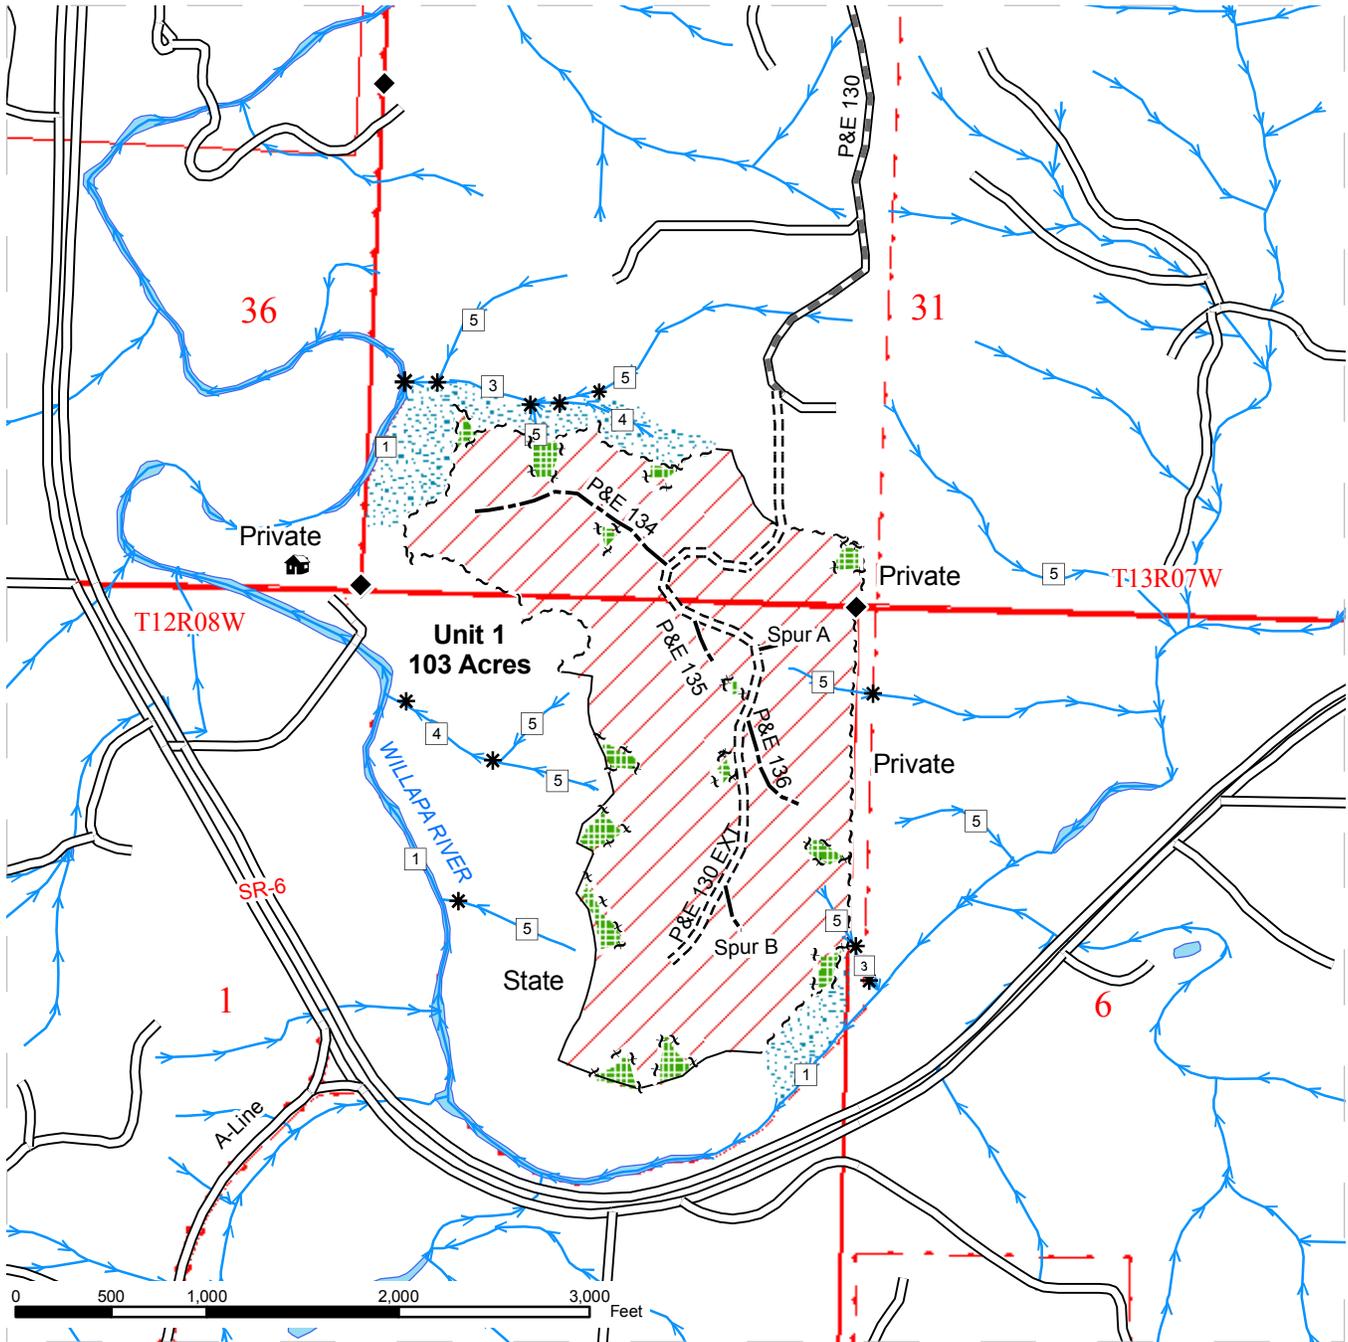

SPECIAL REMARKS:

Any timber harvest within two tree lengths of the BPA Powerline Right-of-Way will require at least a one week advance notice to the BPA Line Maintenance office in Olympia. Within shovel logging areas, the shovel operator shall break up concentrations of logging debris greater than 10 feet by 10 feet to allow exposure of natural forest soils to ensure proper reforestation. If Purchaser tailholds on State property, tailhold straps shall be used when tailholding on live trees to minimize damage, and approved in writing by the Contract Administrator. See driving map for gate locations. Gate keys may be obtained from the Pacific Cascade Region office.

MINIMUM BID: \$266,000.00 **BID METHOD:** Sealed Bids

PERFORMANCE SECURITY: \$53,200.00 **SALE TYPE:** Lump Sum

EXPIRATION DATE: September 30, 2010 **ALLOCATION:** Export Restricted

BID DEPOSIT: \$26,600.00 or Bid Bond. Said deposit shall constitute an opening bid at the appraised price.

HARVEST METHOD: Cable; cable or shovel on slopes 25% or less.

No operations will be allowed in the northern most 200 feet of the harvest unit from one hour before official sunrise to two hours after official sunrise and one hour before official sunset to one hour after official sunset from April 1 to August 31. This requirement shall not be waived. Falling and Yarding will not be permitted from November 1 to March 31 unless authorized in writing by the Contract Administrator (THIS PERTAINS TO GROUND-BASED EQUIPMENT ONLY) to reduce soil damage and erosion.

ROADS: 25.34 stations of required construction.

Development of a proposed gravel source (Quark Gravel Pit) at station 5+45 of the SK-126 Road. Development will involve clearing, stripping, and processing rock to generate approximately 2,515 cubic yards of gravel ballast rock.

TIMBER NOTICE OF SALE

Development of an existing hardrock source (Quark Hardrock Pit) at station 61+77 of the SK-121 Road. Development will involve drilling, shooting, and processing rock to generate approximately 20 cubic yards of riprap.

Road construction and the hauling of rock will not be permitted from November 1 to March 31 unless authorized in writing by the Contract Administrator to reduce soil damage and siltation. The hauling of forest products will not be permitted from November 1 to March 31 unless authorized in writing by the Contract Administrator to reduce soil damage and siltation.

ACREAGE DETERMINATION

CRUISE METHOD: Acres determined by GPS traverse. 47.1 acres gross. 1.2 acres deducted for green tree retention clumps and 8.3 acres deducted for WMZ/RMZ areas. 37.6 acres net. Cruised using variable plot method. Expansion factor used is 54.45. Sighting height is 4.5 feet. Grid size plot spacing is 200 x 200 feet in Unit #1. Plot ratio cruise count is 1:0 in Unit #1. 38 plots were taken in Unit #1.

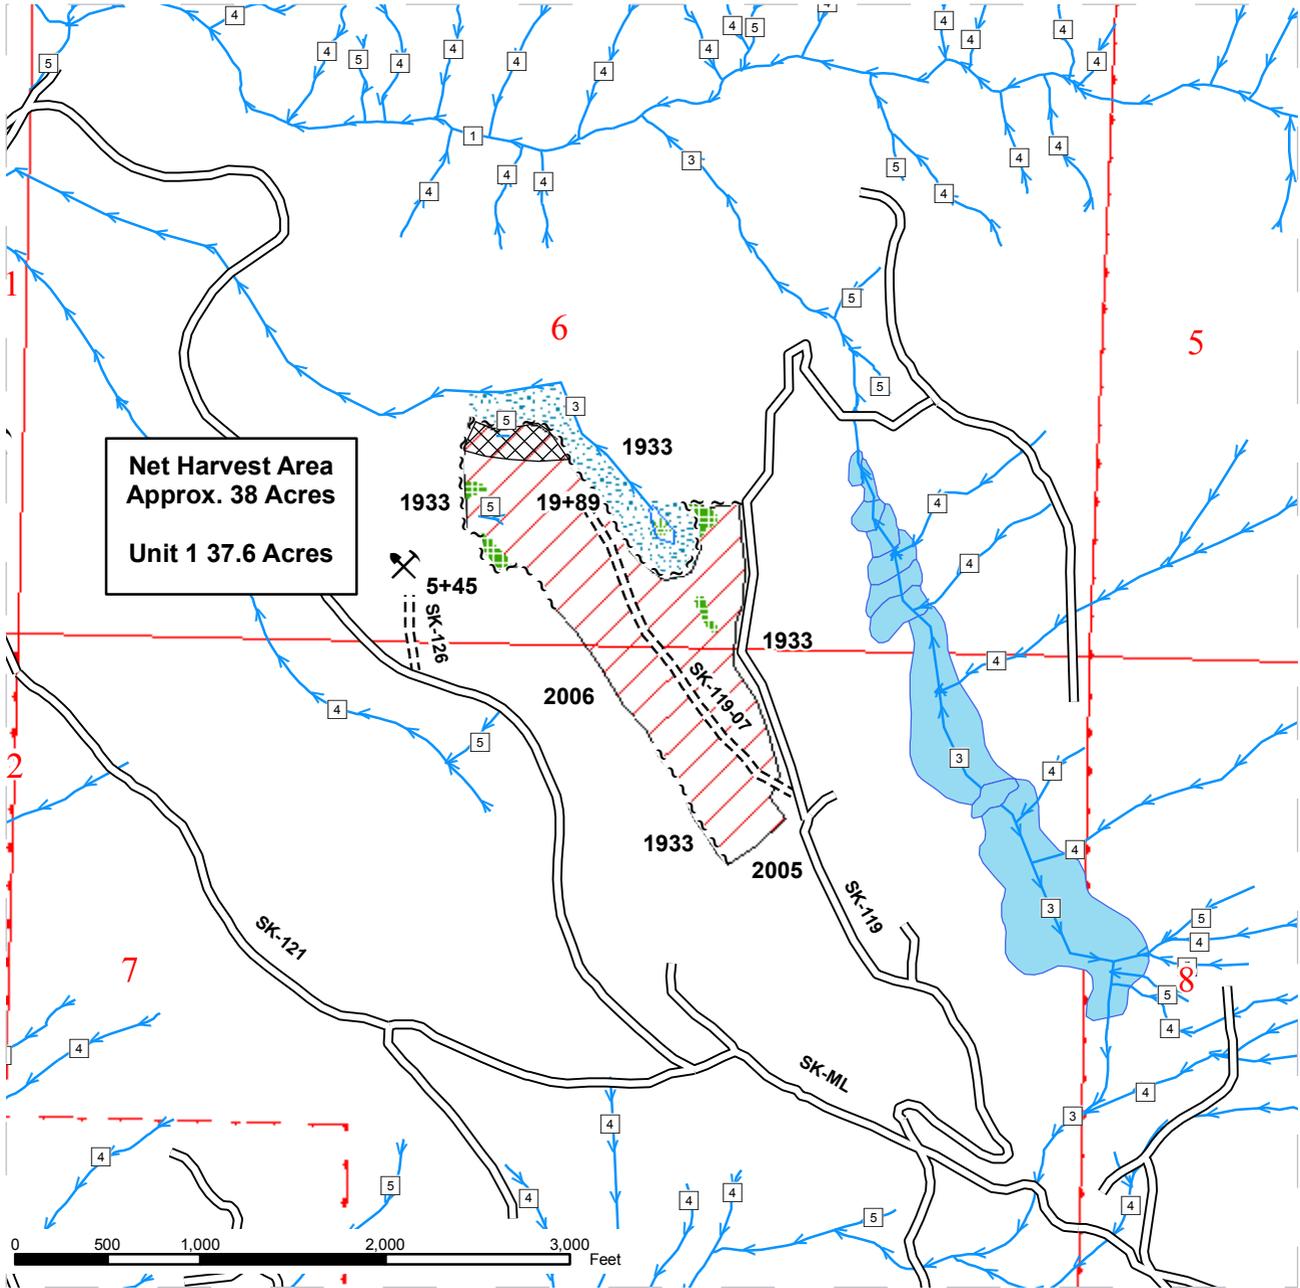

FEES: \$26,248.25 is due on day of sale. \$9.00 per MBF is due upon removal. These are in addition to the bid price.

SPECIAL REMARKS: None.

MINIMUM BID: \$526,000.00

BID METHOD: Sealed Bids

**PERFORMANCE
SECURITY:**

\$100,000.00

SALE TYPE: Lump Sum

EXPIRATION DATE: September 30, 2011

ALLOCATION: Export Restricted

BID DEPOSIT: \$52,600.00 or Bid Bond. Said deposit shall constitute an opening bid at the appraised price.

HARVEST METHOD: Cable; cable or shovel on slopes 35% or less. Falling and Yarding will not be permitted from November 1 to March 31 unless authorized in writing by the Contract Administrator (THIS PERTAINS TO GROUND-BASED EQUIPMENT ONLY) to reduce soil damage and erosion.

ROADS: 15.82 stations of required construction. 14.57 stations of optional construction. 50.42 stations of existing road to be abandoned. 14.57 stations of road to be abandoned if built.

TIMBER NOTICE OF SALE

Development of an existing hardrock source (MU-43 Hardrock Pit) at station 229+00 of the MU-ML Road will involve drilling, shooting, and processing rock to generate riprap and 3-inch-minus ballast. This rock is available at no cost on State land.

Development of an existing hardrock source (MU-52 Hardrock Pit) at station 276+25 of the MU-ML Road will involve drilling, shooting, and processing rock to generate riprap and 3-inch-minus ballast. This rock is available at no cost on State land.

This project is estimated to need approximately 58 cubic yards of riprap and approximately 2,855 cubic yards of 3-inch-minus ballast.

Road construction, road abandonment, and the hauling of rock will not be permitted from November 1 to March 31 unless authorized in writing by the Contract Administrator to reduce soil damage and siltation. The hauling of forest products will not be permitted from November 1 to March 31 unless authorized in writing by the Contract Administrator to reduce soil damage and siltation.

ACREAGE DETERMINATION

CRUISE METHOD: Acres determined by GPS traverse. 77.6 acres gross. 10.9 acres deducted for green tree retention clumps, RMZ areas, and existing roads. 66.7 acres net. Cruised using variable plot method. Expansion factor used is 62.5 in Unit #1 and 54.45 in Unit #2. Sighting height is 4.5 feet. Grid size plot spacing is 320 x 200 feet in Unit #1; and 200 x 200 feet in Unit #2. Plot ratio cruise count is 1:1 in Units #1 and #2. 34 plots were taken in Unit #1, and 4 plots taken in Unit #2, for a total of 38 plots.

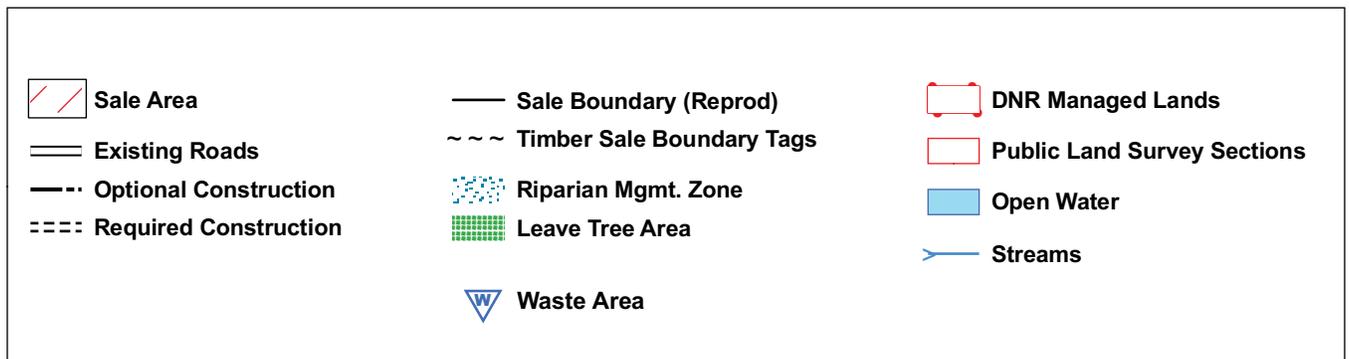

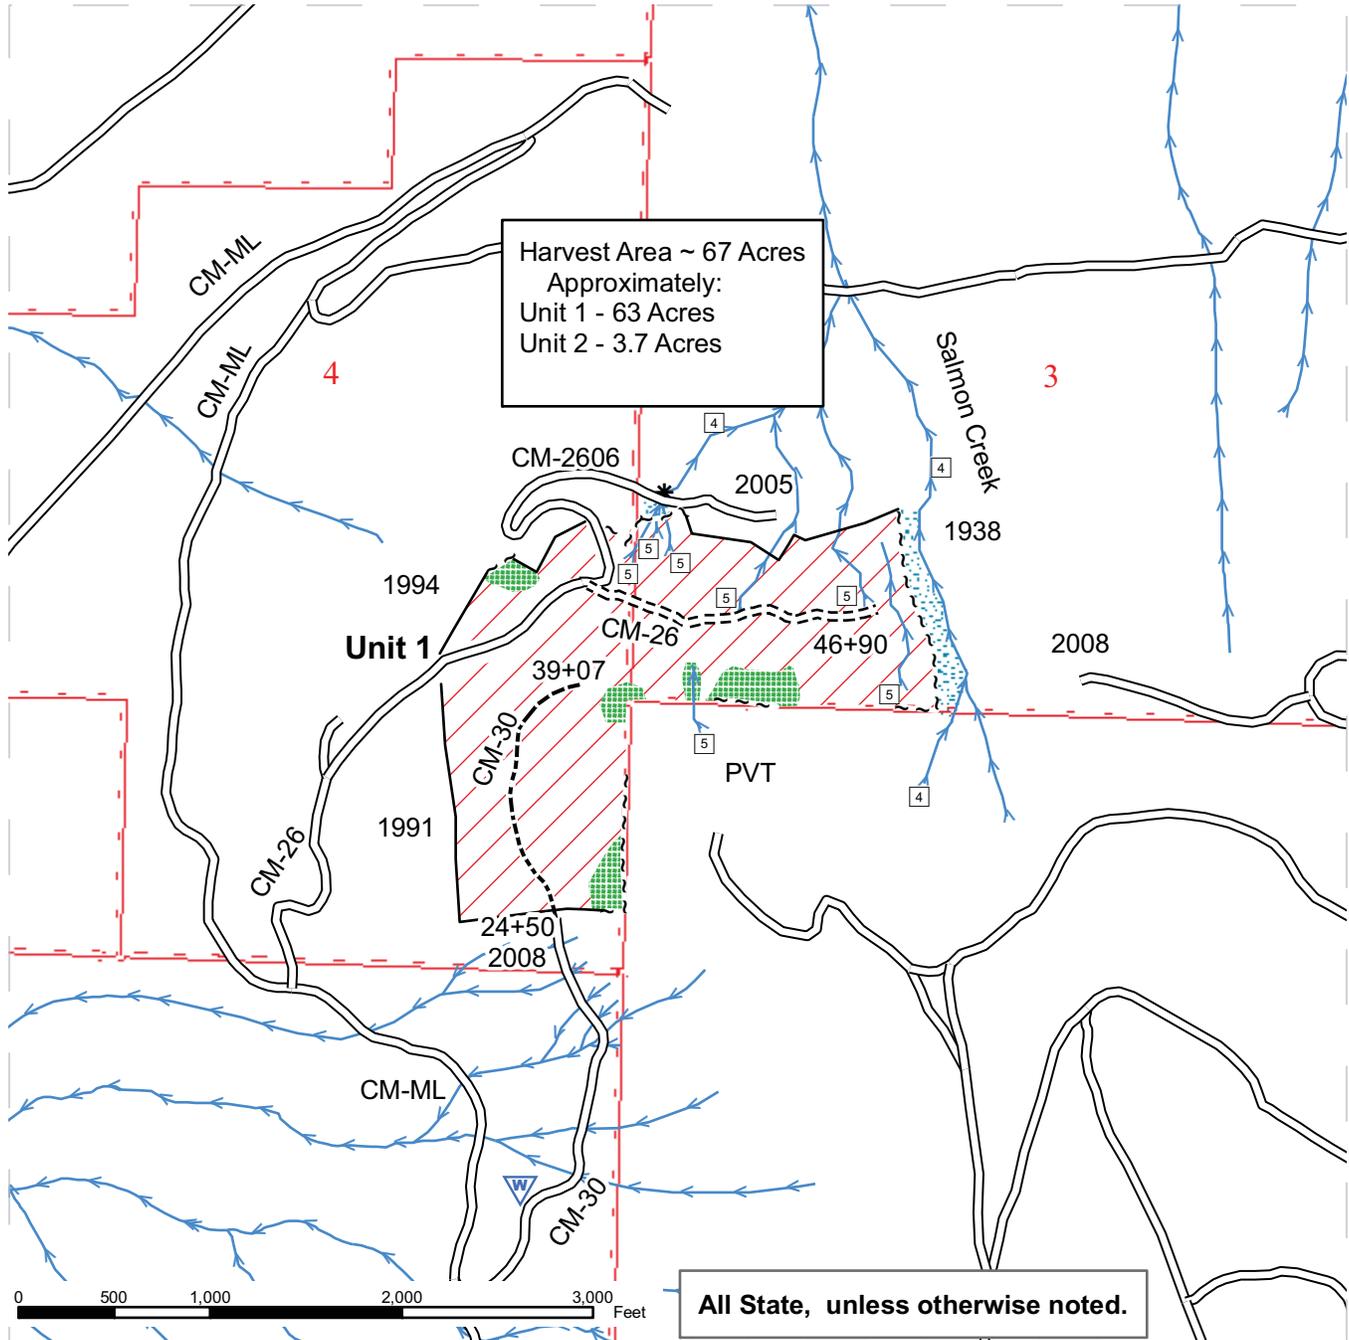

FEES: \$41,035.25 is due on day of sale. \$9.00 per MBF is due upon removal. These are in addition to the bid price.

