Bidder's/Purchaser's Inspection of Sale Area and Forest Products

Acreage estimates and volume estimates contained within each timber notice of sale and each timber sale contract are made only for administrative and identification purposes. Except as expressly provided by the timber sale contract, the purchaser shall be responsible for paying the entire purchase price, even if the actual acreage or timber volume varies from the estimated quantity or volume shown.

All prospective bidders have the opportunity and are expected to inspect the sale area and the forest products located thereon. Bidders shall not rely on any representations by the State including, but not limited to, acreage estimates, volume estimates, appraisal or pre-bid documentation. The successful bidder/purchaser will further warrant that they have entered the timber sale contract without any reliance upon the DNR's volume estimates, acreage estimates, appraisals, pre-bid documentation, or any other representation by the DNR.

Any timber sale contract arising out of these public auctions will require the successful purchaser to warrant that they are entering the timber sale contract based solely upon their own judgment of the value of the forest products, formed after their own examination and inspection of both the timber sale area and the forest products being sold.

Exclusion and Disclaimer of Warranties

The PARTIES AGREE that the IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, and ALL OTHER WARRANTIES EXPRESS OR IMPLIED, ARE EXCLUDED from this transaction, and shall not apply to the goods sold. For example, THE FOLLOWING SPECIFIC MATTERS ARE NOT WARRANTED, and are EXCLUDED from this transaction:

- b. *The condition of the forest products.* All forest products will be conveyed “AS IS.”
- c. *The acreage contained within any sale area.* Any acreage descriptions appearing in the timber notices of sale, timber sale contract, timber sale map or other documents are estimates only, provided solely for administrative and identification purposes.
- d. *The volume, quality, or grade of the forest products.* The descriptions of the forest products to be conveyed are estimates only, made solely for administrative and identification purposes.
- e. *The correctness of any soil or surface conditions, presale construction appraisals, investigations, and all other pre-bid documents prepared by or for the State.* These documents have been prepared for the State’s appraisal purposes only.

BIDDING PROCEDURES FOR TIMBER AUCTIONS

The general requirements that follow are a part of all Timber Notices of Sale to be auctioned by the Department of Natural Resources (DNR).

General Information

The State reserves the right to waive minor irregularities and the right to reject any or all bids.

- A. This book contains the timber notices of sale and maps for each timber sale scheduled to be auctioned. More specific information can be obtained by contacting the appropriate region office at the number listed on the back cover of this book.
- B. The timber notice of sale is a summary of sale information. For more specific information, interested parties are encouraged to view the Appraisal Packets on the DNR Internet Site @ www.dnr.wa.gov, this will take you directly to the Product Sales Section. The Appraisal Packets contain **DRAFT** copies of the timber notice of sale, map, contract, road plan, cruise data, precruise and cruise narrative, Forest Practices Application (FPA), Hydraulics Project Approval (HPA).
- C. The sale preview packets may be obtained at no charge for individual sales by visiting the appropriate region office.
- D. Timber sale contracts contain extensive terms and conditions that will be binding upon successful high bidders. Each bidder should carefully review all terms contained in the appropriate **DRAFT** timber sale contract prior to bidding on a sale, and should review the final contract prior to signing. **DRAFT** timber sale contracts are contained in the preview and presales packets and are available upon request at the respective region office.
- E. Sales advertised in this book have not been approved by the Board of Natural Resources and are subject to the Board's approval before they will be sold. The Board meets and approves sales approximately six weeks prior to auction. All sales are subject to confirmation by the DNR under RCW 79.15.120.
- F. The State does not guarantee the accuracy of any information contained herein pertaining to particular sales. Therefore, all prospective purchasers are expected to make their own independent inspections and appraisals prior to bidding.
- G. If any conflict exists between the information in the Timber Notice of Sale, timber sale map, sale preview packets and that in the timber sale contract, the signed contract will prevail.
- H. Timber sales are subject to the Washington State Forest Excise Tax (RCW Chapter 84.33).
- I. Within 30 days of sale confirmation, the apparent high bidder will provide to the State the Performance Security specified on each Notice of Sale. The successful bidder also agrees to return a signed contract to the State within 30 days of confirmation. Failure to provide a signed contract to the state within 30 days of confirmation may result in a loss of bidder's rights to the products sold and forfeiture of initial deposit moneys.
- J. Each DNR region office has information about sales offered in that region. For further information, contact the respective DNR region office. Region office addresses and telephone numbers appear on the back cover of this booklet.
- K. The purchaser assumes the responsibility for any costs associated with extra maintenance or repair levied by a county for any county road used by the purchaser.