SPECIAL REMARKS: None.

MINIMUM BID: \$107/MBF (est. value \$659,000.00) **BID METHOD:** Sealed Bids

PERFORMANCE SECURITY: \$100,000.00 **SALE TYPE:** MBF Scale

EXPIRATION DATE: October 31, 2011 **ALLOCATION:** Export Restricted

BIDDABLE SPECIES: Douglas fir

BID DEPOSIT: \$65,900.00 or Bid Bond. Said deposit shall constitute an opening bid at the appraised price.

HARVEST METHOD: Cable and ground-based harvesting equipment with ground-based harvesting equipment being restricted to slopes of 35% or less. See Clause H-140 and Schedule L for further harvest specifications. No harvest activities will be permitted in Units #2A, #2D, and #2E between March 1 and August 31 to comply with HCP requirements. A detailed felling and yarding plan shall be required prior to any harvest activities and approved in writing by the Contract Administrator. Ground Based Yarding will not be permitted from October 1 to June 30 unless authorized in writing by the Contract Administrator.

ROADS: 49.06 stations of required reconstruction. 79.85 stations of optional construction. 7.89 stations of optional reconstruction. 172.93 stations of required pre-haul maintenance.

TIMBER NOTICE OF SALE

446.69 stations of required post-haul maintenance. 156.58 stations of required road abandonment. 60.52 stations of required road deactivation. Rock for construction, reconstruction, and pre-haul maintenance under this contract may be obtained from the following sources on State land at no charge to the Purchaser: the CG-2060 Rock Pit, located in the SE ¼ of Sec. 12, T3N R6E, W.M.; the CG-2002 Rock Pit, located in the SW ¼ of Sec. 12, T3N R6E, W.M.; the CG-2060 Stockpile, located in the SE ¼ of Sec. 12, T3N R6E, W.M.; the CG-2050 Rock Pit, located in the NW ¼ of Sec. 17, T3N R6E, W.M. Any damage to any road resulting from any harvest operations will be repaired at the Purchasers expense unless authorized by the Contract Administrator. Road construction will not be permitted from October 16 to May 14 unless authorized in writing by the Contract Administrator. The hauling of forest products will not be permitted from October 1 to June 30 unless authorized in writing by the Contract Administrator.

ACREAGE DETERMINATION

CRUISE METHOD: The sale acres were determined by GPS and traverse. The sale area was cruised using a variable plot cruise method. Harvesting activities are estimated to be approximately 80% ground-based and 20% cable harvesting.

FEES: \$85,873.00 is due on day of sale. \$9.00 per MBF is due upon removal. These are in addition to the bid price.

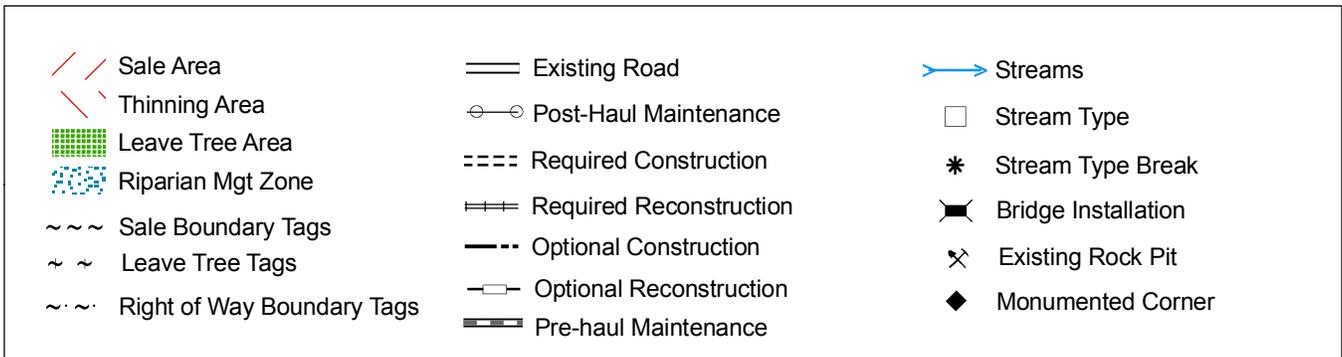

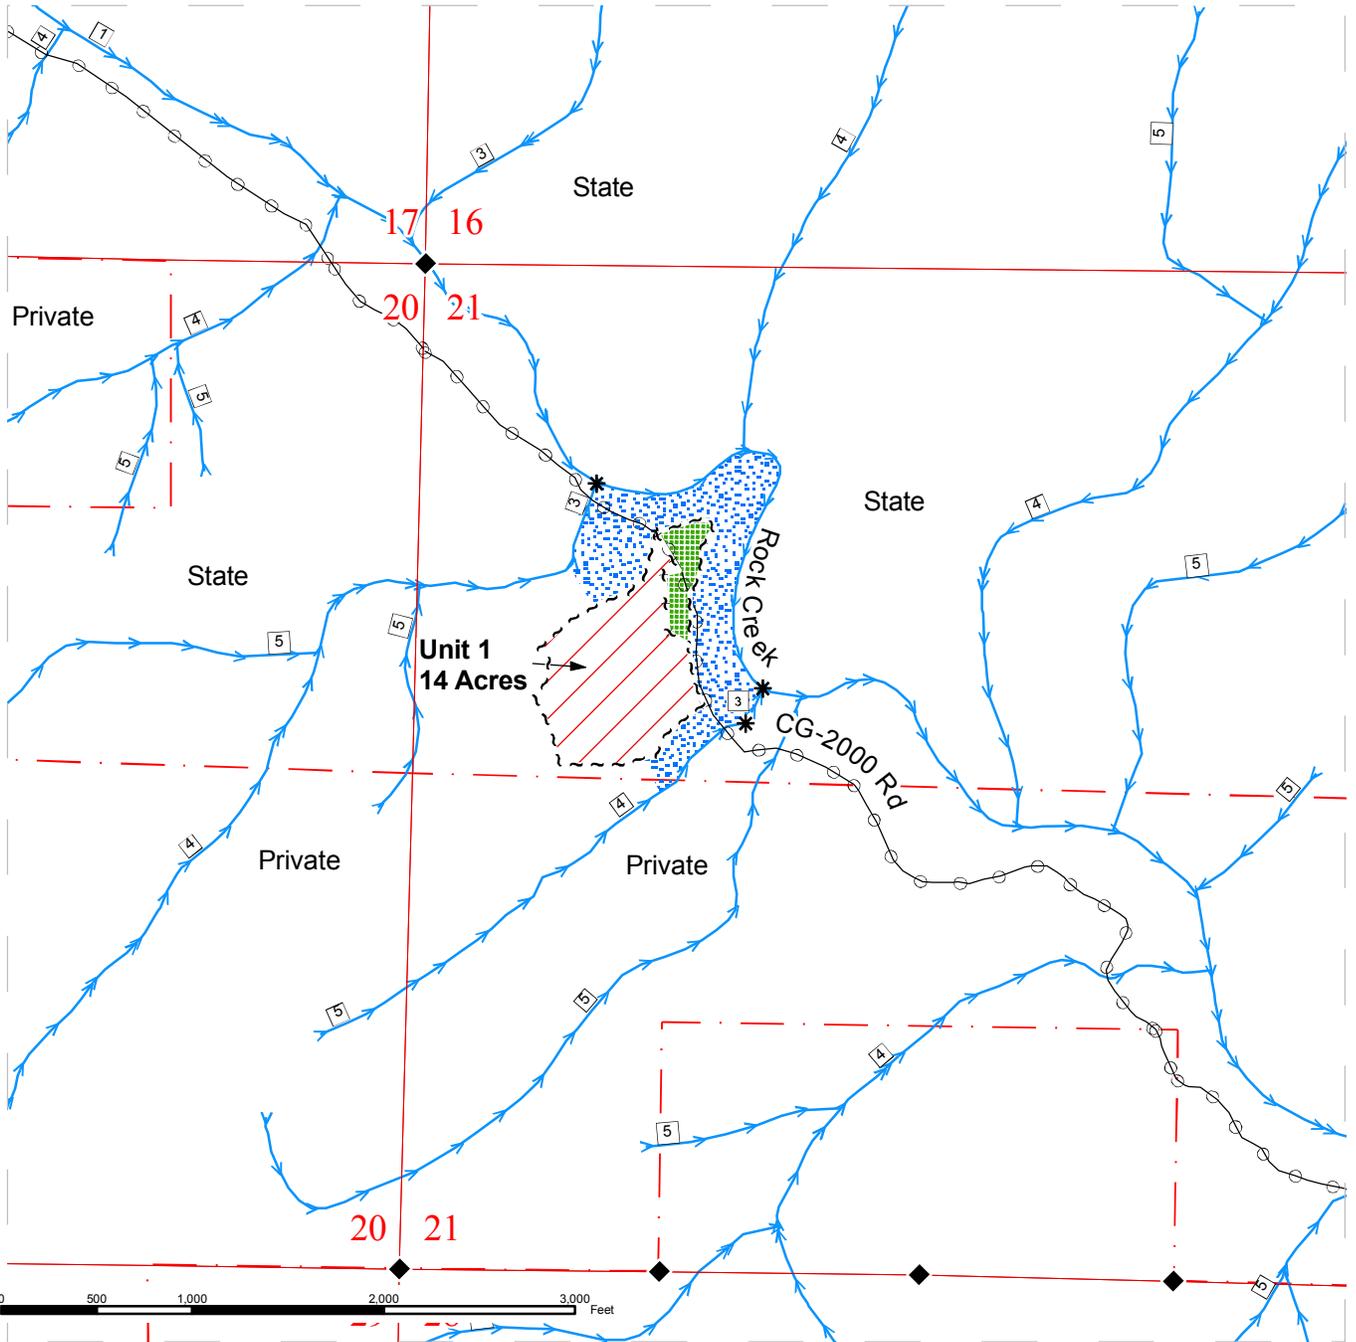

SPECIAL REMARKS: Units 1 and 3 through 12 are variable retention harvests and Units 2 and 2A through 2D are variable density thinnings. If Purchaser chooses to tailhold on private property, Purchaser shall obtain permit(s) and assumes responsibility for all costs associated with permit(s). Purchaser must provide the State with a copy of the executed permit(s) or a letter from the private entity indicating that a satisfactory tailhold permit(s) has been consummated between Purchaser and private entity. If Spur B is constructed, the road must be constructed, utilized for hauling, and then abandoned, all in the same operating season.

MINIMUM BID: \$716,000.00

BID METHOD: Sealed Bids

PERFORMANCE SECURITY: \$100,000.00

SALE TYPE: Lump Sum

EXPIRATION DATE: September 30, 2012

ALLOCATION: Export Restricted

TIMBER NOTICE OF SALE

- BID DEPOSIT:** \$71,600.00 or Bid Bond. Said deposit shall constitute an opening bid at the appraised price.
- HARVEST METHOD:** Cable; cable or shovel on slopes 25% or less. In addition, a tracked skidder may be used for yarding within the WMZ thinning area during dry periods upon written approval by the Contract Administrator. Cutting and yarding within the thinning units will not be permitted during the bark slippage season unless authorized in writing by the Contract Administrator. This season is estimated to run from April 1- July 1 but will vary dependent on weather conditions. If permission is granted to operate during the bark slippage season the purchaser will be required to provide a plan outlining mitigation measures. Falling and Yarding will not be permitted from November 1 to March 31 unless authorized in writing by the Contract Administrator (THIS PERTAINS TO GROUND-BASED EQUIPMENT ONLY) to reduce soil damage and erosion
- ROADS:** 106.19 stations of required construction. 90.20 stations of required reconstruction. 109.52 stations of optional construction. 109.52 stations of road to be abandoned if built.
- Development of an existing gravel source (MC-0507 Gravel Pit) at station 36+00 of the MC-05 Road will involve clearing, stripping and processing rock to generate riprap and gravel ballast. This rock is available at no cost on State land.
- Development of an existing hardrock source (MC-3102 Hardrock Pit) at station 12+00 of the MC-31 Road will involve clearing, stripping, drilling, shooting, and processing rock to generate riprap. This rock is available at no cost on State land.
- This project is estimated to need approximately 324 cubic yards of riprap and approximately 25,035 cubic yards of 3-inch-minus ballast rock
- Road construction, road reconstruction, road abandonment, and the hauling of rock will not be permitted from November 1 to March 31 unless authorized in writing by the Contract Administrator to reduce soil damage and siltation. The hauling of forest products will not be permitted from November 1 to March 31 unless authorized in writing by the Contract Administrator to reduce soil damage and siltation.
- ACREAGE DETERMINATION**
- CRUISE METHOD:** Acres determined by GPS traverse. 272.1 acres gross. 9.7 acres deducted for green tree retention clumps. 262.4 acres net. Cruised using variable plot method. Expansion factor used is 40.00 for the WMZ; and 54.45 for Units #1, #2, #3, #4, and ROW. Sighting height is 4.5 feet. Grid size plot spacing is 400 x 200 feet in Units #1, #2, #3, #4; 800 feet apart in ROW; and 330 x 330 in the WMZ. Plot ratio cruise count is 1:1 in Unit #1; 1:2 in Unit #2; and cruised all in ROW and WMZ. 52 plots were taken in Units #1 and 3; 58 plots taken in Units #2 and 4; 9 plots taken in ROW; and 14 plots taken in WMZ, for a total of 133 plots.
- FEES:** \$126,723.00 is due on day of sale. \$9.00 per MBF is due upon removal. These are in addition to the bid price.
- SPECIAL REMARKS:** A Region Biologist will survey for goshawk activity during March and April, prior to road building and harvest activity associated with Unit #1. If goshawk nesting is confirmed, road building, felling and yarding will be prohibited 1050 feet from the nest from April 1-July 15, and within 650 feet of the nest from July 16-August 31. The purchaser will be notified by May 1 if there are any timing restrictions.

Schedule B
Worthy Adversary Riparian Thinning Prescription

Unit 4 WMZ Prescription:

All western hemlock and Douglas-fir between 8-16 inches DBH will be cut. Cut all hardwoods. Leave all western redcedar except where yarding corridors are necessary for removal of prescription timber. Timber is located behind trees marked with blue special management area tags along the WMZ boundary. Trees that meet the prescription AND have a blue tag are take trees.

Special Thinning Conditions:

In areas where thinning is not necessary, i.e., prescription is met, do not put in yarding corridors or skid trails. These areas must be identified and agreed upon in advance with the Contract Administrator.

Ground yarding corridors:

Corridors are limited to 14 feet wide (including rub trees) and no less than 70 feet apart as measured from the center of the corridor. Where possible, corridors should be located in a manner to minimize the damage to or removal of leave trees. No yarding will take place on slopes greater than 25%.

Cable corridors: (This WMZ thinning is intended to be a ground-based harvest.)

Landings will be located to provide for parallel yarding corridors whenever possible. Corridors will be limited to 12-feet including rub trees. Corridors will be at least 100 feet apart when parallel as measured from the center of the corridors. When radial yarding corridors are required from a central landing, the distance between yarding corridors must be no closer than 100 feet where the corridor leaves the unit as measured from the center of the corridors. Where possible, corridors should be located in a manner to minimize the damage to or removal of leave trees. When corridors are field located, only leave trees within 3 – 5 feet of the center of the corridor should be removed prior to yarding. Following completion of yarding of each corridor, rub trees within 6 feet of the center of the corridor may be felled and yarded to the landing. It is not required to remove all leave trees from the 12-foot corridor.

BARK SLIPPAGE SEASON:

Cutting and yarding within the thinning units will not be permitted during the bark slippage season unless authorized in writing by the Contract Administrator. This season is estimated to run from April 1- July 1 but will vary dependent on weather conditions. If permission is granted to operate during the bark slippage season the purchaser will be required to provide a plan outlining mitigation measures.

Compartments for assessment of damage:

All WMZs where thinning will take place will be considered one damage unit per timber sale unit.

Certification of Fallers and Yarder Operators
(additional requirements beyond those outlined in H-011)

The Contract Administrator and faller/harvester operator will jointly review the take tree selection criteria as outlined in Schedule B of the sale contract.

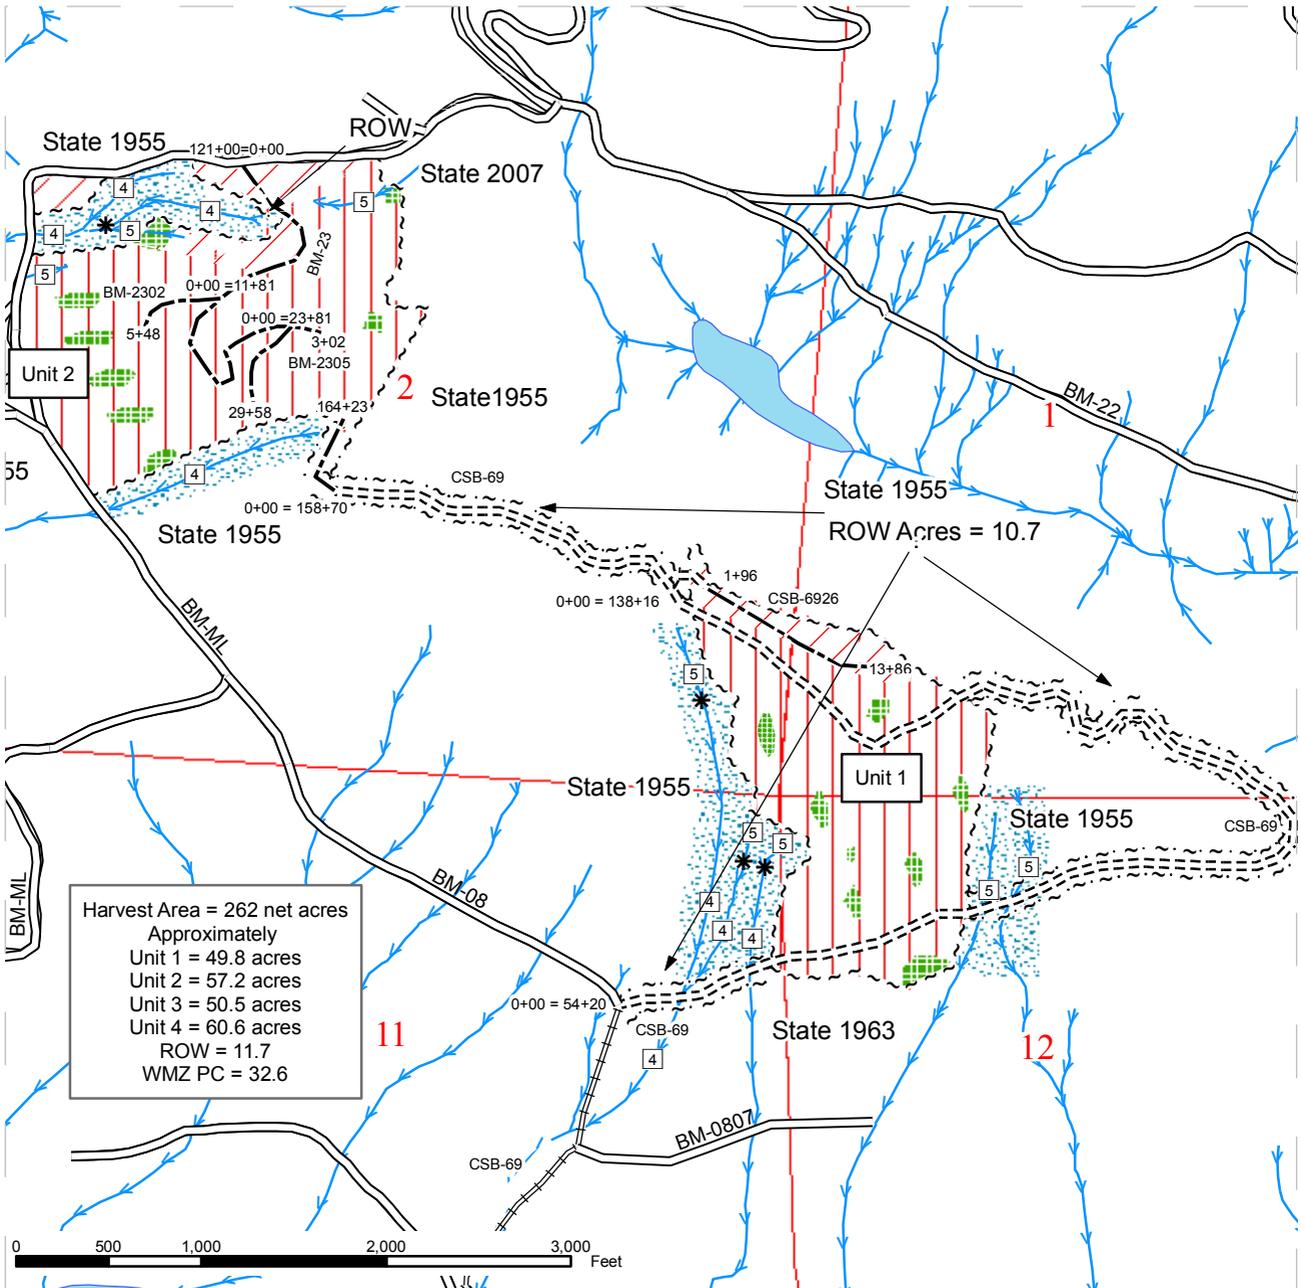

In conjunction with the Contract Administrator, the faller/harvest operator will mark a designated area as a test plot within the sale area boundary. Satisfactory thinning of the test plot completes the certification process.

Certifications will be issued to individuals when they demonstrate to the Contract Administrator their ability to perform within the requirements set forth in the contract.

MINIMUM BID: \$762,000.00

BID METHOD: Sealed Bids

PERFORMANCE

SECURITY: \$100,000.00

SALE TYPE: Lump Sum

EXPIRATION DATE: September 30, 2011

ALLOCATION: Export Restricted

BID DEPOSIT: \$76,200.00 or Bid Bond. Said deposit shall constitute an opening bid at the appraised price.

HARVEST METHOD: Cable; cable or shovel on slopes 35% or less; in addition ground-based equipment or skidders may be used on designated skid trails (the JC-3409 and JC-3417) only. Falling and Yarding will not be permitted from November 1 to March 31 unless authorized in

TIMBER NOTICE OF SALE

writing by the Contract Administrator (THIS PERTAINS TO GROUND-BASED EQUIPMENT ONLY) to reduce soil damage and erosion.

ROADS:

17.17 stations of required construction. 572.02 stations of required reconstruction. 76.00 stations of optional construction. 76.00 stations of road to be abandoned if built.

Approximately 42,857 feet of road brushing are part of the Road Plan.

Development of an existing hardrock source (JC-0608 Hardrock Pit) at station 42+34 of the JC-06 Road will involve clearing, stripping, drilling, shooting, and processing rock. This rock is available at no cost on State land.

Development of an existing hardrock source (JC-2928-06 Hardrock Pit) at station 34+35 of the JC-2928 Road will involve clearing, stripping, drilling, shooting, and processing rock. This rock is available at no cost on State land.

Development of an existing hardrock source (JC-5003 Hardrock Pit) at station 13+98 of the JC-50 Road will involve clearing, stripping, drilling, shooting, and processing rock. This rock is available at no cost on State land.

This proposal is estimated to need 9,816 cubic yards of 3-inch-minus ballast rock from the JC-0608 and JC-5003 Hardrock Pits and approximately 5,197 cubic yards of 6-inch-minus ballast rock from the JC-2928-06 Hardrock Pit; and approximately 564 cubic yards of riprap.

Road construction, road reconstruction, road abandonment, and the hauling of rock will not be permitted from November 1 to March 31 unless authorized in writing by the Contract Administrator to reduce soil damage and siltation. The hauling of forest products will not be permitted from November 1 to March 31 unless authorized in writing by the Contract Administrator to reduce soil damage and siltation.

ACREAGE DETERMINATION

CRUISE METHOD: Acres determined by GPS traverse. 194.7 acres gross. 12 acres deducted for RMZ/WMZ, 8.7 acres deducted for green tree retention clumps, 4.4 acres deducted for existing road acres, and 2.0 acres deducted for rock outcrop area. 167.2 acres net. Cruised using variable plot method. Expansion factor used is 54.45. Sighting height is 4.5 feet. Grid size plot spacing is 336 x 200 feet in Unit #1. Plot ratio cruise count is 1:1 in Unit #1. Expansion factor used is 54.45. Sighting height is 4.5 feet. Grid size plot spacing is 420 x 200 feet in Unit #2. Plot ratio cruise count is 1:1 in Unit #2. 55 plots were taken in Unit #1, and 40 plots taken in Unit #2, for a total of 95 plots.

FEES:

\$115,950.75 is due on day of sale. \$9.00 per MBF is due upon removal. These are in addition to the bid price.

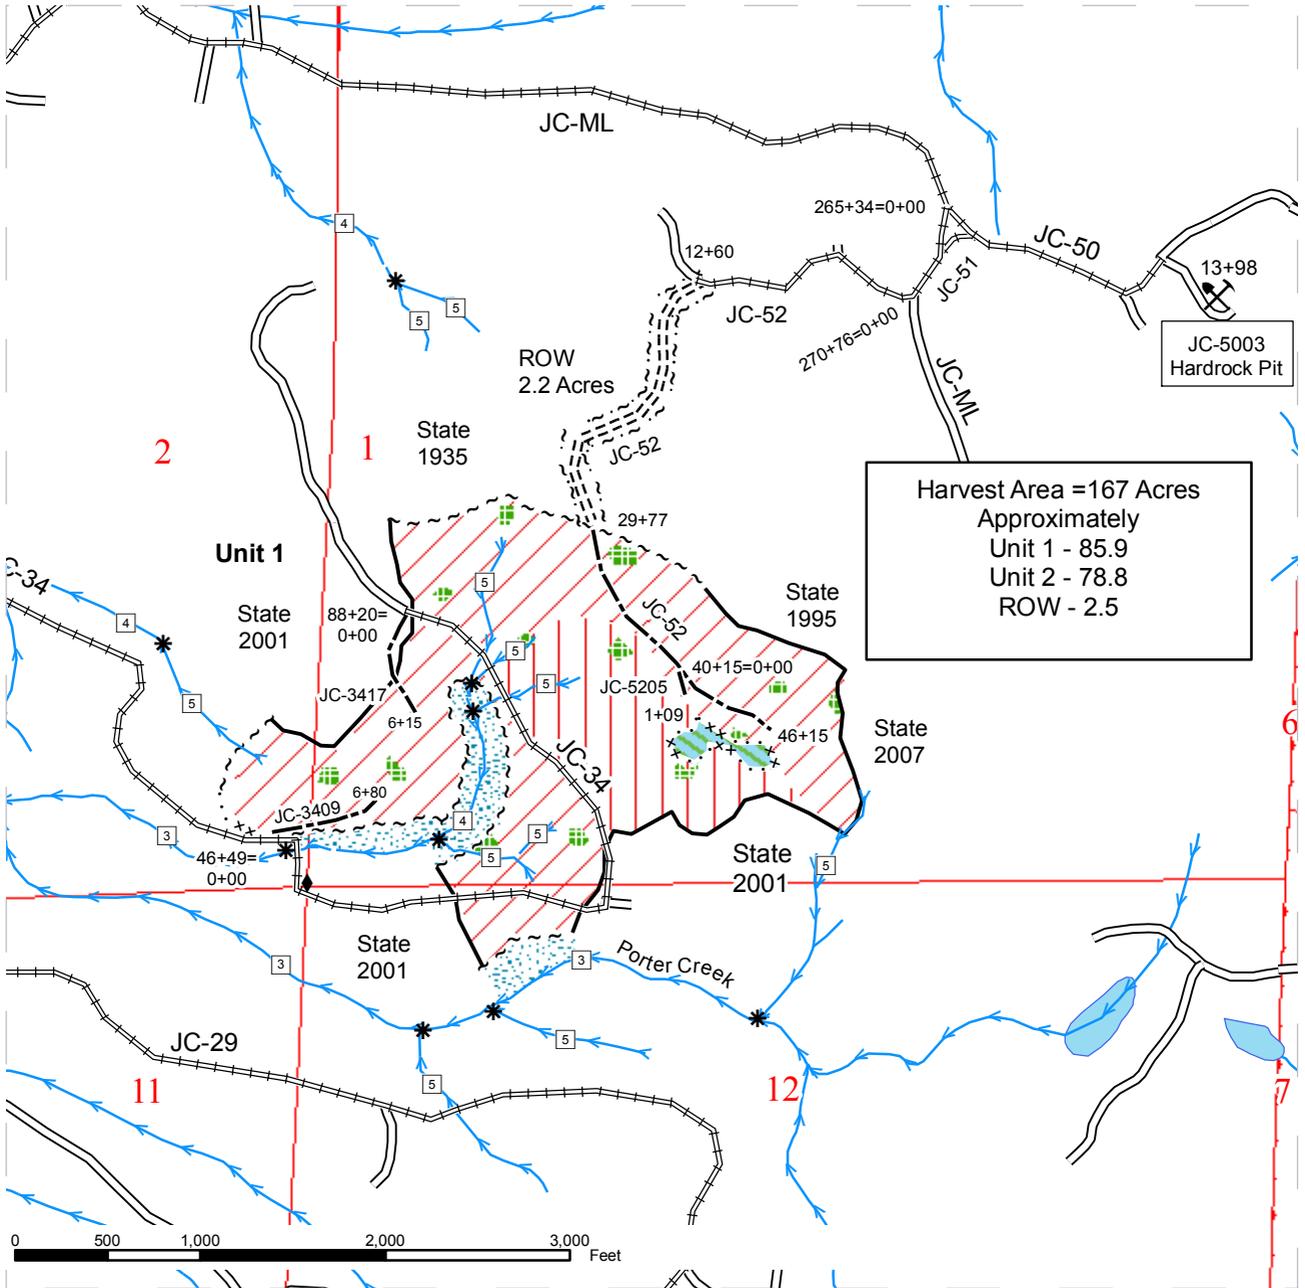

SPECIAL REMARKS:

- 1) If the purchaser elects to log during the dry season, the following road locations: JC-3409 and JC-3417 may be used as designated skid roads following Schedule A specifications. However, prior written approval by the Contract Administrator is required.
- 2) Trees marked with single blue special management tags and orange paint along rock pit and SW corner of Unit #1 and around the rock outcrops in the east portion of Unit #1 are take trees.

TIMBER NOTICE OF SALE

SALE NAME: REITERATE

AGREEMENT NO: 30-083380

AUCTION: June 24, 2009 starting at 10:00 a.m., **COUNTY:** Snohomish
Northwest Region Office, Sedro Woolley, WA

SALE LOCATION: Sale located approximately 6 miles south of Granite Falls, WA.

PRODUCTS SOLD AND SALE AREA:

All timber bounded by white timber sale boundary tags and the EK-ML Road, except trees marked with blue paint on the bole and root collar, forest products tagged out with yellow leave tree tags, forest products tagged out by a single blue special management tags and cedar snags, dead and down cedar trees, logs and stumps in in Unit #1.

All timber bounded by white timber sale boundary tags, the EK-ML and PD-ML roads, except forest products tagged out with yellow leave tree tags, forest products tagged out by a single blue special management tags and cedar snags, dead and down cedar trees, logs and stumps in in Unit #2.

All timber as described I for removal in Schedule B within the WMZ and designated RMZs located in Units #1 and 2.

All timber bounded by orange right of way tags. The above described products on part(s) of Sections 16 and 17 all in Township 29 North, Range 8 East, Sections 1 and 12 all in Township 29 North, Range 7 East, W.M., containing 137 acres, more or less.

CERTIFICATION: This sale is certified under the Sustainable Forestry Initiative Standard (cert no: 164041)

MINIMUM BID: \$135/MBF (est. value \$498,000.00) **BID METHOD:** Sealed Bids

PERFORMANCE SECURITY: \$ 99,600.00 **SALE TYPE:** MBF Scale

EXPIRATION DATE: September 30, 2011 **ALLOCATION:** Export Restricted

BIDDABLE SPECIES: Douglas fir

BID DEPOSIT: \$49,800.00 or Bid Bond. Said deposit shall constitute an opening bid at the appraised price.

HARVEST METHOD: Cable; cable or shovel on slopes 25% or less. Cutting and yarding within the thinning units will not be permitted during the bark slippage season unless authorized in writing

TIMBER NOTICE OF SALE

by the Contract Administrator. This season is estimated to run from April 1- July 1 but will vary dependent on weather conditions. If permission is granted to operate during the bark slippage season the purchaser will be required to provide a plan outlining mitigation measures. Falling and Yarding will not be permitted from November 1 to March 31 unless authorized in writing by the Contract Administrator (THIS PERTAINS TO GROUND-BASED EQUIPMENT ONLY) to reduce soil damage and erosion.

ROADS:

28.54 stations of required construction. 457.81 stations of required reconstruction. 53.68 stations of optional construction. 16.60 stations of existing road to be abandoned. 53.68 stations of road to be abandoned if built.

Reconstruction of the PD-ML from 10+00 to 10+60 (construction of a rolling dip) shall be completed by November ,1, 2009.

Construction of the PD-02 from 0+00 to 12+62 shall be completed by March 31, 2010.

Development of an existing hardrock source at station 12+50 of the PD-044 Road and at station 37+00 of the EK-6505 Road will involve clearing, stripping, drilling, shooting, and processing rock to generate approximately 272 cubic yards of rip and approximately 11,640 cubic yards of 3-inch-minus ballast rock. This rock is available at no cost on State land.

Road construction, road reconstruction, road abandonment, and the hauling of rock will not be permitted from November 1 to March 31 unless authorized in writing by the Contract Administrator to reduce soil damage and siltation. The hauling of forest products will not be permitted from November 1 to March 31 unless authorized in writing by the Contract Administrator to reduce soil damage and siltation.

ACREAGE DETERMINATION

CRUISE METHOD:

Acres determined by GPS traverse. 141.2 acres gross. 4.3 acres deducted for green tree retention. 136.9 acres net. Cruised using variable plot method. Expansion factor used is 54.45 in Unit #1, 2 and WMZ 1; 40.00 in WMZ 2. Sighting height is 4.5 feet. Grid size plot spacing is 400 x 200 feet in all Units. Plot ratio cruise count is 1:1 in Units #1, 2 and WMZ 1; cruised all in WMZ 2. 30 plots were taken in Unit #1, 29 plots taken in Unit #2, 6 plots taken in WMZ 1 and 5 plots taken in WMZ 2 for a total of 70 plots.

FEES:

\$79,765.00 is due on day of sale. \$9.00 per MBF is due upon removal. These are in addition to the bid price.

SPECIAL REMARKS:

- 1.) A single blue mangement tag is the boundary of the WMZ and RMZ thinning areas.
- 2.) Double blue special management tags demarcate an equipment limitation zone.

Schedule B
Reiterate WMZ & RMZ Thinning Prescription

RMZ/WMZ PRESCRIPTION:

Unit 1 RMZ and WMZ Prescription

All western hemlock between 8-17 inches dbh and all western redcedar between 8-10 inches dbh will be cut. Cut all hardwoods. Leave all Douglas-fir except where yarding corridors are necessary for removal of prescription timber. Timber is located behind trees marked with blue special management area tags along WMZ and RMZ boundaries. Trees that meet the prescription and have a blue tag are take trees.

Unit 2 RMZ and WMZ Prescription

All western hemlock between 6-13 inches dbh and all western redcedar between 6-10 inches dbh will be cut. Cut all hardwoods. Leave all Douglas-fir except where yarding corridors are necessary for removal of prescription timber. Timber is located behind trees marked with blue special management area tags along WMZ and RMZ boundaries. Trees that meet the prescription and have a blue tag are take trees.

DOWN WOOD AND SNAG RECRUITMENT:

Three prescription trees per acre (35 total trees to be evenly distributed within the 2 units) are to be directionally felled toward the nearest stream and left on the ground for down woody debris. The trees to be felled shall be chosen from within 25 feet of the inner zone boundary and felled toward the stream where feasible. The Purchaser must obtain written approval from the Contract Administrator prior to felling these trees. This approval shall specify what method will be used to ensure that these trees are not removed from prescription trees to be harvested. It may be necessary for a faller to hand fell these trees after all other prescription trees have been removed.

Two trees per acre (23 total trees to be evenly distributed within the 2 units) will be left for future snag and DWD recruitment. These trees are from the largest diameter class of the prescription trees.

SPECIAL THINNING CONDITIONS:

In areas where thinning is not necessary, i.e., prescription is met, do not put in yarding corridors or skid trails. These areas must be identified and agreed upon in advance with the Contract Administrator.

BARK SLIPPAGE SEASON:

Cutting and yarding within the thinning units will not be permitted during the bark slippage season unless authorized in writing by the Contract Administrator. This season is estimated to run from April 1- July 1 but will vary dependent on weather conditions. If permission is granted

to operate during the bark slippage season the purchaser will be required to provide a plan outlining mitigation measures.

GROUND YARDING CORRIDORS:

Corridors are limited to 14 feet wide (including rub trees) and no less than 70 feet apart as measured from the center of the corridor. Where possible, corridors should be located in a manner to minimize the damage to or removal of leave trees. No yarding will take place on slopes greater than 25%.

CABLE CORRIDORS:

Landings will be located to provide for parallel yarding corridors whenever possible. Corridors will be limited to 12-feet including rub trees. Corridors will be at least 100 feet apart when parallel as measured from the center of the corridors. When radial yarding corridors are required from a central landing, the distance between yarding corridors must be no closer than 100 feet where the corridor leaves the unit as measured from the center of the corridors. Where possible, corridors should be located in a manner to minimize the damage to or removal of leave trees. When corridors are field located, only leave trees within 3 – 5 feet of the center of the corridor should be removed prior to yarding. Following completion of yarding of each corridor, rub trees within 6 feet of the center of the corridor may be felled and yarded to the landing. It is not required to remove all leave trees from the 12-foot corridor.

COMPARTMENTS FOR ASSESSMENT OF DAMAGE: (Compartments for assessment of damage per contract clauses H-012 and D-040)

All WMZ/RMZs where thinning will take place will be considered one compartment per each timber sale unit.

CERTIFICATION OF FALLERS AND YARDER OPERATORS:

(Additional requirements beyond those outlined in H-011)

The Contract Administrator and faller/harvester operator will jointly review the take tree selection criteria as outlined in Schedule B of the sale contract.

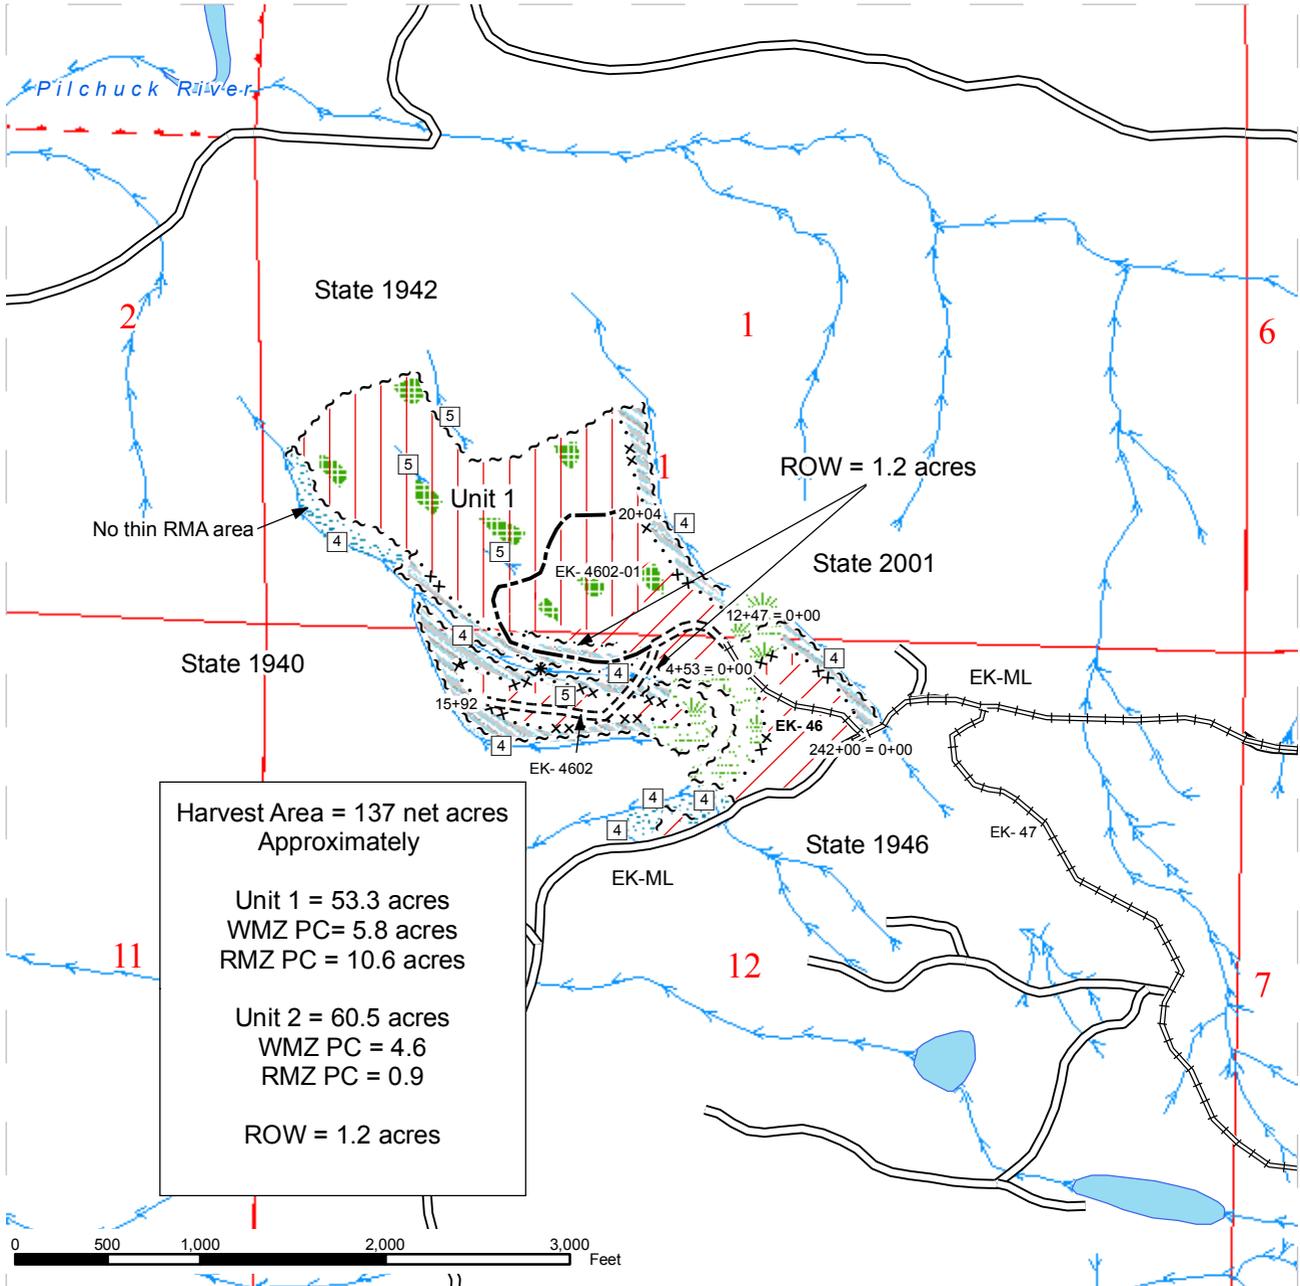

In conjunction with the Contract Administrator, the faller/harvest operator will mark a designated area as a test plot within the sale area boundary. Satisfactory thinning of the test plot completes the certification process.

Certifications will be issued to individuals when they demonstrate to the Contract Administrator their ability to perform within the requirements set forth in the contract.

MINIMUM BID: \$326,000.00 **BID METHOD:** Sealed Bids

PERFORMANCE SECURITY: \$65,200.00 **SALE TYPE:** Lump Sum

EXPIRATION DATE: September 30, 2010 **ALLOCATION:** Export Restricted

BID DEPOSIT: \$32,600.00 or Bid Bond. Said deposit shall constitute an opening bid at the appraised price.

HARVEST METHOD: Cable; cable or shovel on slopes 35% or less, except for the harvest area south of the Fry Creek Main Line to the southern boundary shall not be harvested with ground-based equipment. Falling and Yarding will not be permitted from November 1 to March 31 unless authorized in writing by the Contract Administrator (THIS PERTAINS TO GROUND-BASED EQUIPMENT ONLY) to reduce soil damage and erosion.

ROADS: 21.92 stations of required construction. 237.01 stations of required reconstruction. 10.16 stations of optional construction. 10.16 stations of road to be abandoned if built. 7.75 stations of road to be inactivated.

Development of an existing hardrock source (FC-4103 Hardrock Pit) at station 19+76 of the FC-41 Road will involve clearing, stripping, drilling, shooting, and processing rock to generate approximately 115 cubic yards of riprap and approximately 2,747 cubic yards of 3-inch-minus ballast. This rock is available at no cost on State land.

TIMBER NOTICE OF SALE

Road construction, road reconstruction, road abandonment, and the hauling of rock will not be permitted from November 1 to March 31 unless authorized in writing by the Contract Administrator to reduce soil damage and siltation. The hauling of forest products will not be permitted from November 1 to March 31 unless authorized in writing by the Contract Administrator to reduce soil damage and siltation.

ACREAGE DETERMINATION

CRUISE METHOD: Acres determined by GPS traverse. 83.1 acres gross. 37.7 acres deducted for green tree retention clumps, RMZ, WMZ, and existing road areas. 45.4 acres net. Cruised using variable plot method. Expansion factor used is 40.00 for RA, and 54.45 for all other species. Sighting height is 4.5 feet. Grid size plot spacing is 200 x 200 feet in the Unit. Plot ratio cruise count is 1:1 in the Unit. 46 plots were taken in the Unit. The right-of-way volume was added to the unit volume.

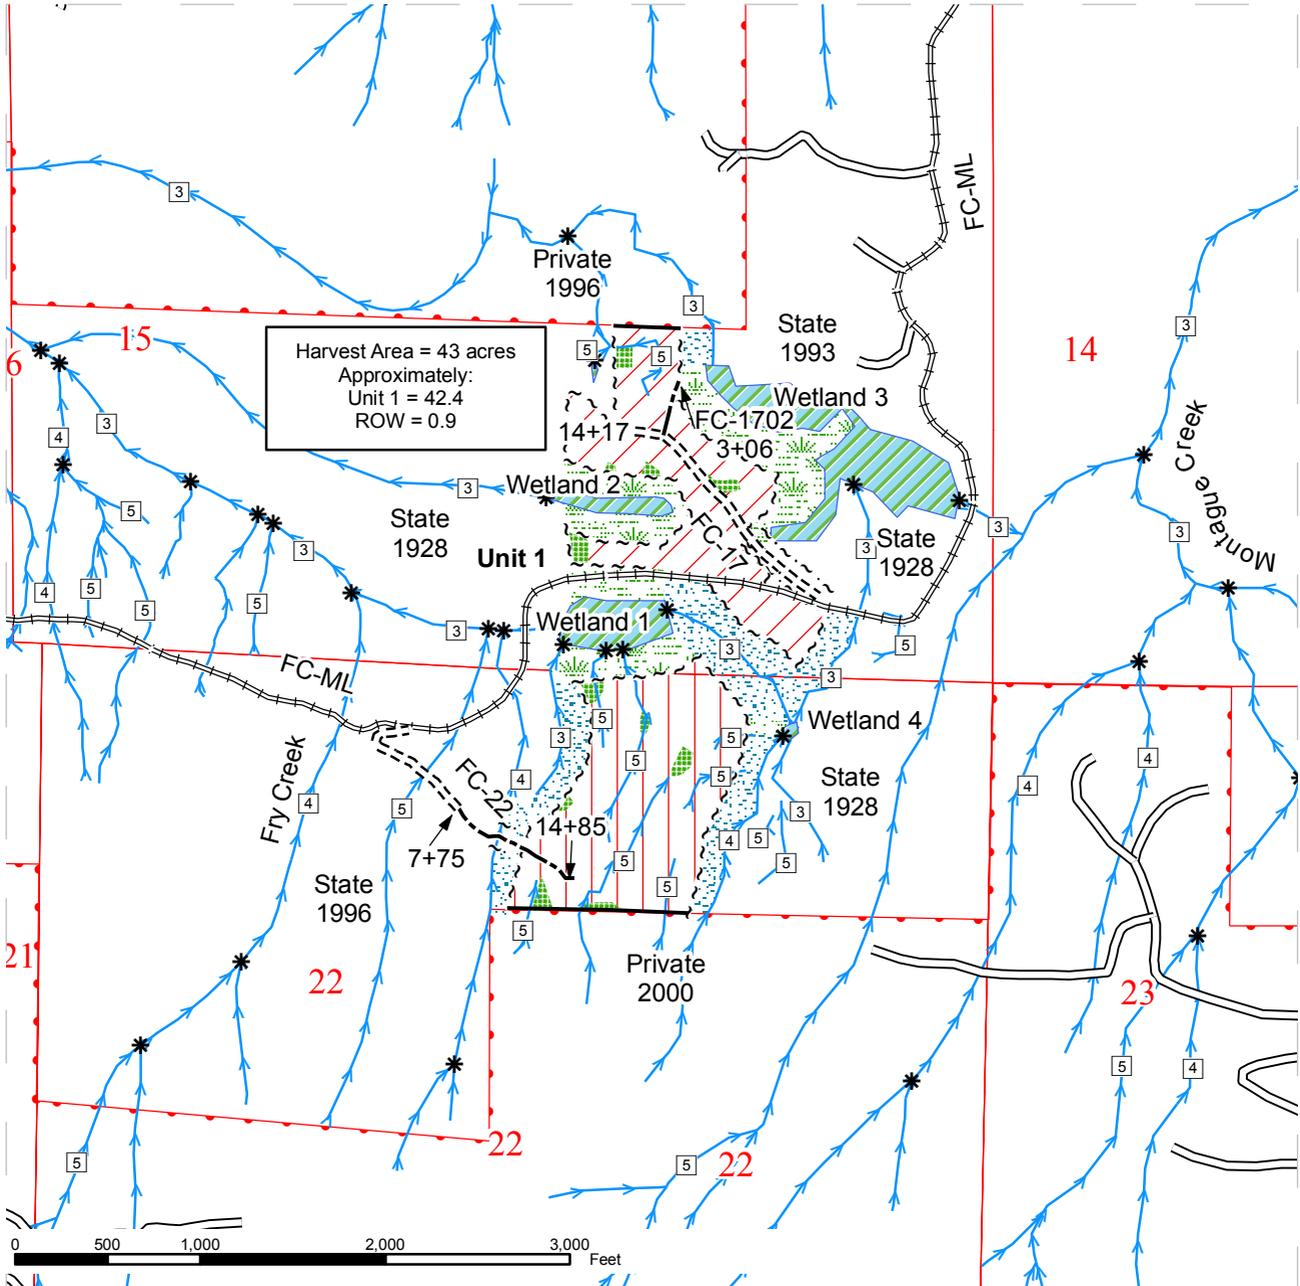

FEES: \$28,037.00 is due on day of sale. \$9.00 per MBF is due upon removal. These are in addition to the bid price.

SPECIAL REMARKS: The road to the rock pit is inaccessible to vehicles and the DNR will be coordinating the repairs to the road. Repairs are not part of this contract.

MINIMUM BID: \$42/MBF (est. value \$285,000.00) **BID METHOD:** Sealed Bids

PERFORMANCE SECURITY: \$57,000.00 **SALE TYPE:** MBF Scale

EXPIRATION DATE: September 30, 2010 **ALLOCATION:** Export Restricted

BIDDABLE SPECIES: Douglas fir

BID DEPOSIT: \$28,500.00 or Bid Bond. Said deposit shall constitute an opening bid at the appraised price.

HARVEST METHOD: Cable; cable or shovel on slopes 25% or less. Falling and Yarding will not be permitted from November 1 to March 31 unless authorized in writing by the Contract Administrator (THIS PERTAINS TO GROUND-BASED EQUIPMENT ONLY) to reduce soil damage and erosion.

ROADS: 42.08 stations of optional construction. 42.08 stations of road to be abandoned if built.

TIMBER NOTICE OF SALE

Development of an existing hardrock source (Saint Stephen Pit) at station 19+00 of the PC-1300 Road, will involve clearing, stripping, drilling, shooting, and processing rock to generate 676 cubic yards of riprap and 3030 cubic yards of 3-inch-minus ballast. This rock is available at no cost on State land.

Road construction, road abandonment, and the hauling of rock will not be permitted from November 1 to March 31 unless authorized in writing by the Contract Administrator to reduce soil damage and siltation. The hauling of forest products will not be permitted from November 1 to March 31 unless authorized in writing by the Contract Administrator to reduce soil damage and siltation.

ACREAGE DETERMINATION

CRUISE METHOD: Acres determined by GPS traverse. 111 acres gross. 3.3 acres deducted for green tree retention clumps and 4.7 acres deducted for existing road and 0.73 acres deducted for an inner gorge exclusion. 76.9 acres net. Cruised using variable plot method. Expansion factor used is 40.00. Sighting height is 4.5 feet. Grid size plot spacing is 300 x 300 feet in the Unit. Plot ratio cruise count is 25:14 in the Unit. 40 plots were taken in the Unit. Acres to be thinned (11.3 net acres) in the upland and RMZ were cruised using variable plot method. Expansion factor used is 40.00. Sighting height is 4.5 feet. Grid size plot spacing is 200 x 150 feet. Cruised all thinning plots. 17 plots were taken. A total of 57 plots were taken.

FEES: \$40,571.50 is due on day of sale. \$9.00 per MBF is due upon removal. These are in addition to the bid price.

SPECIAL REMARKS:

- 1) Blue special management tags delineate the boundary of the areas to be thinned; both the upland thinning and the RMZ thinning.
- 2) FYI: Whatcom County weight restrictions on the Mosquito Lake Road over the Middle Fork and the North Fork of the Nooksack River.
- 3) Utility price for P-021 clause is \$20.00 per mbf.

Schedule B
SUGAREE VRH & VDT THINNING PRESCRIPTION

Cutting Prescription

1. RMZ Thinning Area
 - Retain 105-115 trees per acre from the dominant and co dominant crown classes.
 - Cut all hardwood.
 - Cut all trees 7 inches diameter at breast height (DBH) and less.
 - Cut Pacific silver fir up to 12 inches DBH.
 - Cut Western hemlock up to 18 inches DBH.

| RMZ associated with Stream # | Total acres in each RMZ* | Number of trees to be girdled |
|------------------------------|--------------------------|-------------------------------|
| RMZ S1 | 1.29 | 6 |
| RMZ S2 | 2.69 | 15 |
| RMZ S4 | 1.25 | 6 |
| Total | 5.23 | 27 |

SNAG RECRUITMENT

The trees to be girdled shall be chosen from within 25 feet from the timber sale tags, within the riparian forest special management area. A total of five conifer trees per thinned RMZ acre (outer and middle zones) from the largest diameter class of the thinned trees shall be designated for riparian habitat enhancement. No snag creation is scheduled for the Upland thinning.

2. Upland Thinning Area
 - Retain 105-115 trees per acre, which should result in average 20'x 20' spacing.
 - Cut all hardwood.
 - Cut all trees 7 inches diameter breast height (DBH) and less.
 - Cut PSF up to 16 inches DBH.
 - Cut WH up to 14 inches DBH.

General Requirements

Cable yarding corridors: Cable yarding corridors will be limited to 12-feet in width including rub trees. Corridors will be at least 100 feet apart when parallel as measured from the center of the corridors unless approved by the Contract Administrator. Landings will be located to provide for parallel yarding corridors wherever possible. When radial yarding corridors are required from a central landing, the distance between yarding corridors must be no closer than 100 feet where the corridor leaves the unit as measured from the center of the corridors. Where possible, corridors should be located in a manner to minimize the damage to or removal of leave trees. When corridors are field located, only leave trees within 3 – 5 feet of the center of the corridor should be removed prior to yarding. Following completion of yarding of each corridor, damaged leave trees within 6 feet of the center of the corridor may be felled and yarded to the landing. It is not required to remove all leave trees from the 12-foot corridor.

Ground yarding corridors: Corridors are limited to 14 feet wide (including rub trees) and no less than 70 feet apart as measured from the center of the corridor. Where possible corridors should be located in a manner to minimize the damage to, or removal of, leave trees.

Openings created by felling trees shall not exceed 20 feet between leave trees. If openings in the stand approach this distance, sufficient trees shall be left on the perimeter of the opening to maintain the appropriate average trees per acre.

Do not cut any western redcedar except where required for operational purposes along cable yarding roads.

In areas where thinning is not necessary, i.e., prescription is met, do not put in yarding corridors or skid trails. These areas must be identified and agreed upon in advance with the Contract Administrator.

Bark Slippage Season: Cutting and yarding within the thinning units will not be permitted during the bark slippage season unless authorized in writing by the Contract Administrator. This season is estimated to run from April 1- July 1 but will vary dependent on weather conditions. If permission is granted to operate during the bark slippage season the purchaser will be required to provide a plan outlining mitigation measures.

Compliance

A 1/20 acre fixed radius plot (26.3 feet) will be measured to determine trees per acre. The number of trees in a plot will be multiplied by 20 to determine the trees per acre for that plot. The average of all plots in a unit will determine the trees per acre for that unit.

Only trees greater than or equal to 7" DBH will be counted towards leave tree targets.

Compartments for assessment of damage
Per contract clauses H-012 and D-040

Compartment A: Thinning Area 1 RMZ Thin
Compartment B: Thinning Area 2 Upland Thin

Certification of Fallers and Yarder Operators (additional requirements beyond those outlined in H-011)

The Contract Administrator and faller/harvester operator will jointly review the take tree selection criteria as outlined in Schedule B of the sale contract.

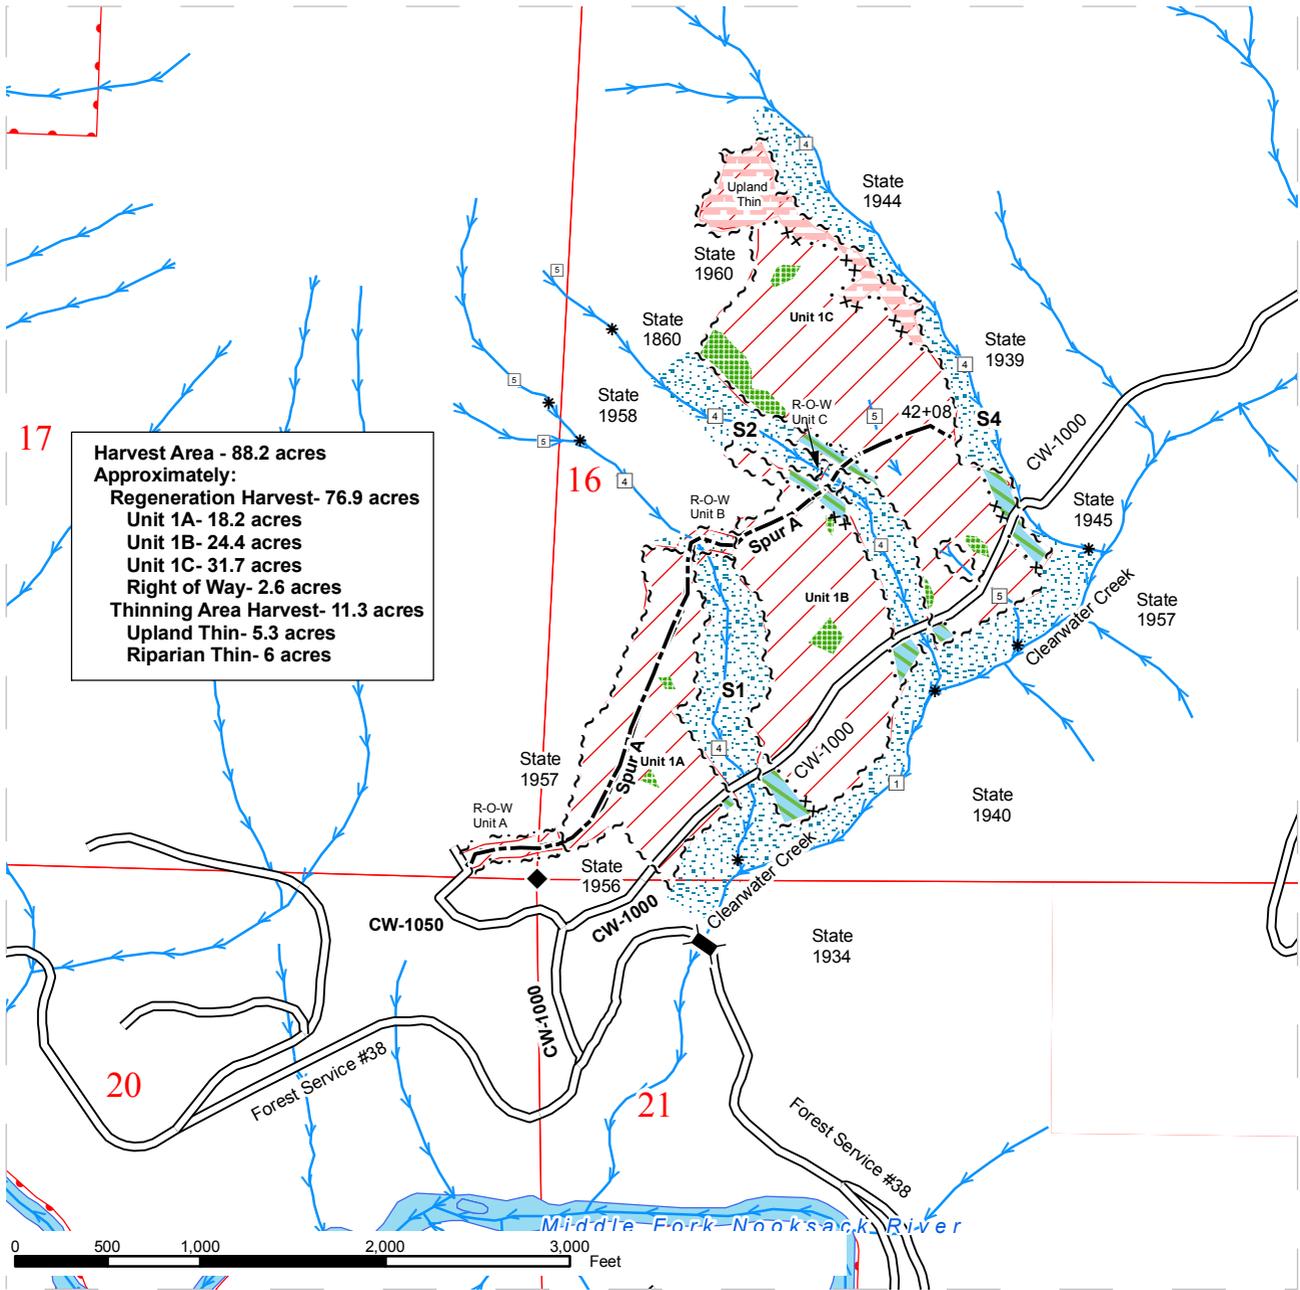

In conjunction with the Contract Administrator, the faller/harvest operator will mark a designated area as a test plot within the sale area boundary. Satisfactory thinning of the test plot completes the certification process.

Certifications will be issued to individuals when they demonstrate to the Contract Administrator their ability to perform within the requirements set forth in the contract.

MINIMUM BID: \$527,000.00 **BID METHOD:** Sealed Bids

PERFORMANCE SECURITY: \$100,000.00 **SALE TYPE:** Lump Sum

EXPIRATION DATE: September 30, 2011 **ALLOCATION:** Export Restricted

BID DEPOSIT: \$52,700.00 or Bid Bond. Said deposit shall constitute an opening bid at the appraised price.

HARVEST METHOD: Cable; cable or shovel on slopes 35% or less. Falling and Yarding will not be permitted from November 1 to March 31 unless authorized in writing by the Contract Administrator (THIS PERTAINS TO GROUND-BASED EQUIPMENT ONLY) to reduce soil damage and erosion.

ROADS: 190.08 stations of required reconstruction. 14.36 stations of optional construction. 14.36 stations of road to be abandoned if built.

TIMBER NOTICE OF SALE

Development of an existing hardrock source (Old School Pit) at milepost 6.4 of the Mosquito Lake Road will involve processing rock to generate approximately 576 cubic yards of gravel surfacing. This rock is available at no cost on State land.

Development of a new hardrock source (Dike Bridge Ballast Pit) at milepost 5.4 of the N-1000 Road will involve stripping, drilling, shooting, and processing rock to generate approximately 30 cubic yards of riprap and approximately 1,149 cubic yards of sub-grade ballast rock. This rock is available at no cost on State land.

Road construction, road reconstruction, road abandonment, and the hauling of rock will not be permitted from November 1 to March 31 unless authorized in writing by the Contract Administrator to reduce soil damage and siltation. The hauling of forest products will not be permitted from November 1 to March 31 unless authorized in writing by the Contract Administrator to reduce soil damage and siltation.

ACREAGE DETERMINATION

CRUISE METHOD: Acres determined by GPS and hand traverse. 58.4 acres gross. 1.9 acres deducted for green tree retention clumps and 0.7 acres deducted for existing road. 55.8 acres net. Cruised using variable plot method. Expansion factor used is 54.45. Sighting height is 4.5 feet. Grid size plot spacing is 200 x 200 feet in Units #1 and #2. Plot ratio cruise count is 1:1 in Units #1 and #2. 44 plots were taken in Unit #1, and 7 plots taken in Unit #2, for a total of 51 plots.

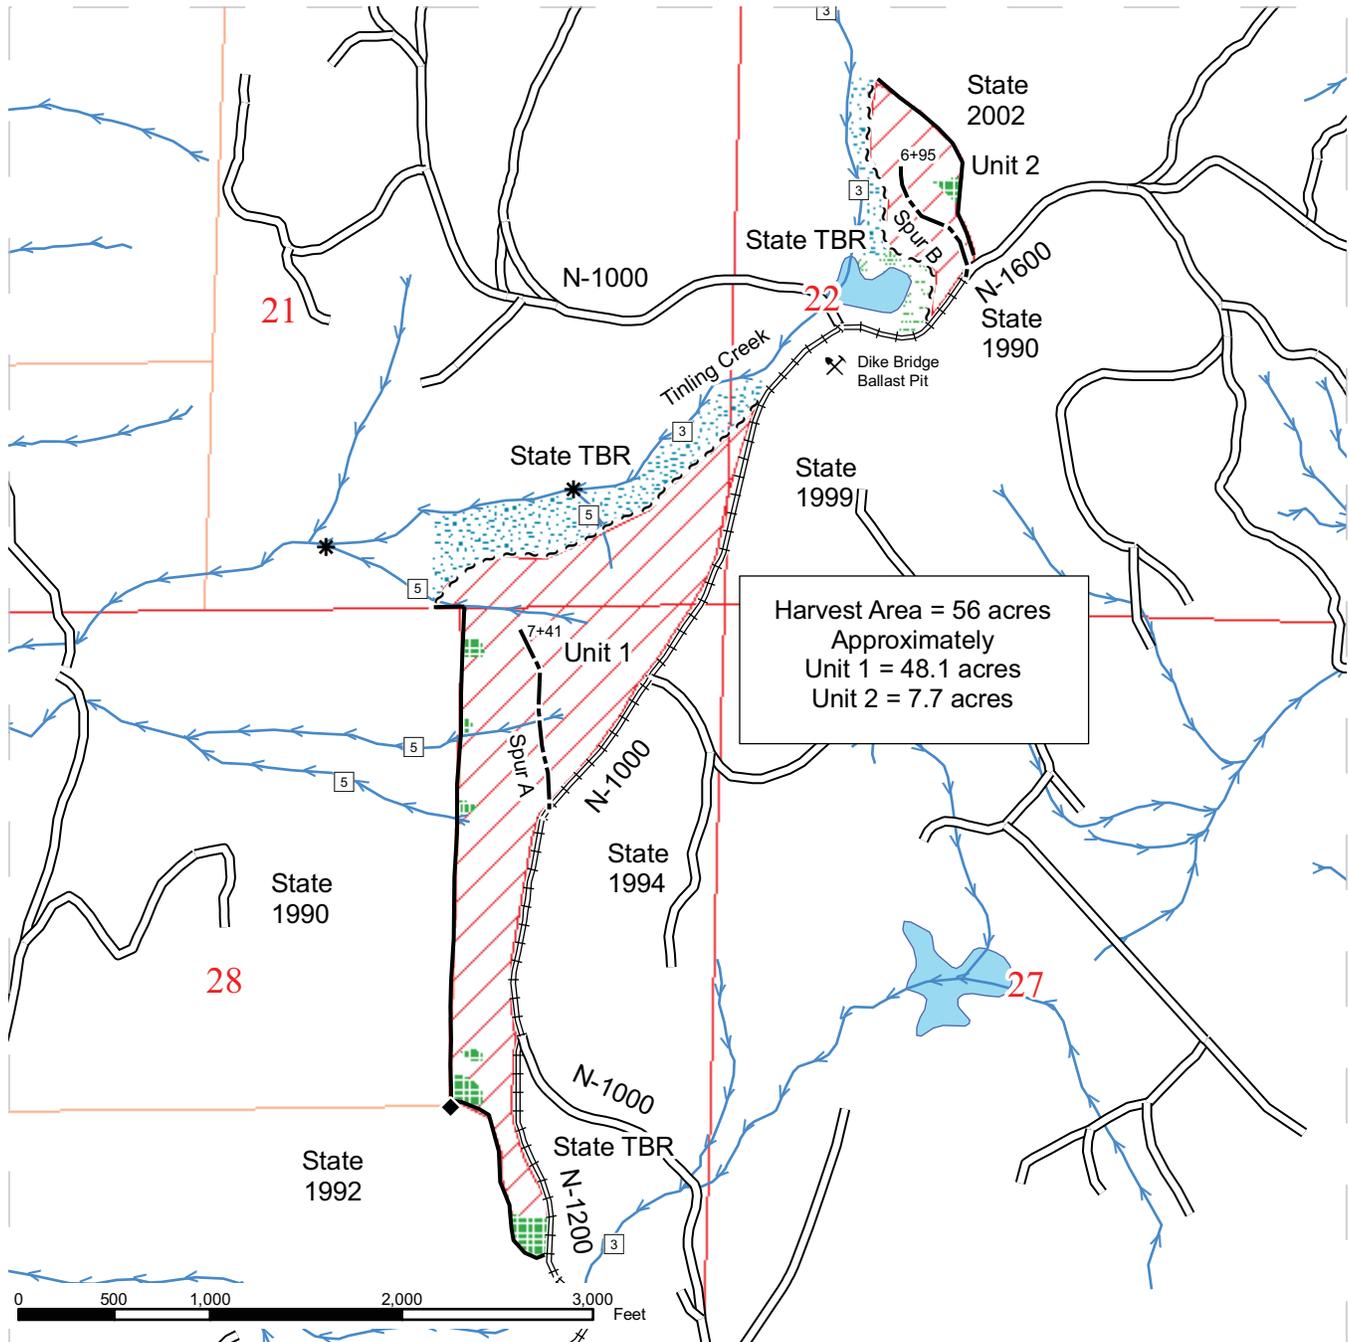

FEES: \$42,691.50 is due on day of sale. \$9.00 per MBF is due upon removal. These are in addition to the bid price.

SPECIAL REMARKS: (1.) Reconstruction consists of brushcutting the entire length of road listed and then involves filling a hole in the shoulder with 5 cubic yards of gravel material at M.P. 1.19 of the N-1000. (2.) If the Purchaser elects to harvest from April 1 to October 31, any optional construction road locations listed in the road plan may be used as designated skid roads following Schedule A.

PERFORMANCE

SECURITY: \$44,000.00

SALE TYPE: Lump Sum

EXPIRATION DATE: November 30, 2010

ALLOCATION: Export Restricted

BID DEPOSIT: \$22,000.00 or Bid Bond. Said deposit shall constitute an opening bid at the appraised price.

HARVEST METHOD: Unit #1 - 70% cable only, 30% tracked skidder, shovel or cable. Unit #2 - 100% tracked skidder, shovel or cable. Unit #3 - 70% tracked skidder, shovel, or cable, 10% shovel and/or cable only, 20% cable only. The size of tracked skidder shall be limited to D-6 equivalent or less. Feller bunchers will be allowed when operations are not otherwise restricted and when weather permits. During restriction periods only hand falling will be allowed. Ground Based Yarding will not be permitted from November 1 to April 30 unless authorized in writing by the Contract Administrator.

ROADS: 1.00 stations of required construction. 11.20 stations of required reconstruction. 40.73 stations of optional construction. 5.60 stations of optional reconstruction. 361.35 stations of required pre-haul maintenance. 14.20 stations of optional pre-haul

TIMBER NOTICE OF SALE

maintenance. 8.73 stations of optional reclamation/abandonment. Purchaser maintenance on all new construction, reconstruction and pre/post-haul maintenance. Purchaser must construct and install a gate and modify another gate - see road plan for details. Rock haul, pre-haul maintenance, reconstruction and Road construction will not be permitted from November 1 to April 30 unless authorized in writing by the Contract Administrator.

ACREAGE DETERMINATION

CRUISE METHOD: Sale acreage was 100% GPS'd. Sale units were cruised using a variable plot sample with a BAF of 46.94F on a 300 x 200 foot grid.

FEES: \$39,962.00 is due on day of sale. \$9.00 per MBF is due upon removal. These are in addition to the bid price.

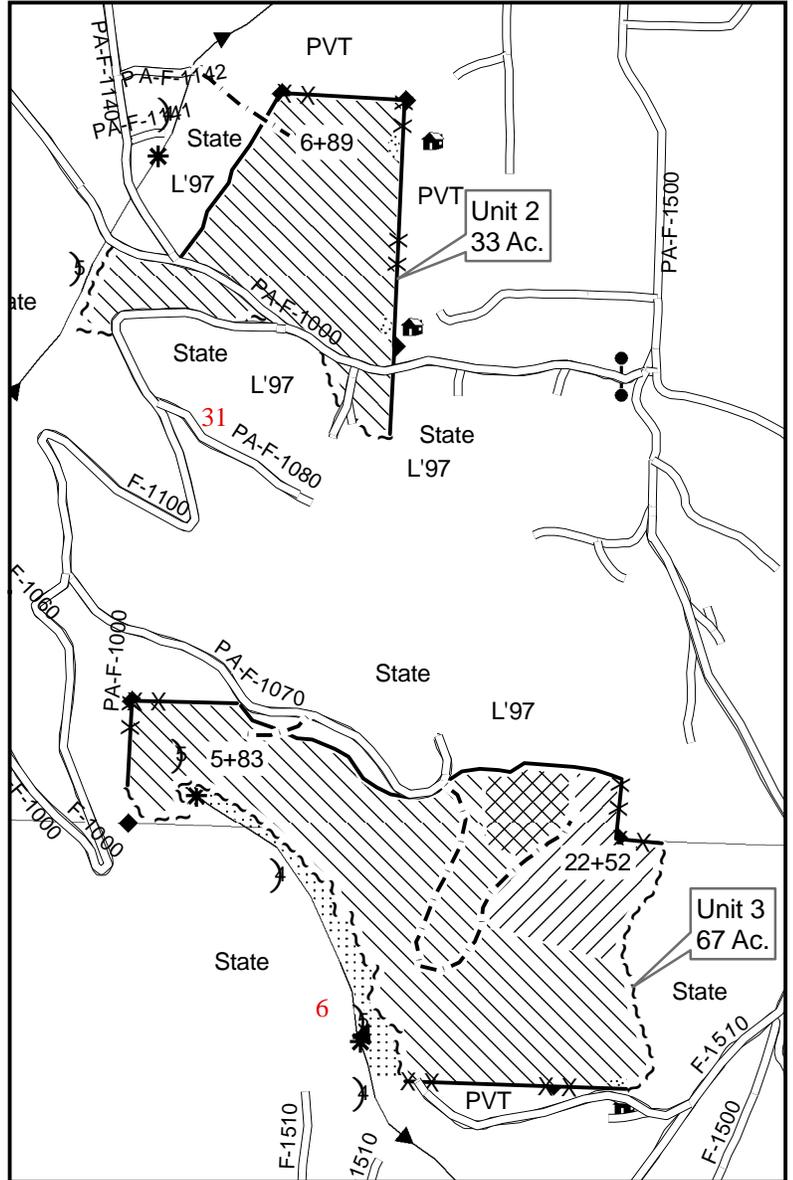

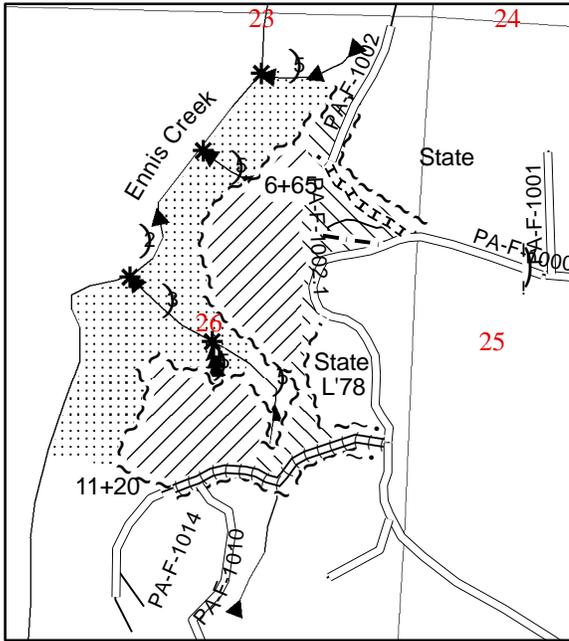

SPECIAL REMARKS: There are locked gates on the PA-F-1000W and PA-F-1000E Roads - contact the Olympic Region Dispatch Center at 360-374-6131 to obtain a AA-1 key. Please note - 30 mbf of the Douglas fir is blowdown. For the F-1000E Road, Purchaser must have utility lines located before digging in or next to road and before beginning road construction.

MINIMUM BID: \$32,000.00

BID METHOD: Sealed Bids

**PERFORMANCE
SECURITY:**

\$6,400.00

SALE TYPE: Lump Sum

EXPIRATION DATE: October 31, 2009

ALLOCATION: Export Restricted

BID DEPOSIT: \$3,200.00 or Bid Bond. Said deposit shall constitute an opening bid at the appraised price.

HARVEST METHOD: Shovel - 100%. Operations will not be permitted on weekends, state recognized holidays, or any day prior to 7:30am and after 5:00pm. Falling and Yarding will not be permitted from November 1 to April 30 unless authorized in writing by the Contract Administrator.

ROADS:

Operating of construction equipment will not be permitted from 5:00pm to 7:30am, Monday through Friday on the PA-J-1700 Road from station 25+81 to 30+88, and on the PA-J-1720 Road from station 0+00 to 5+57. Purchaser must repair the gate at station 0+30 on the PA-J-1700 Road. 5.72 stations of required abandonment. 19.66 stations of required decommissioning. 40.7 stations of required pre/post haul maintenance. Pre/post haul maintenance and Road construction will not be permitted from November 1 to April 30 unless authorized in writing by the Contract Administrator. The hauling of forest products will not be permitted from November 1 to April 30 unless authorized in writing by the Contract Administrator.

TIMBER NOTICE OF SALE

ACREAGE DETERMINATION

CRUISE METHOD: Sale acreage was 82% photo traversed, 16% GPS'd and 2% estimated (leave clumps in Units 2 and 3). Sale units were cruised using a variable plot sample with a BAF of 54.45F on a 160 x 160 foot grid for Unit #1; and Units #2 and 3 were ITS'd.

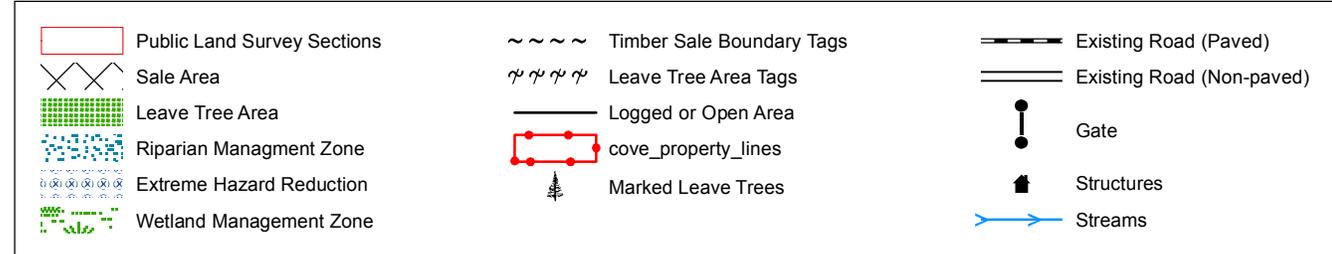

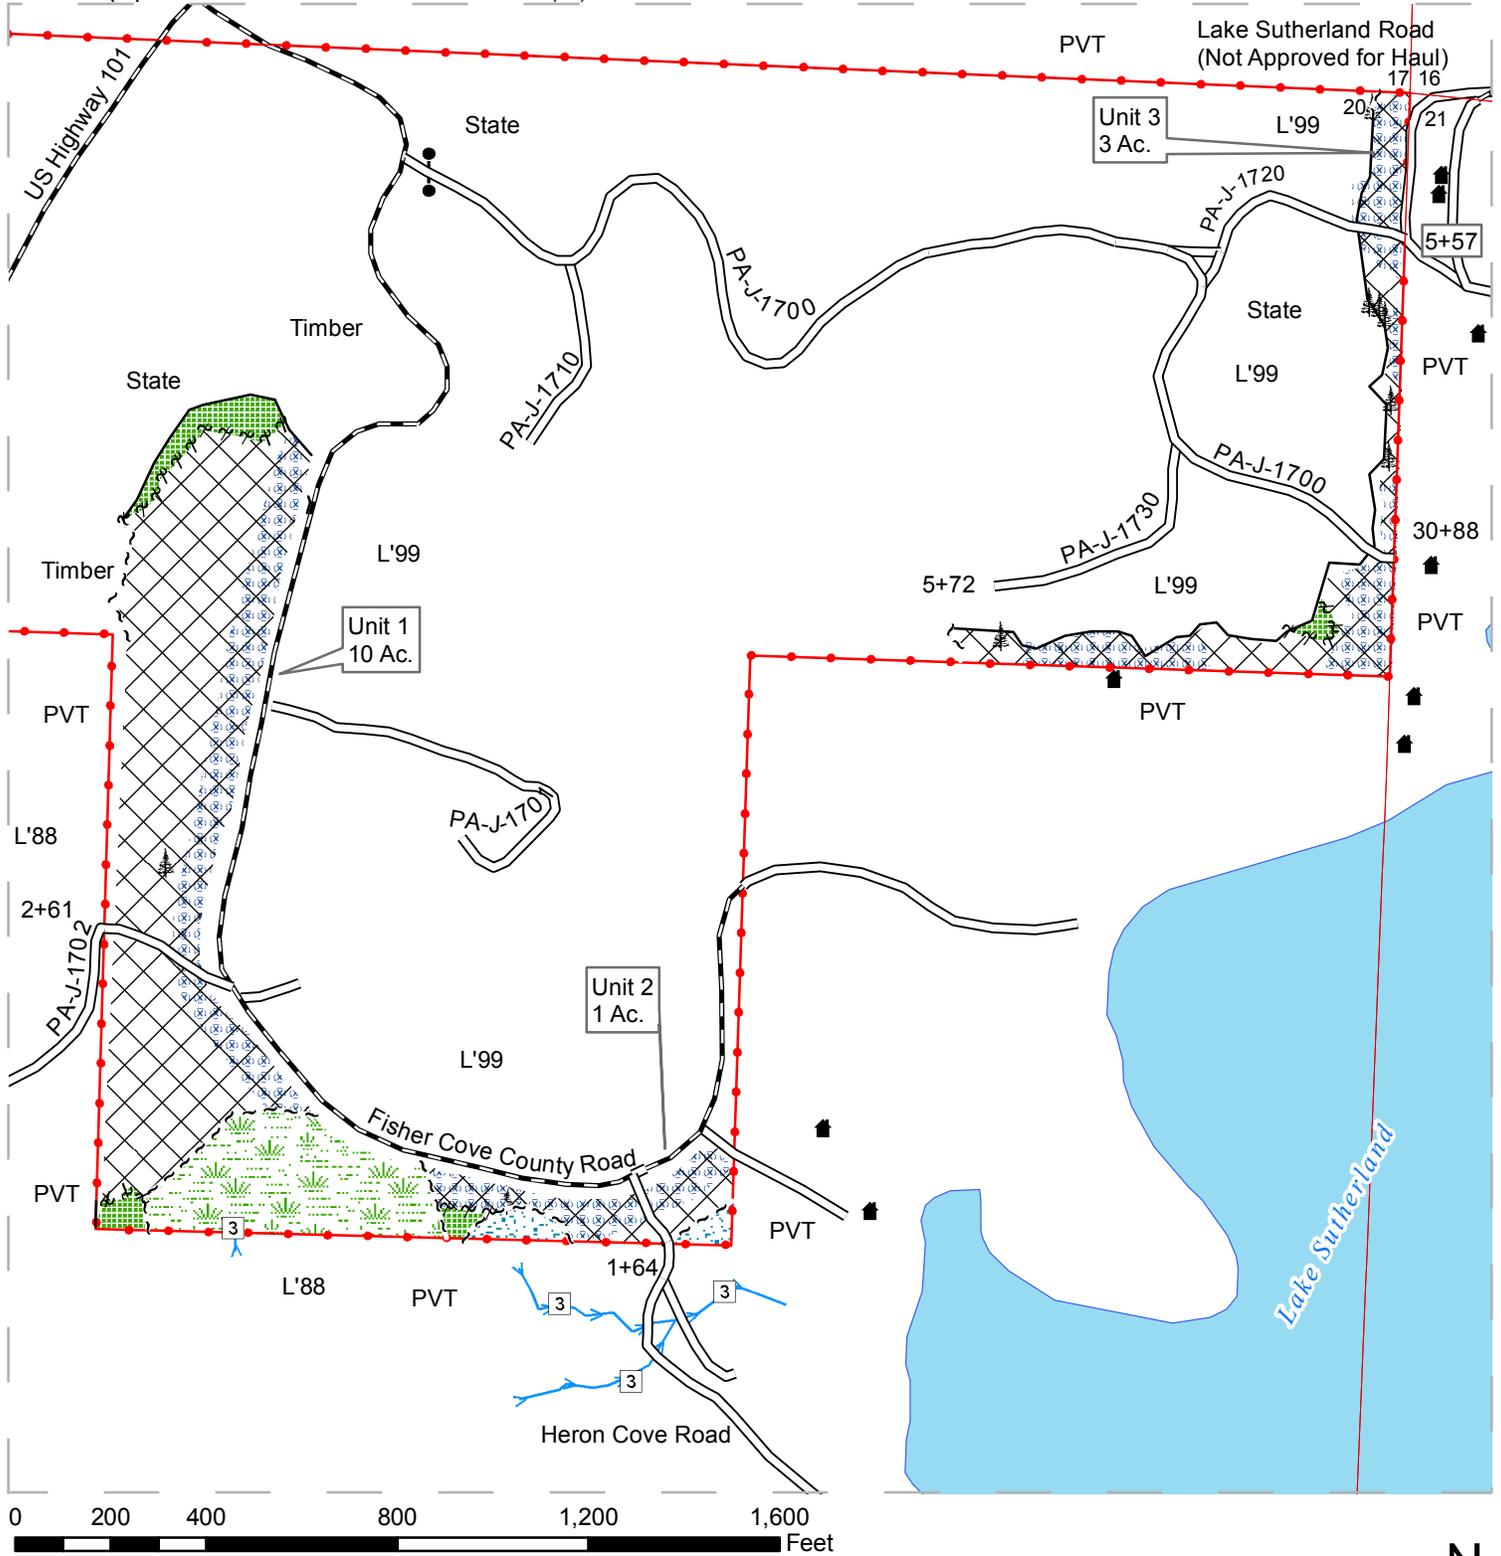

FEES: \$3,258.00 is due on day of sale. \$9.00 per MBF is due upon removal. These are in addition to the bid price.

SPECIAL REMARKS: There are hazard abatement requirements in all units. The PA-J-1700 Road is currently impassable - those wishing to view Unit #3 will need to use the Lake Sutherland Road. Please note that the Lake Sutherland Road is for viewing only. Timber from Unit #3 will need to be hauled up the PA-J-1700 Road and out the Fisher Cove County Road.

BID DEPOSIT: \$9,300.00 or Bid Bond. Said deposit shall constitute an opening bid at the appraised price.

HARVEST METHOD: Tracked ground based equipment on slopes 35 percent and less. Cable equipment with slack pulling carriage on slopes greater than 35 percent. Ground based yarding may be restricted during wet weather conditions if excessive rutting occurs in the opinion of the Contract Administrator. If Purchaser elects to shovel log, shovel logging shall be in accordance with the attached Schedule A, which is a part of this contract. Falling and yarding will not be permitted from November 1 to April 30, unless authority to do so is granted, in writing, by the Contract Administrator. If permission is granted to operate between November 1 and April 30, the Purchaser may be required to provide a "Closed Season Plan" to include further protection of water, soil, roads and other forest assets. The "Closed Season Plan" must be approved in writing by the Contract Administrator.

TIMBER NOTICE OF SALE

Falling and yarding will also not be permitted on weekends or state recognized holidays, unless approved in writing by the Contract Administrator.

ROADS:

0.66 stations of required reconstruction. 26.32 stations of optional construction. 17.48 stations of optional reconstruction. 538.06 stations of required pre-haul maintenance. 204.12 stations of required post-haul maintenance. 35.57 stations of required abandonment. 26.32 stations of abandonment if constructed. Cross section designs are available at the South Puget Sound Region office upon request. Purchaser maintenance on the Coal Mine, Powerline, Winery, 2725, 2725 Ext, 35800, CM100, W100, W100-1 Roads and Spurs 100, 200 and 300. Designated maintenance on all other roads used. Rock for this proposal can be obtained at no cost to the Purchaser from the state owned Columnar Rock Pit or any commercial source approved by the Contract Administrator. Road construction, timber haul and rock haul shall not be permitted between November 1 and April 30, unless authority to do so is granted, in writing, by the Contract Administrator. If permission is granted to operate between November 1 and April 30, the Purchaser may be required to provide a "Closed Season Plan" to include further protection of water, soil, roads and other forest assets. The "Closed Season Plan" must be approved in writing by the Contract Administrator. Road construction, timber haul and rock haul will also not be permitted on weekends or state recognized holidays, unless approved in writing by the Contract Administrator.

ACREAGE DETERMINATION

CRUISE METHOD:

Acreage was determined by traversing boundaries with GPS in the units and by taking a field measurement of 52' x 400' in the right of way. Traverse GPS data files are available upon request by emailing audrey.mainwaring@dnr.wa.gov or calling Audrey Mainwaring at (360) 802-7001. DNR does not provide technical support or training in the use of GPS data files. Units were cruised using a variable plot sample with BAF of 46.94 on a 170 x 200 foot grid. Right of way was cruised using a variable plot sample with a BAF of 46.94 every 200 feet.

FEES:

\$21,916.00 is due on day of sale. \$9.00 per MBF is due upon removal. These are in addition to the bid price.

SPECIAL REMARKS:

As required reconstruction, the Purchaser shall replace an existing culvert on the 35800 Road with a fish passable 10'x40' corrugated metal pipe. Re-grading approximately 25 feet of existing streambed to match average stream grade upstream will be required. See the road plan or approved HPA for details.

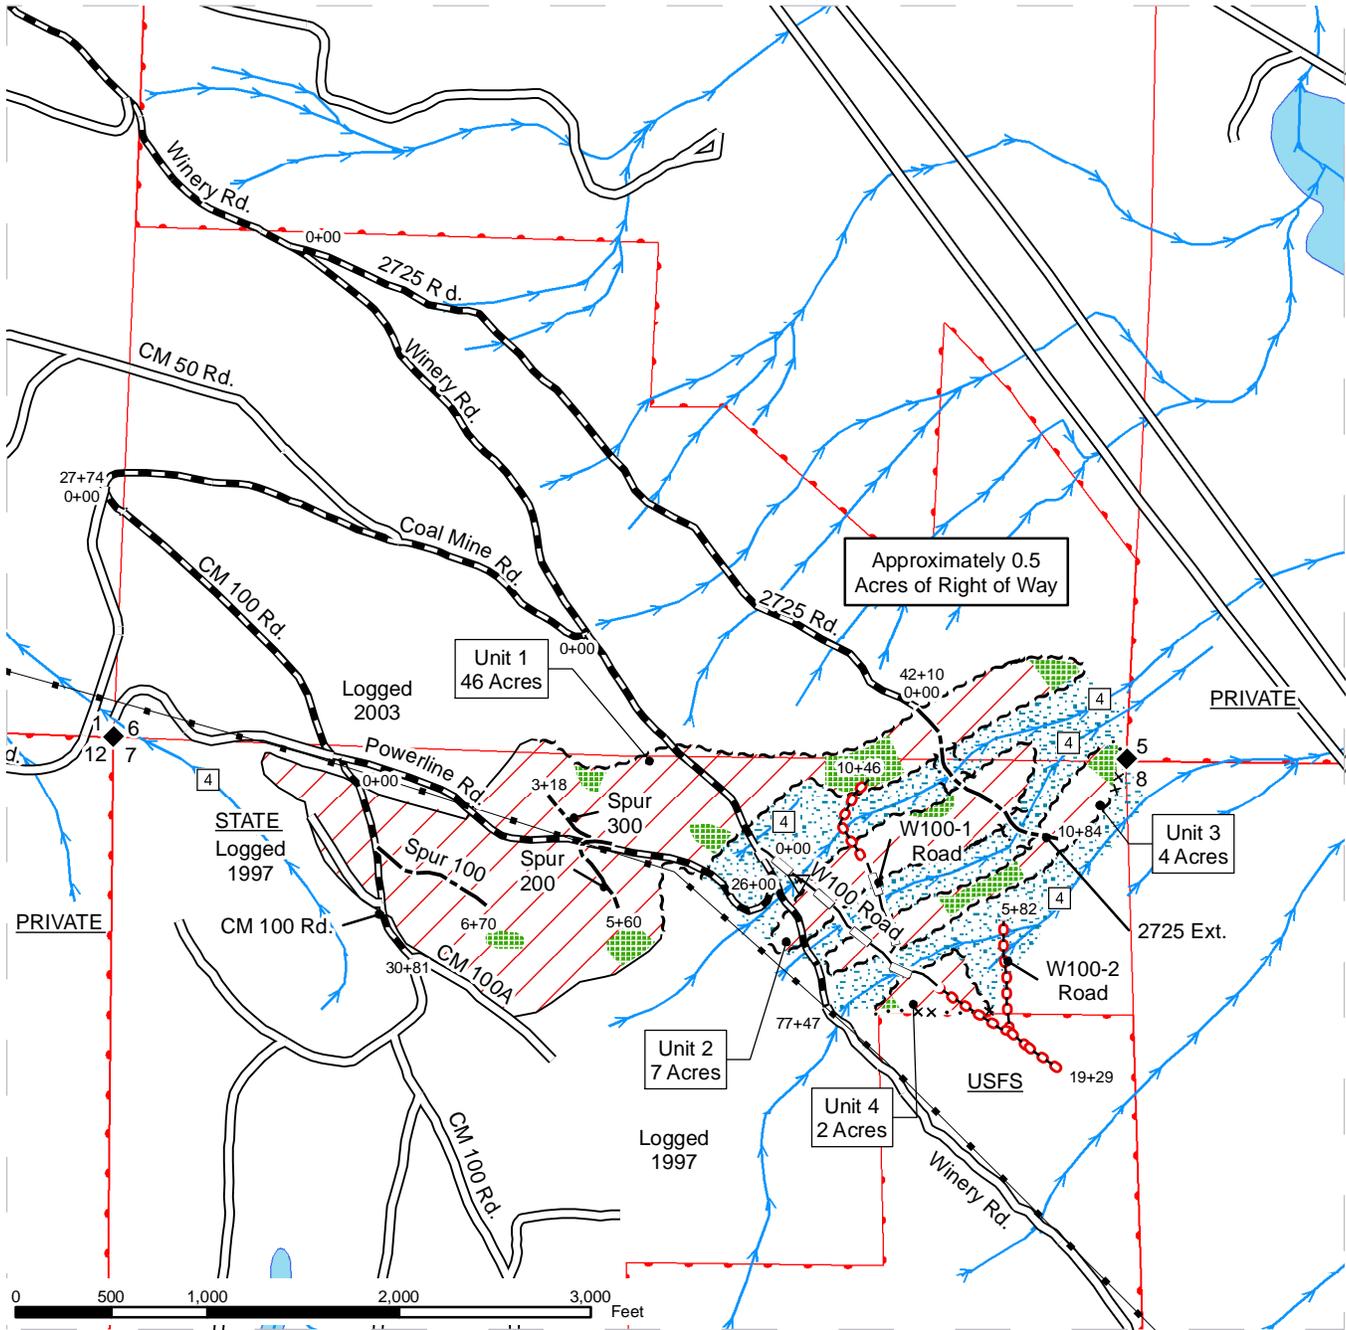

Purchaser shall pull all vine maple and leave roots exposed and detached from the soil in the ground based harvest area. Purchaser shall cut vine maple and sever from the stump in the cable harvest area.

There is approximately 13 acres within the sale that is on slopes greater than 35 percent and approximately 47 acres within the sale area that is on slopes equal to or less than 35 percent.

DRIVING DIRECTIONS:

Traveling east on Interstate 90 take exit 27, turn right at bottom of off ramp onto Winery Road go approximately 0.1 miles to the locked blue DNR gate (# 819) on right side of road, road turns to gravel at this point. Then continue 0.2 miles to "Y" in the road, go left and travel 1.2 miles to end of road and beginning of Unit 1.

Traveling east on State Highway 18 take right hand turn past mile marker 27 onto the gravel road. This road is the 35800 beyond the locked yellow gate.

Traveling east on State Highway 18, turn right onto SE 104th Street, near the junction with Interstate 90. SE 104th Street will immediately bend to the left you need to continue going straight onto the gravel road through the yellow gate for 0.7 miles then make a right hand turn onto 35010 road. Continue 0.3 miles further for right hand turn onto BPA cleared right-of-way road.

TIMBER NOTICE OF SALE

SALE NAME: *Little Joe FIT Log Sorts*

AGREEMENT NO: *30-084373 – 30-084375*

AUCTION: June 23, 2009 starting at 10:00 a.m.,
Southeast Region Office, Ellensburg, WA

COUNTY: Kittitas

SALE LOCATION: Sale located approximately 22 miles northeast of Ellensburg.

**PRODUCTS SOLD
AND SALE AREA:**

All delivered timber, meeting the specifications described below; on parts of Section 6, Township 19 North, Range 21 East; Sections 18, Township 20 North, Range 21 East; and Sections 24 and 36, Township 20 North, Range 20 East, W.M. containing 351 acres, more or less.

MINIMUM BID AND ESTIMATED LOG SORT VOLUMES:

| Agreement # | Sort # | Species and Sort Specifications | Estimated Volume MBF | Estimated Volume Tons | Minimum Bid Delivered Prices \$/Ton | Total Appraised Value | Bid Deposit |
|---------------|--------|-------------------------------------|----------------------|-----------------------|-------------------------------------|-----------------------|-------------|

| Totals | | | 1,500 | 12,382 | | \$260,022.00 | |

BID METHOD: Sealed Bids

UNIT OF MEASURE: Tonnage scale

EXPIRATION DATE: January 31, 2010

ALLOCATION: Export Restricted

**PAYMENT
SECURITY:**

To be determined by the State as described in Clause P-041 of the Purchaser's Contract.

**BIDDING
PROCEDURES:**

A separate sealed bid and envelope must be submitted for each log sort. Prospective Purchasers may bid on any or all log sorts. On the day of sale the Purchaser must bring their bid deposit up to 10% of their total bid price. Complete bidding procedures and auction information may be obtained from the Southeast Region Office in Ellensburg, WA. Phone number 509-925-5810.

**HARVEST AND
DELIVERY COSTS:**

Purchaser must pay the forest excise taxes associated with the log sorts delivered to them. The tax rate for this sale is 4.2%. Taxable Stumpage = Total Delivered Value – (Harvest Cost + Haul Cost). Use the following rates for estimating taxable stumpage: Harvest Cost = tons (\$25.00/ton estimated), Haul Cost = (tons)(\$2.63) + tons(\$0.16x C miles) + tons(\$0.07 x A miles)).

SPECIAL REMARKS: The successful Purchaser(s) will be required to purchase logs from the sale area upon delivery to their location specified in the bid submitted. Logs will be delivered to the Purchaser's delivery location by the State's contract harvester. Purchaser is responsible for weighing costs. All tonnage loads will be weighed at State approved scaling locations. The State reserves the right to determine where logs are authorized to be weighed.

This sale is on lands certified
under the Sustainable Forestry
Initiative® program.
www.aboutsfi.org

WASHINGTON STATE DEPARTMENT OF
Natural Resources

TIMBER NOTICE OF SALE

Harvesting will be done using a ground based system. Harvester will be selected after the sorts are sold.

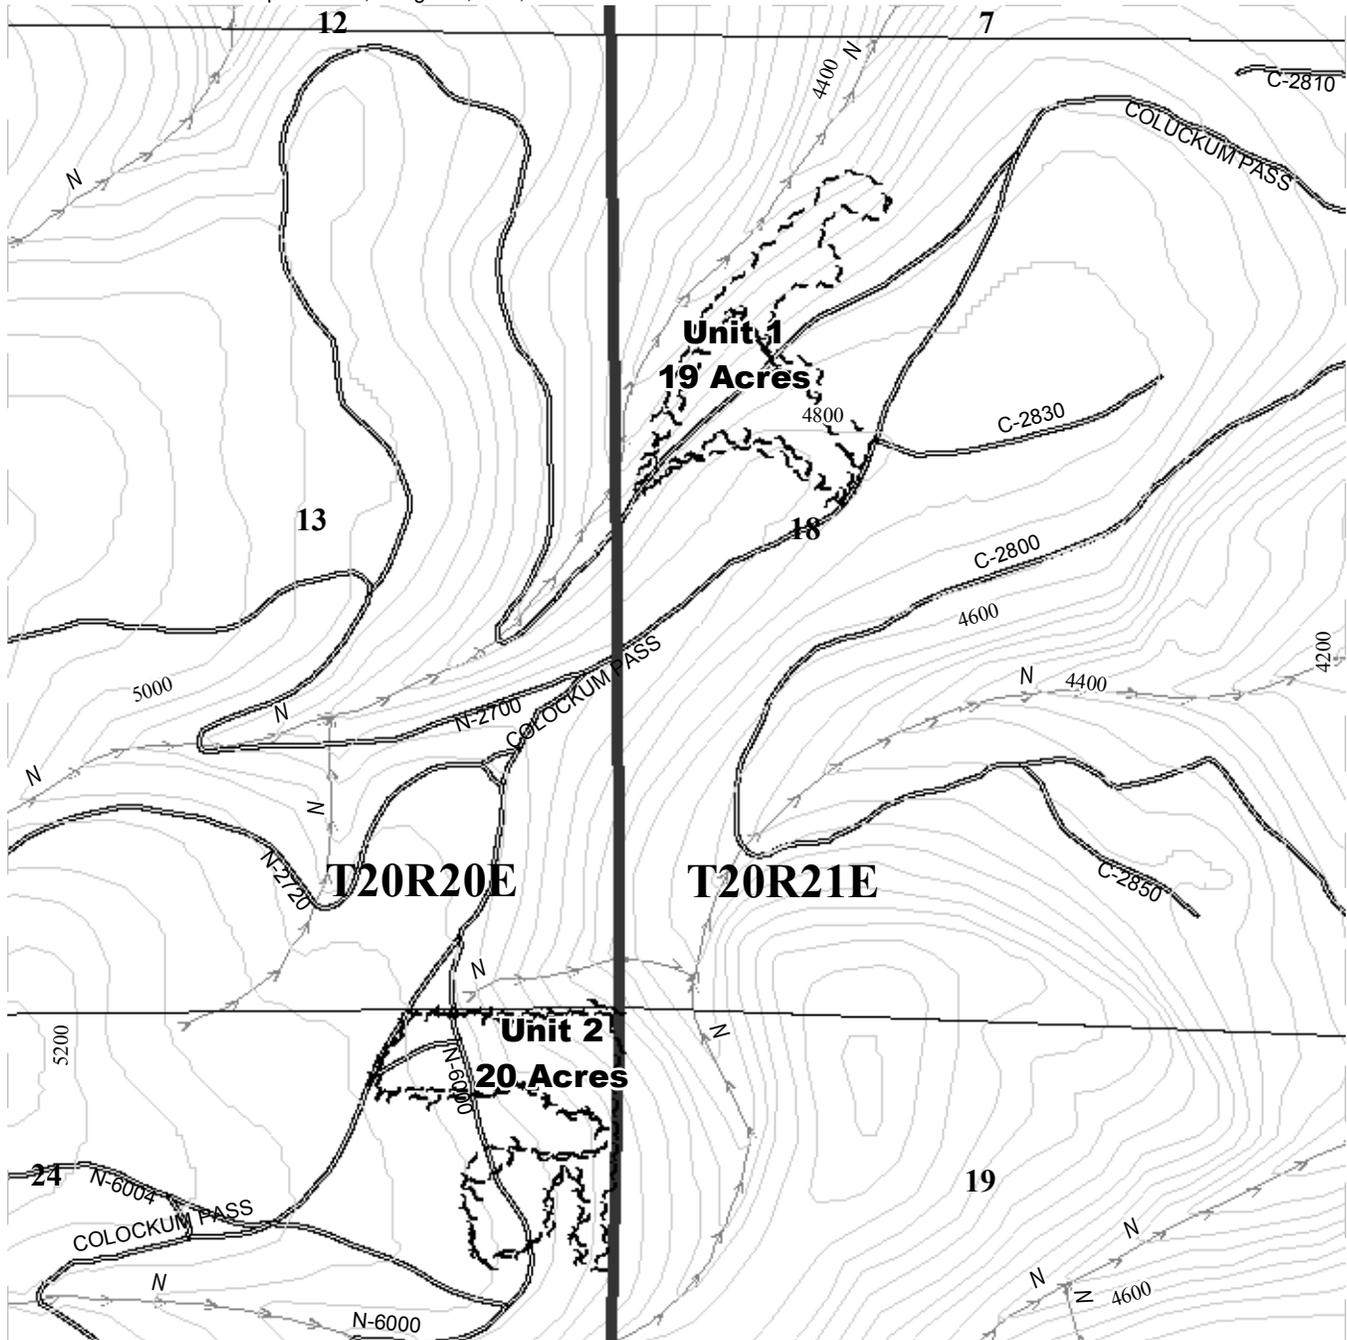

For more information regarding this log sort sale visit our web site:
<http://www.dnr.wa.gov/htdocs/fr/sales/>. If you have questions call Rod Pfeifle at the Southeast Region office at 509-925-8510.

CONFIRMATION: Each sort is subject to confirmation following auction. No sorts will be confirmed until at least 10 days after all sorts are successfully auctioned.

MINIMUM BID: \$200,000.00 **BID METHOD:** Sealed Bids

PERFORMANCE SECURITY: \$100,000.00 **SALE TYPE:** Lump Sum

EXPIRATION DATE: October 31, 2010 **ALLOCATION:** Export Restricted

BID DEPOSIT: \$20,000.00 or Bid Bond. Said deposit shall constitute an opening bid at the appraised price.

HARVEST METHOD: Ground based equipment on slopes 35 percent and less. Cable equipment on slopes greater than 35 percent. Yarding may be restricted during wet weather if excessive rutting occurs in the opinion of the Contract Administrator. If Purchaser elects to shovel log, shovel logging shall be done in accordance with the attached Schedule A, which is part of this contract.

ROADS: 43.39 stations of required construction. 3.41 stations of required reconstruction. 25.43 stations of optional construction. 32.71 stations of required pre-haul maintenance. Cross section designs are available at the South Puget Sound Region office upon request. Purchaser maintenance on the 1000, 1200, 1500, 1540, 1540 Ext, 1545, 1550 and 1700 Roads. Designated maintenance on all other roads used. Rock for this proposal may be obtained at no cost to the Purchaser from the state's Saddle Mountain and 1710 Rock Pits or from a commercial source at the Purchaser's expense. Hauling, construction and rock haul will not be permitted from October 1 to April 30, unless authority to do so is granted, in writing, by the Contract Administrator. If permission is granted to operate between October 1 and April 30, the Purchaser may be required to provide a "Closed Season Plan" to include further protection of water, soil, roads and other forest assets. The "Closed Season Plan" must be approved in writing by the Contract Administrator.

TIMBER NOTICE OF SALE

ACREAGE DETERMINATION

CRUISE METHOD: Acreage was determined by traversing boundaries with a Trimble GPS in the unit and by multiplying length x width in the right of way. Traverse GPS data files are available upon request by emailing audrey.mainwaring@dnr.wa.gov or calling Audrey Mainwaring at (360) 802-7001. DNR does not provide technical support or training in the use of GPS data files. The unit was cruised using a variable plot sample with a BAF of 46.94 on a 220 x 260 foot grid. Right of way was cruised using a variable plot sample with a BAF of 46.94 every 200 feet.

FEES: \$29,667.00 is due on day of sale. \$9.00 per MBF is due upon removal. These are in addition to the bid price.

SPECIAL REMARKS: Cable yarding equipment with lateral yarding capabilities may be needed.

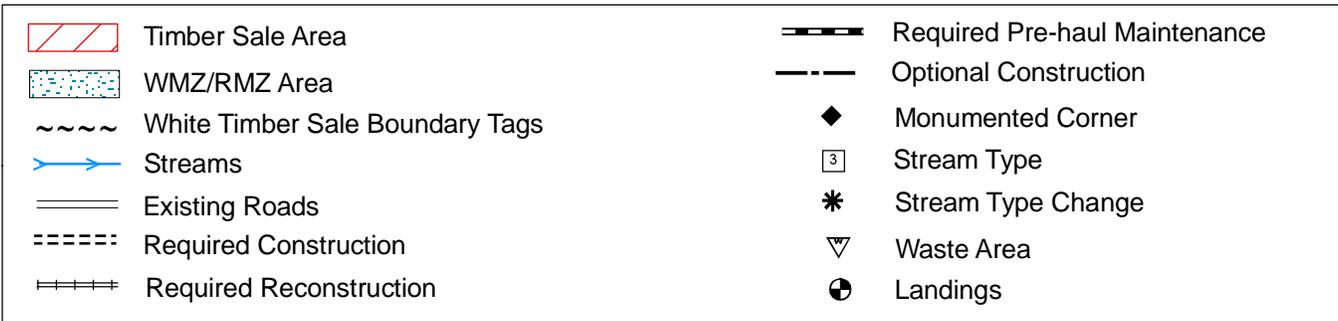

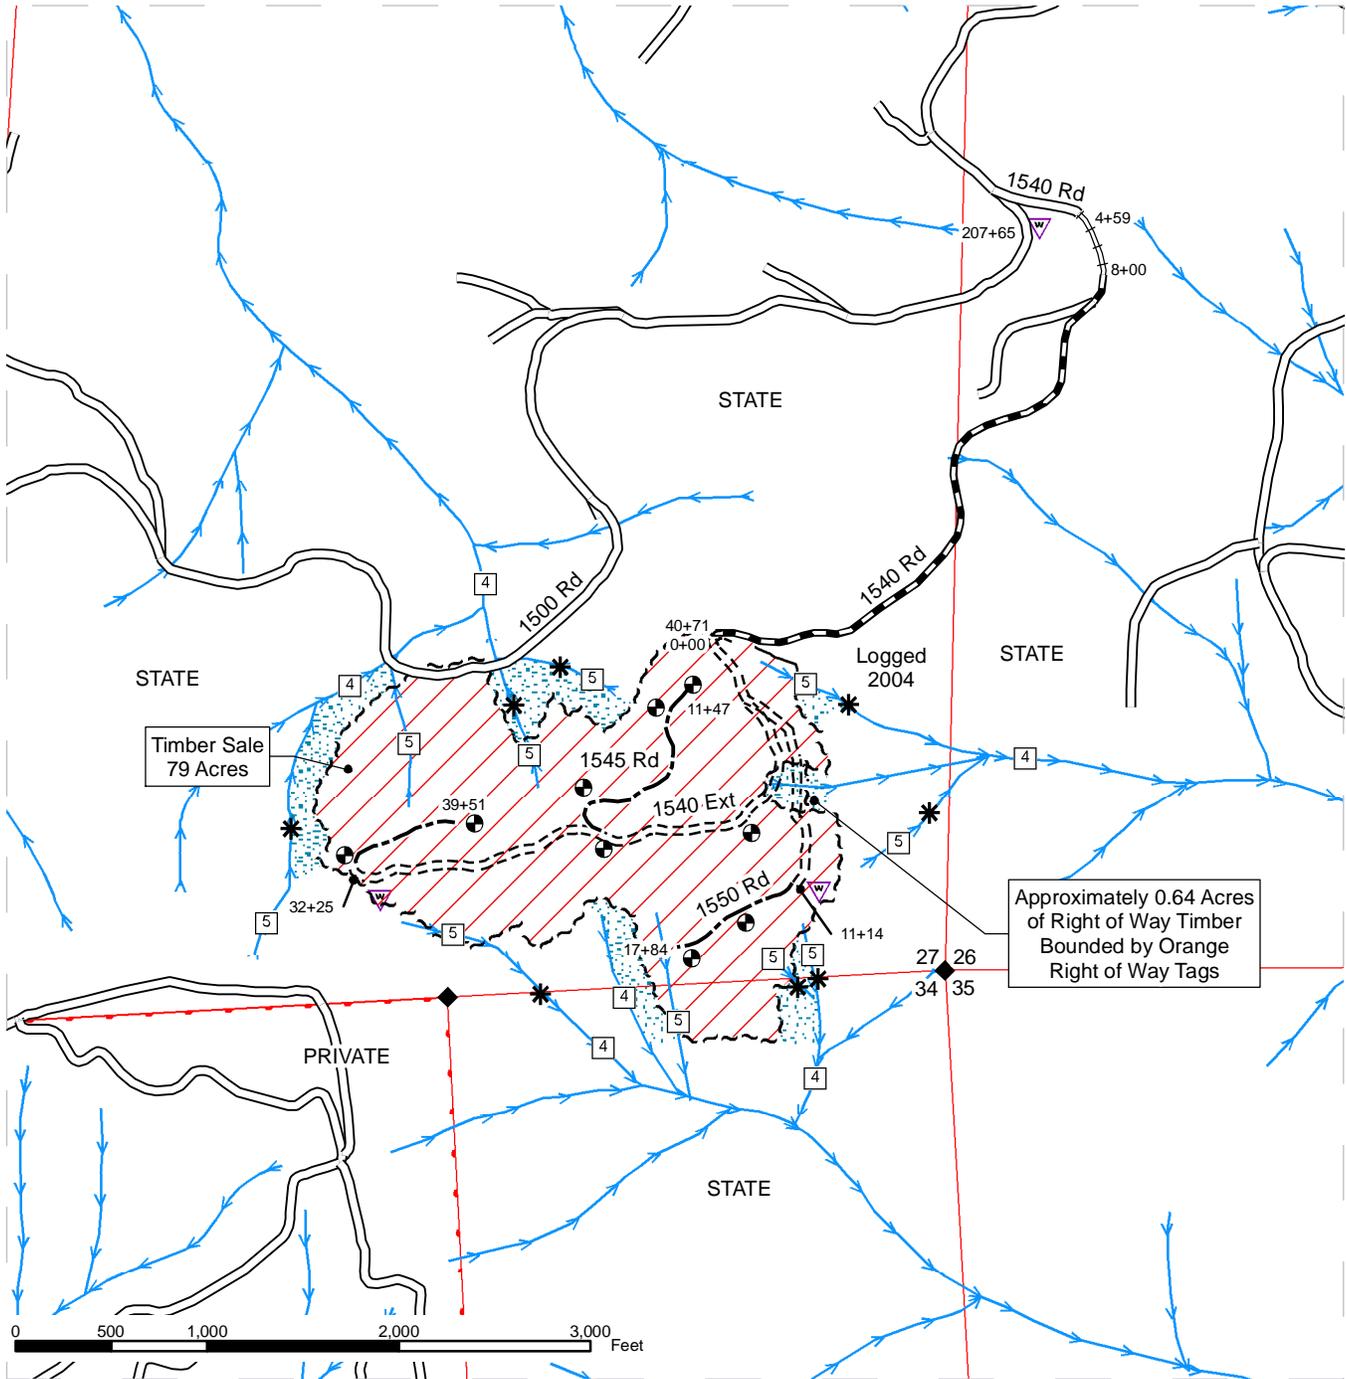

Purchaser shall pull vine maple and leave roots exposed and detached from the soil in the ground based harvest area. Purchaser shall cut vine maple and sever from the stump in the cable harvest area.

Winter access may be limited due to snowfall from early December to the end of February.

BID DEPOSIT: \$5,900.00 or Bid Bond. Said deposit shall constitute an opening bid at the appraised price.

HARVEST METHOD: Cable; cable or shovel on slopes 35% or less in variable retention harvest portions of sale; cable, forwarder, or tracked skidder on slopes 35% or less in upland and RMZ thinning portions of sale. Falling and Yarding will not be permitted from November 1 to March 31 unless authorized in writing by the Contract Administrator **THIS PERTAINS TO GROUND-BASED EQUIPMENT ONLY**) to reduce soil damage and erosion.

TIMBER NOTICE OF SALE

ROADS:

29.17 stations of optional construction. Development of an existing gravel source (Section 2 Pit) at station 17+93 of the MD-03 Road will involve processing rock to generate approximately 1,080 cubic yards of gravel ballast. This rock is available at no cost on State land.

Use of an existing riprap stockpile at (Section 2 Pit) at station 17+93 of the MD-03 Road. This rock is available at no cost on State land.

Road construction and the hauling of rock will not be permitted from November 1 to March 31 unless authorized in writing by the Contract Administrator to reduce soil damage and siltation. The hauling of forest products will not be permitted from November 1 to March 31 unless authorized in writing by the Contract Administrator to reduce soil damage and siltation.

ACREAGE DETERMINATION

CRUISE METHOD:

Acres determined by GPS traverse. 112.0 acres gross. 15.7 acres deducted for green tree retention clumps, existing road and RMZ/WMZ no-harvest areas. 96.3 acres net. Cruised using fixed-plot method. Expansion factor used is 1/10 acre on the regeneration harvest area in Unit #2; all else used 1/20 acre. Sighting height is 4.5 feet. Plot ratio cruise count is cruised all. 36 plots were taken.

FEES:

\$12,375.50 is due on day of sale. \$1.25 per ton is due upon removal. These are in addition to the bid price.

SPECIAL REMARKS:

1.) Utility and Other price for clause P-024 is \$2.00 per ton. 2.) All trees marked with blue paint are leave trees.

Schedule B
Morice Variable Density Thinning Prescription

Unit 1:

- Leave a residual stocking of 100 to 105 trees per acre (tpa) in thinning areas with an average spacing of approximately 21 feet by 21 feet.
- Leave all conifers greater than 18 inches diameter breast height (dbh), unless the trees are severely deformed as defined below or need to be removed for corridors.

Unit 2:

- Leave a residual stocking of 105 to 110 tpa in both riparian thinning areas with an average spacing of approximately 20 feet by 20 feet.
- Leave all conifers greater than 18 inches dbh

All Units:

- All trees which have a blue AND which meets the unit prescription are take trees.
- Leave all conifer species except Douglas-fir unless located in a corridor.
- If no conifers exist, hardwood species must be used to fulfill the spacing requirements.

If conifers do exist, remove all hardwoods.

- Openings created by felling trees shall not exceed 30 feet between leave trees. If openings in the stand exceed this distance, sufficient trees shall be left on the perimeter of the opening to maintain the appropriate trees per acre.
- Five conifer trees per thinned RMZ acre from the largest diameter class of thinned trees shall be felled and left as down woody debris. These trees are in addition to the residual stocking targets mentioned above. Trees shall be cut within 25 feet of the white timber sale boundary tags in all RMZ thinning areas. Trees shall be felled toward the stream channel and shall be proportionally distributed across all type 4 streams.

Leave Tree Definition

Leave trees in the unit will be selected by comparing their characteristics with other trees in the stand. Leave trees will be the best trees from the largest diameter classes available and evenly distributed over the landscape.

Preferred leave tree species in order of preference are:

1. Western Redcedar (no cut except for corridors)
2. Sitka Spruce (no cut except for corridors)
3. Western White Pine (no cut except for corridors)
4. Western Hemlock (no cut except for corridors)
5. Douglas-fir
6. Red Alder
7. Big Leaf Maple

Best Trees have the following characteristics:

- Fullest and most vigorous crowns

- Free of disease, major defect and damage
- Best form: tallest tree, straightest boles, and smallest limb diameters

Severely Deformed Trees have the following characteristics:

- A tree that has the top broken out at lower than 2/3 the total tree height
- A tree that has severe cat faces (bark removed from more than half of the circumference of the tree)

Ground-based Yarding Corridors:

Corridors are limited to 14 feet wide (including rub trees) and no less than 75 feet apart as measured from the center of the corridor. Corridors shall be located in a manner to minimize the damage to or removal of leave trees.

Cable Yarding Corridors:

Corridors are limited to 12 feet wide (including rub trees) and no less than 100 feet apart as measured from the center of the corridor. Corridors shall be located in a manner to minimize the damage to or removal of leave trees. Landings will be located to provide for parallel yarding corridors whenever possible. When radial yarding corridors are required from a central landing, the distance between yarding corridors must be no closer than 100 feet where the corridor leaves the unit as measured from the center of the corridor.

Compliance:

A 1/20 acre fixed radius plot (26.3 feet) will also be measured to determine residual trees per acre. Plots will be evenly distributed at a density of at least 2 plots per five acres. The number of trees in a plot will be multiplied by 20 to determine the trees per acre for that plot. The average of all plots in a unit will determine the trees per acre for that unit. Only trees greater than or equal to 6.5" DBH will be measured.

Unit divisions for assessment of damage:

Per contract clauses H-012 and D-040.

Unit 1 Three compartments are delineated for assessment of damage. These are marked on the supplemental map to the Contract Administrator and labeled as 1, 2, & 3.

Unit 2 Two compartments are delineated for assessment of damage. These are marked on the supplemental map to the Contract Administrator and labeled as 1 & 2.

Certification of Fallers and Yarder Operators

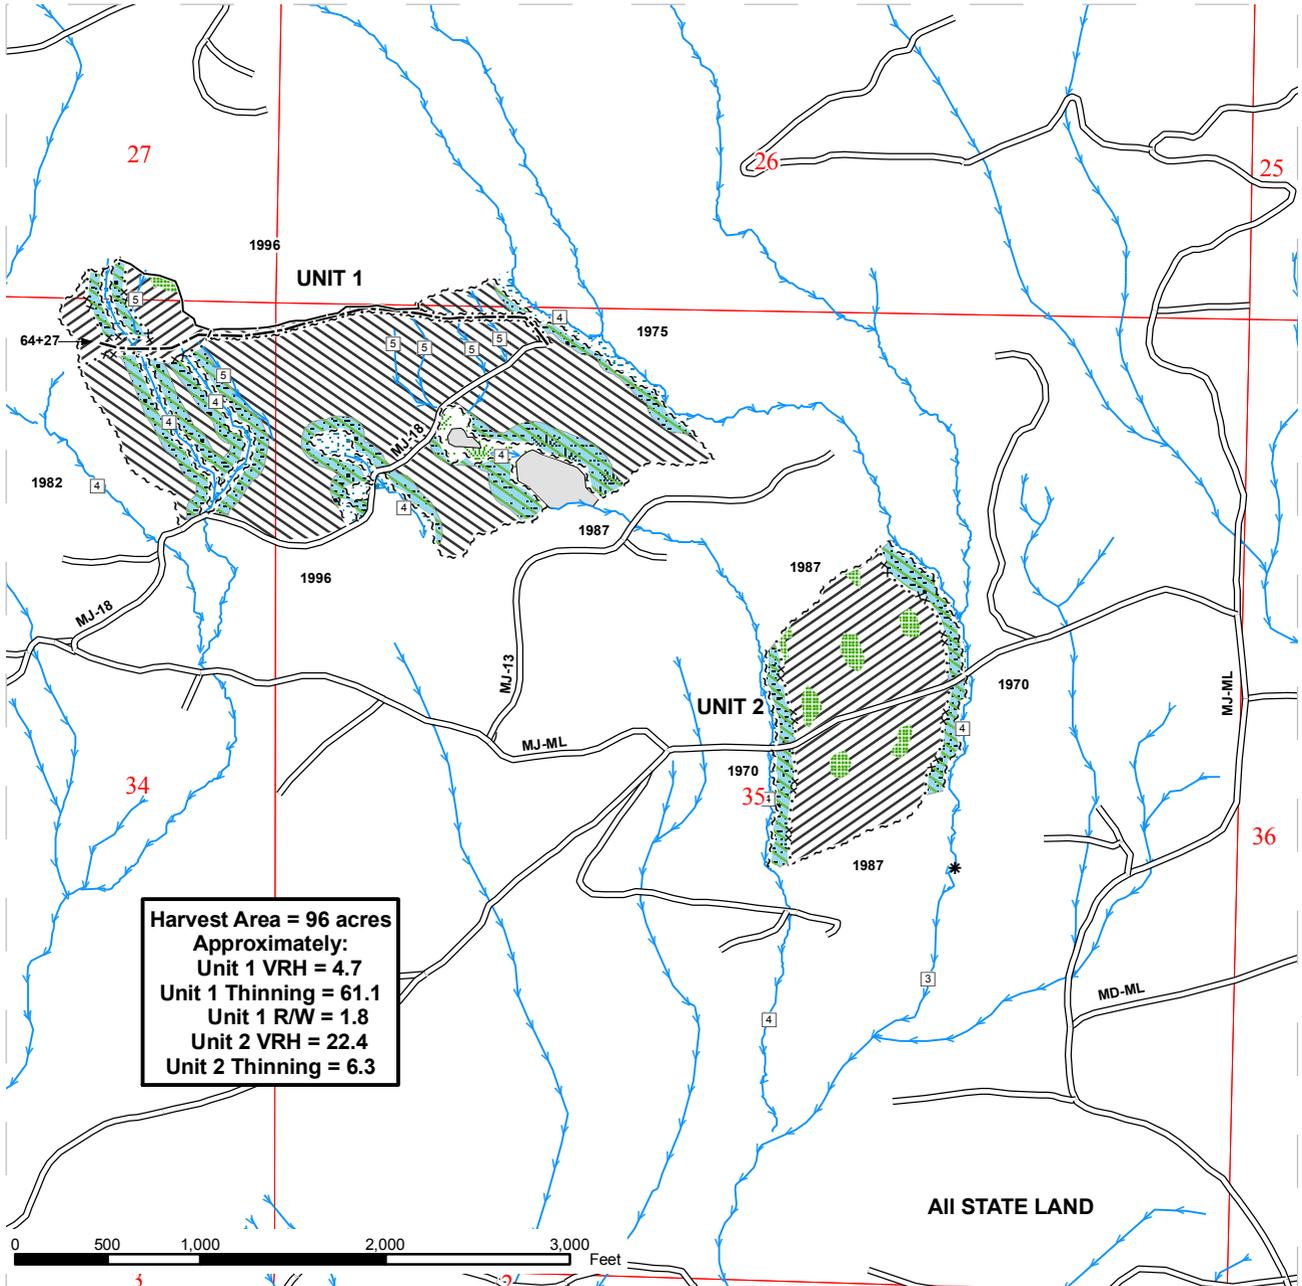

(additional requirements beyond those outlined in the H-011)

The Contract Administrator and faller/harvest operator will jointly review the take tree selection criteria as outlined above. In conjunction with the Contract Administrator, the faller/ harvest operator will mark a designated area as a test plot within the sale area boundary. Satisfactory thinning of the test plot completes the certification process. Certifications will be issued to individuals when they demonstrate to the Contract Administrator their ability to perform within the requirements set forth in the contract.

TIMBER NOTICE OF SALE

PAYMENT

SECURITY:

To be determined by the State as described in Clause P-041 of the Purchaser's Contract.

BIDDING

PROCEDURES:

A separate sealed bid and envelope must be submitted for each log sort. Prospective Purchasers may bid on any or all log sorts. On the day of sale the Purchaser must bring their bid deposit up to 10% of their total bid price. Complete bidding procedures and auction information may be obtained from the Northeast Region Office in Colville, WA. Phone number (509) 684-7474.

HARVEST AND

DELIVERY COSTS:

Purchaser must pay the forest excise taxes associated with the log sorts delivered to them. The tax rate for this sale is 4.2%. Use the following rates for estimating taxable stumpage: Harvest Cost = tons(\$23.50, for utility \$8.00). Haul Cost = (tons)(\$2.63) + tons(\$0.16x C miles) + tons(\$0.07 x A miles)).

SPECIAL REMARKS:

The successful Purchaser(s) will be required to purchase logs from the sale area upon delivery to their location specified in the bid submitted. Logs will be delivered to the Purchaser's delivery location by the State's contract harvester. Purchaser is responsible for weighing and scaling costs. All mbf and tonnage loads will be weighed and all mbf loads will be scaled at State approved scaling locations. The State reserves the right to determine where logs are authorized to be scaled and weighed.

For more information regarding this log sort sale visit our web site:

<http://www.dnr.wa.gov/htdocs/fr/sales/>. If you have questions call Phil Anderson at the Northeast Region office at (509) 684-7474 or Dave Richards at the Product Sales and Leasing Division Office in Olympia at (360) 902-1365.

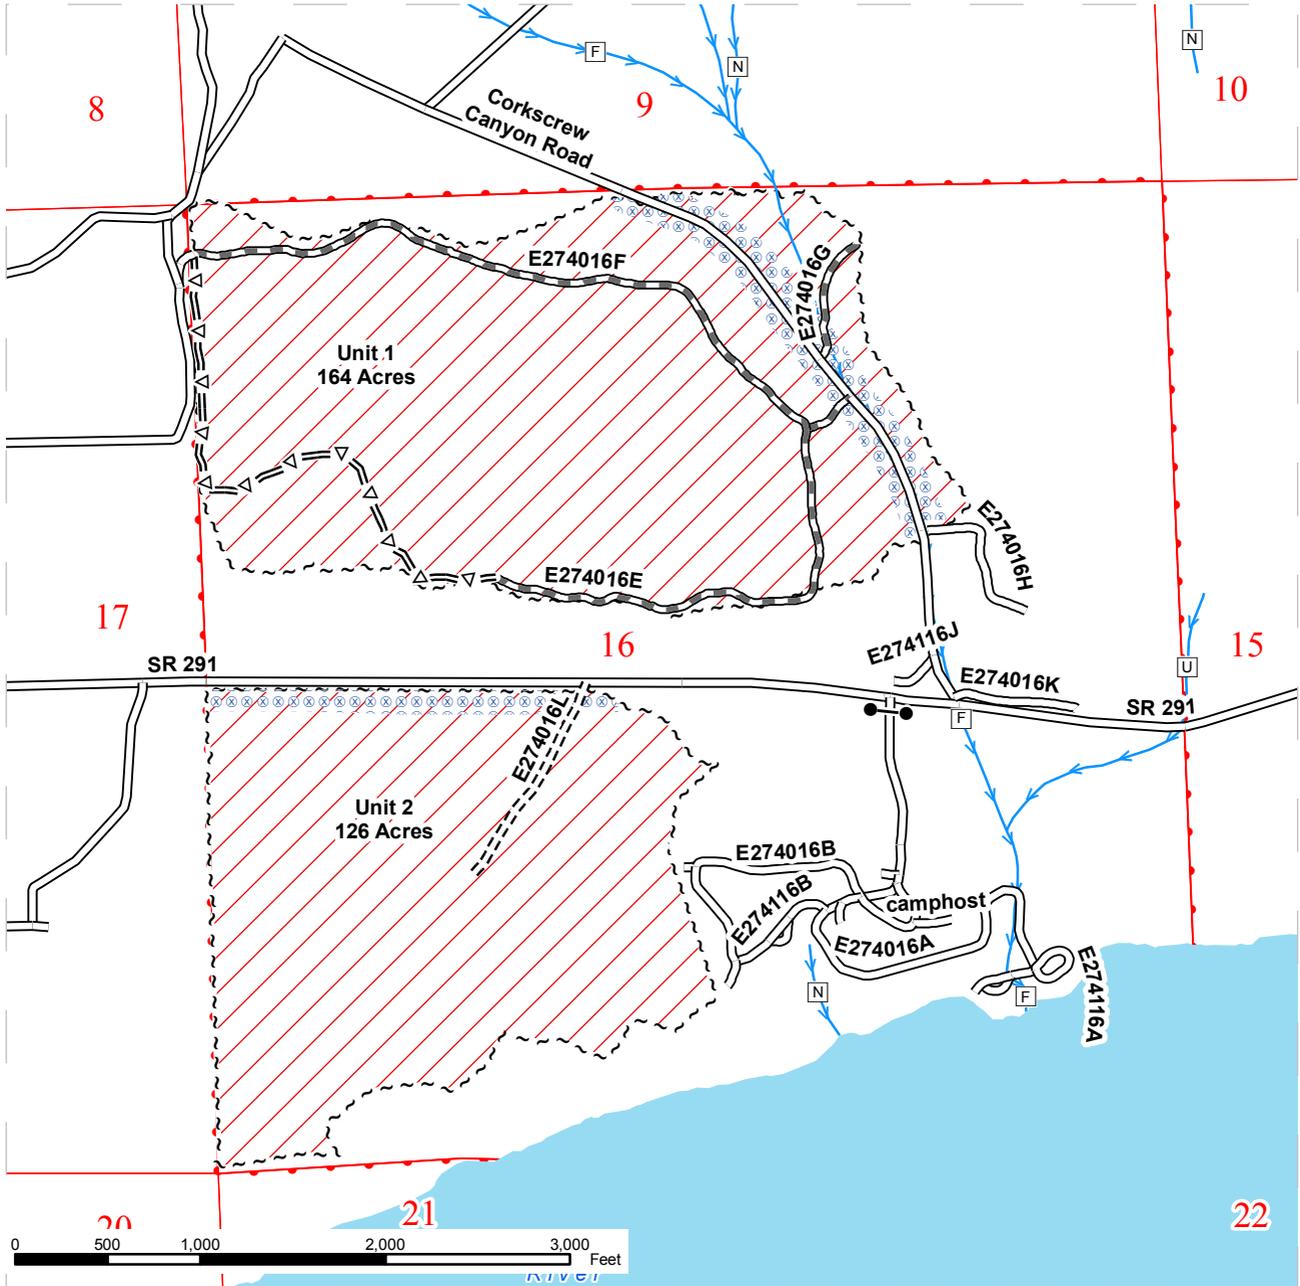

CONFIRMATION:

Each sort is subject to confirmation following auction. No sorts will be confirmed until at least 10 days after all sorts are successfully auctioned. Final contract award is contingent upon the State's haul cost analysis. Actual haul route may vary and is subject to change at the State's discretion.

Logs will be delivered to the Purchaser's delivery location by the State's contract harvester. Purchaser is responsible for weighing costs. All tonnage loads will be weighed at State approved scaling locations. The State reserves the right to determine where logs are authorized to be scaled and weighed.

This is a high elevation sale. Snow machines may be necessary to view this sale during winter months. This is the second season for operating on this sale.

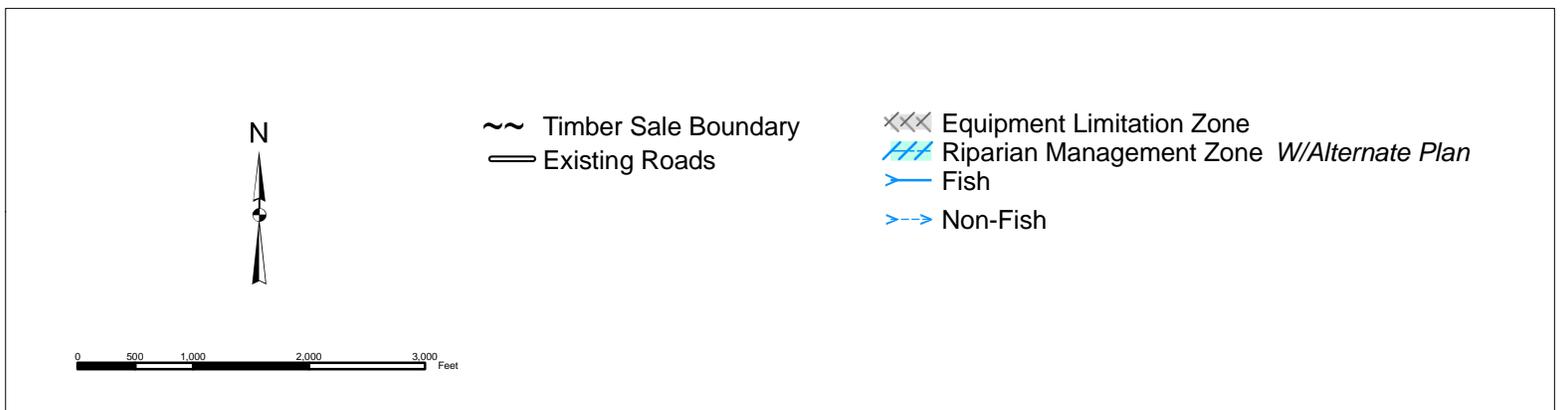

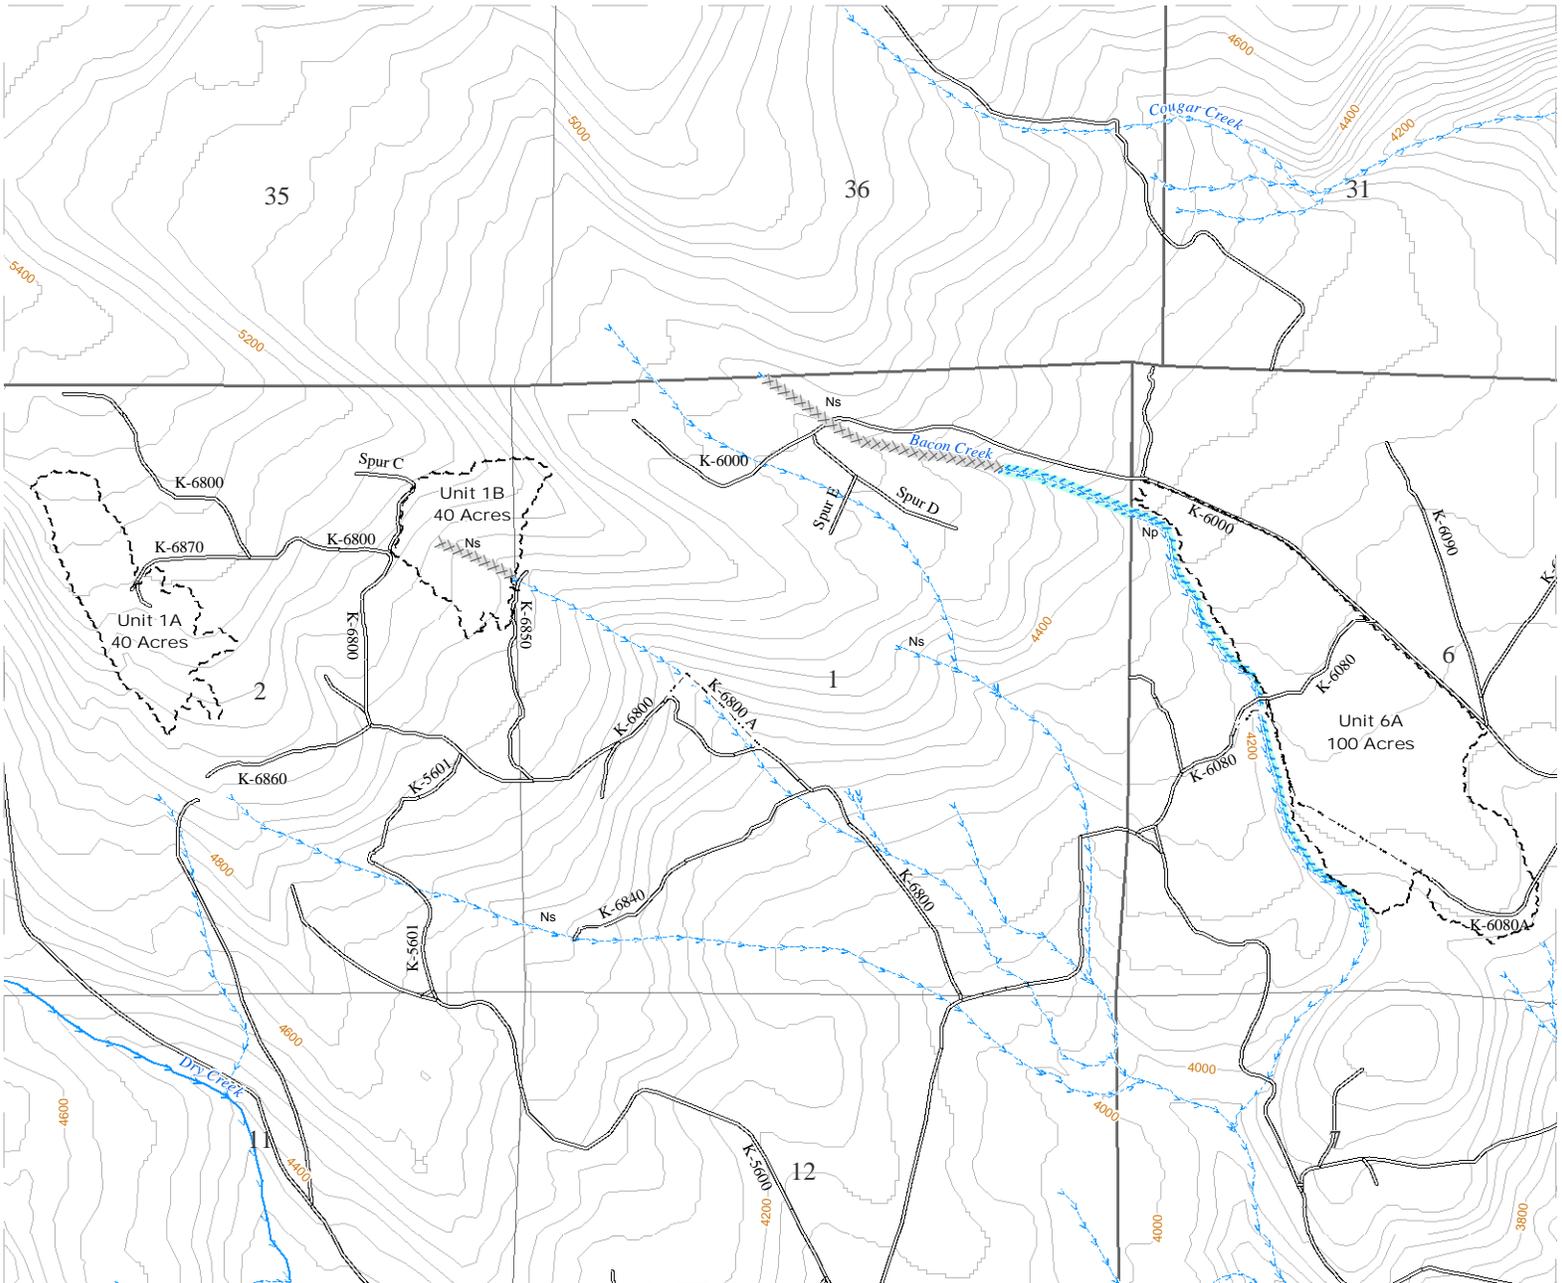

For more information regarding this log sort sale visit our web site:
<http://www.dnr.wa.gov/htdocs/fr/sales/>. If you have questions call Linda Hazlett at the Southeast Region office at (509) 925-8510.

CONFIRMATION: Final contract award is contingent upon the State's haul cost analysis. Allow up to 3 business days following bid opening for the State to announce the apparent high bidder. Each sort is subject to confirmation following auction. No sorts will be confirmed until at least 10 days after all sorts are successfully auctioned.

| Totals | | | | 3921 | 22684 | | \$552,276.50 | |

BID METHOD: Sealed Bids

UNIT OF MEASURE: Tonnage scale

EXPIRATION DATE: December 31, 2009

ALLOCATION: Export Restricted

PAYMENT SECURITY:

To be determined by the State as described in Clause P-041 of the Purchaser's Contract.

BIDDING PROCEDURES:

A separate sealed bid and envelope must be submitted for each log sort. Prospective Purchasers may bid on any or all log sorts. On the day of sale the Purchaser must bring their bid deposit up to 10% of their total bid price. Complete bidding procedures and auction information may be obtained from the Southeast Region Office in Ellensburg, WA. Phone number 509-925-8510.

HARVEST AND DELIVERY COSTS:

Purchaser must pay the forest excise taxes associated with the log sorts delivered to them. The tax rate for this sale is 4.2%. Taxable Stumpage = Total Delivered Value – (Harvest Cost + Haul Cost + ARRF).

Use the following rates for estimating taxable stumpage: Harvest Cost = tons (\$30.00/ton estimated. Haul Cost = (tons)(\$2.63) + tons(\$0.16x C miles) + tons(\$0.07 x A miles subject to indexing change due April 1)).

TIMBER NOTICE OF SALE

SPECIAL REMARKS: The successful Purchaser(s) will be required to purchase logs from the sale area upon delivery to their location specified in the bid submitted. Logs will be delivered to the Purchaser's delivery location by the State's contract harvester. Purchaser is responsible for weighing and scaling costs. All mbf and tonnage loads will be weighed and all mbf loads will be scaled at State approved scaling locations. The State reserves the right to determine where logs are authorized to be scaled and weighed.

Utility sort includes approximately 210 tons of house logs (10'+ top), 13,054 tons of dead utility and 2,949 tons of green utility. This is a high elevation sale and may require snow machines for viewing during the winter months. Deliveries are not expected to be before June 15th.

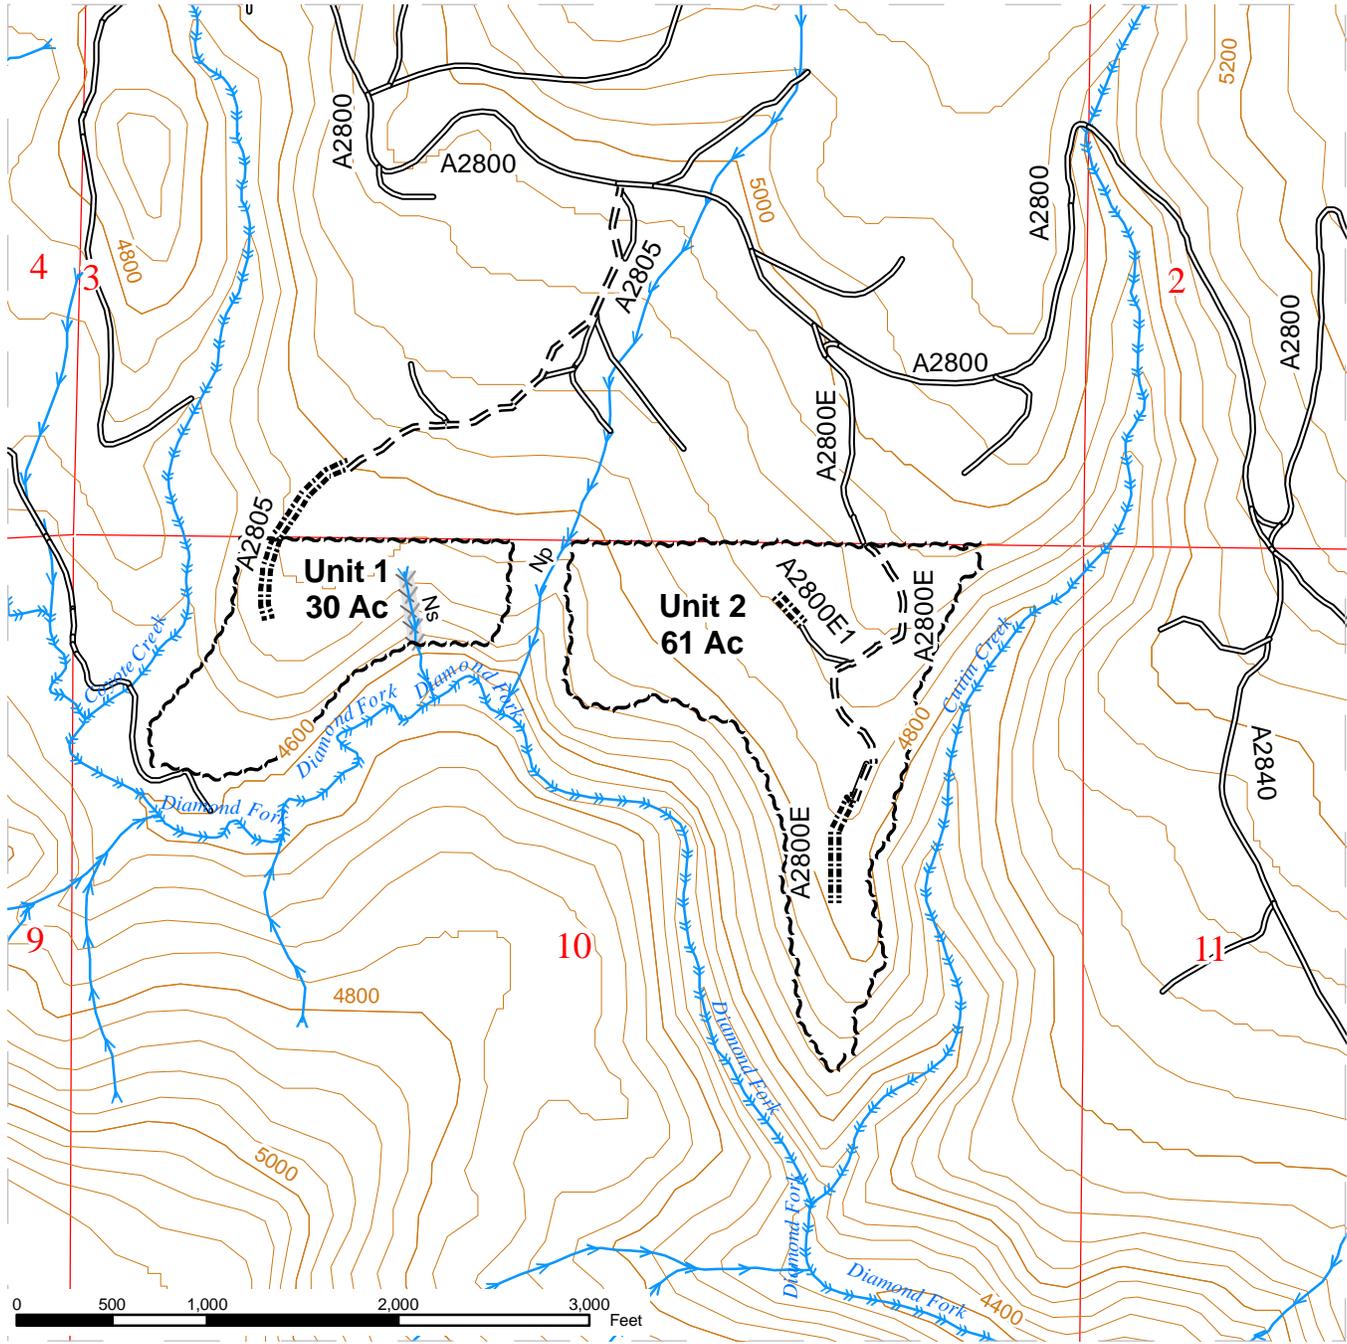

For more information regarding this log sort sale visit our web site:
<http://www.dnr.wa.gov/htdocs/fr/sales/>. If you have questions call Linda Hazlett at the Southeast Region office at 509-925-0907.

CONFIRMATION: Each sort is subject to confirmation following auction. No sorts will be confirmed until at least 10 days after all sorts are successfully auctioned. Final contract award is contingent upon the State's haul cost analysis. Actual haul route may vary and is subject to change at the State's discretion.

MINIMUM BID: \$2/ton (est. value \$27,000.00)

BID METHOD: Sealed Bids

PERFORMANCE

SECURITY: \$5,400.00

SALE TYPE: Tonnage Scale

EXPIRATION DATE: October 31, 2009

ALLOCATION: Export Restricted

BIDDABLE SPECIES: Bidding to be allowed on all species combined.

BID DEPOSIT: \$2,700.00 or Bid Bond. Said deposit shall constitute an opening bid at the appraised price.

HARVEST METHOD: Ground based equipment. Falling and Yarding will not be permitted from November 1 to May 1 unless authorized in writing by the Contract Administrator due to wet weather conditions.

ROADS: 368.04 stations of required pre-haul maintenance. All roads are existing. Prospective purchasers should review the road plan in detail. The hauling of forest products will not be permitted from November 1 to April 1 unless authorized in writing by the Contract Administrator due to wet weather conditions.

ACREAGE DETERMINATION

CRUISE METHOD: Acres were determined using GPS. Cruise was done using a variable plot method and 32' logs except for ponderosa pine which used 16' logs.

TIMBER NOTICE OF SALE

FEES: \$28,514.00 is due on day of sale. \$1.40 per ton is due upon removal. These are in addition to the bid price.

SPECIAL REMARKS: This is a salvage of fire damaged timber from the Cold Springs Fire which occurred in July 2008 and the timber is dead and dying. Trees included in the cruise are fire killed but fire damage generally does not go deeper than the bark. There is a locked gate on the K-4000 road. Contact the region office for the combination. Roads have been recently rocked with the exception of the roads internal to the sale boundaries.

COLD SPRINGS2 FIRE SALVAGE SCHEDULE A

Harvest prescription for Units #1, Units #2, and #3

CUT trees will consist of the following:

1. All merchantable burned conifer trees with less than 20% live crown with the exception of the following **LEAVE** trees:

LEAVE trees will consist of the following:

1. All ponderosa pine, Douglas fir, and western larch 28" dbh and larger, regardless of degree of burn.
2. An average of the six largest trees per acre regardless of degree of burn. Trees meeting the description in #1 above may be counted in the six.
3. RMZ buffers in Dry Creek: **LEAVE** all trees within 15 feet (each side) of the bank-full-width regardless of degree of burn. In the area between 15 and 30 feet of the bank-full-width, one-third of the trees must be left. The trees with 20% or more live crown may be counted in this one-third.
4. RMZ buffer on the lower portion of the two Np streams (one in Section 2 and one in Section 11): **LEAVE** all trees within 15 feet (each side) of the bank-full-width regardless of degree of burn.

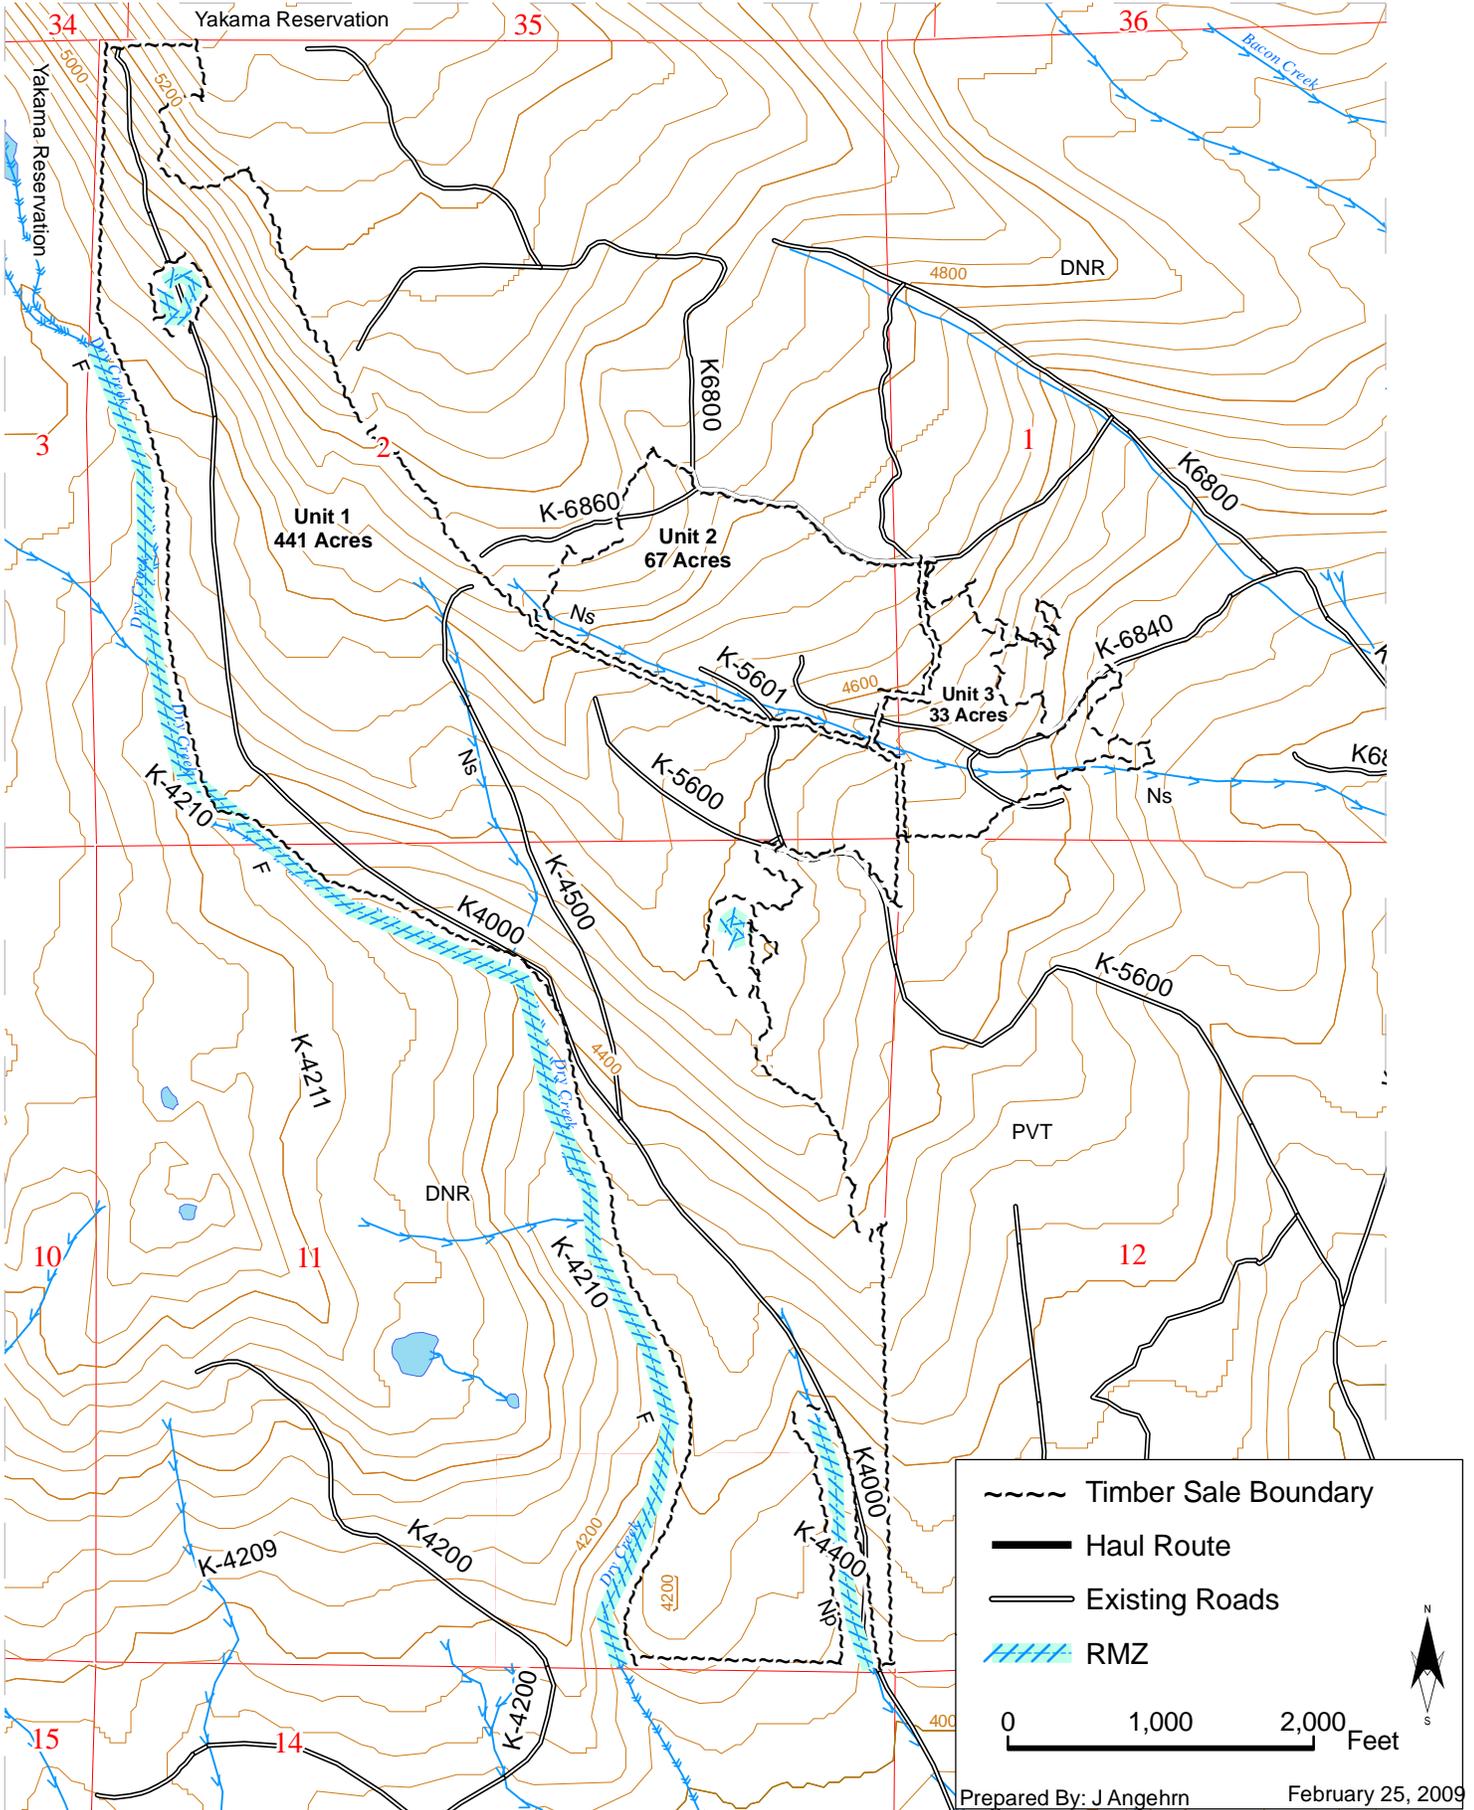

Special mitigation requirements

1. Create an average of approximately 3 short snags per acre, selecting heavier burned trees where possible.
2. As directed by the contract administrator, fell trees and place on the contour to deflect ash and sediment flow adjacent to stream courses and on slopes exceeding 30 percent. Leave them parallel to the slope at an average interval of approximately every 20 feet. Select the larger diameter heavier burned trees where possible. Also existing downed wood may be used.