Cut western hemlock 6-9 inches dbh

Cut Douglas-fir 6-14 inches dbh

Compartment F:

SPECIAL THINNING CONDITIONS:

Where the prescription would leave an opening of ¼ acre or larger in conifer areas, the purchaser must leave at least one tree per 25 feet that is the largest diameter, largest crown class, best form, and un-damaged. Species preference in order of importance: RC, DF, WH, SF.

Trees of the above minimum specified dbh are required to be cut, but removals specifications are covered under Clause H-150.

Riparian Strategy implementation:

For each riparian thinned acre, 5 trees will be treated to become downed logs or snags according to the Contract Administrator instructions. A map is available that designates the number of trees per riparian zone to be treated.

3 trees per RMZ acre shall be selected from the first 25 to 50 feet outside the “No-harvest” 25-foot zone (marked with white “timber sale boundary tags”) and felled towards the typed water to serve as down wood (DW) as designated by the associated map (Schedule Y) and 2 trees per RMZ acre shall be topped at no less than 20’ or double-girdled. These (5) trees will be selected from the largest prescription trees.

Corridors

No trees within the riparian inner zone may be removed. Trees may be cut within the inner zones for corridors, but left on site. Full suspension is required on any typed stream crossing. Any rub trees in the corridors are to be left standing and not felled. Corridor felled trees may count towards required 5 tpa (above) if approved in advance by the Contract Administrator.

CERTIFICATION OF FALLERS AND YARDER OPERATORS – SEE CLAUSE H-011 OF THE CONTRACT.

The Contract Administrator and Faller/Harvester Operator will jointly review the take tree selection criteria as outlined in Schedule B of the contract.

In conjunction with the Contract Administrator, the Faller/Harvester Operator will mark a designated area as a test plot within the sale area boundary. Satisfactory thinning of the test plot completes the certification process.

Certifications will be issued to individuals when they demonstrate to the contract Administrator their ability to perform within the requirements set forth in the contract.

Certification may be revoked at any time by the Contract Administrator if the Contract Administrator determines that the prescription is not being implemented properly.

DAMAGE COMPARTMENTS:

Determination of damage will be calculated by comparing the percentage of damaged trees to the total number of standing trees. Compartment divisions for assessment of damage are designated on the attached Compartment Map. Use of roads, type of yarding (cable or ground-based) and where yarded wood comes from, are possible criteria to use to determine compartments.

There is a separate map designating damage compartments and the prescription on each compartment.

ADDITIONAL CLAUSES:

1. **BARK SLIPPAGE:** Cutting and yarding will not be permitted during the bark slippage season, unless authorized in writing by the Contract Administrator. This season is estimated to run from

April 1 to July 15, but will vary dependent on weather conditions. If permission is granted to operate during the bark slippage season, the Purchaser will be required to provide a plan outlining mitigation measures.

2. No tops or limbs will be allowed to accumulate on any landings. Tops and limbs will be redistributed in the unit or on roads to be abandoned (NM-7706, NM-82 and NM-42 from station 54+01 to 78+09) to the satisfaction of the Contract Administrator.

3. Tracked skidder operation is allowed only during dry periods.

4. All ground-based yarding equipment must operate on a mat of harvested stand's slash.

5. Cable Areas:

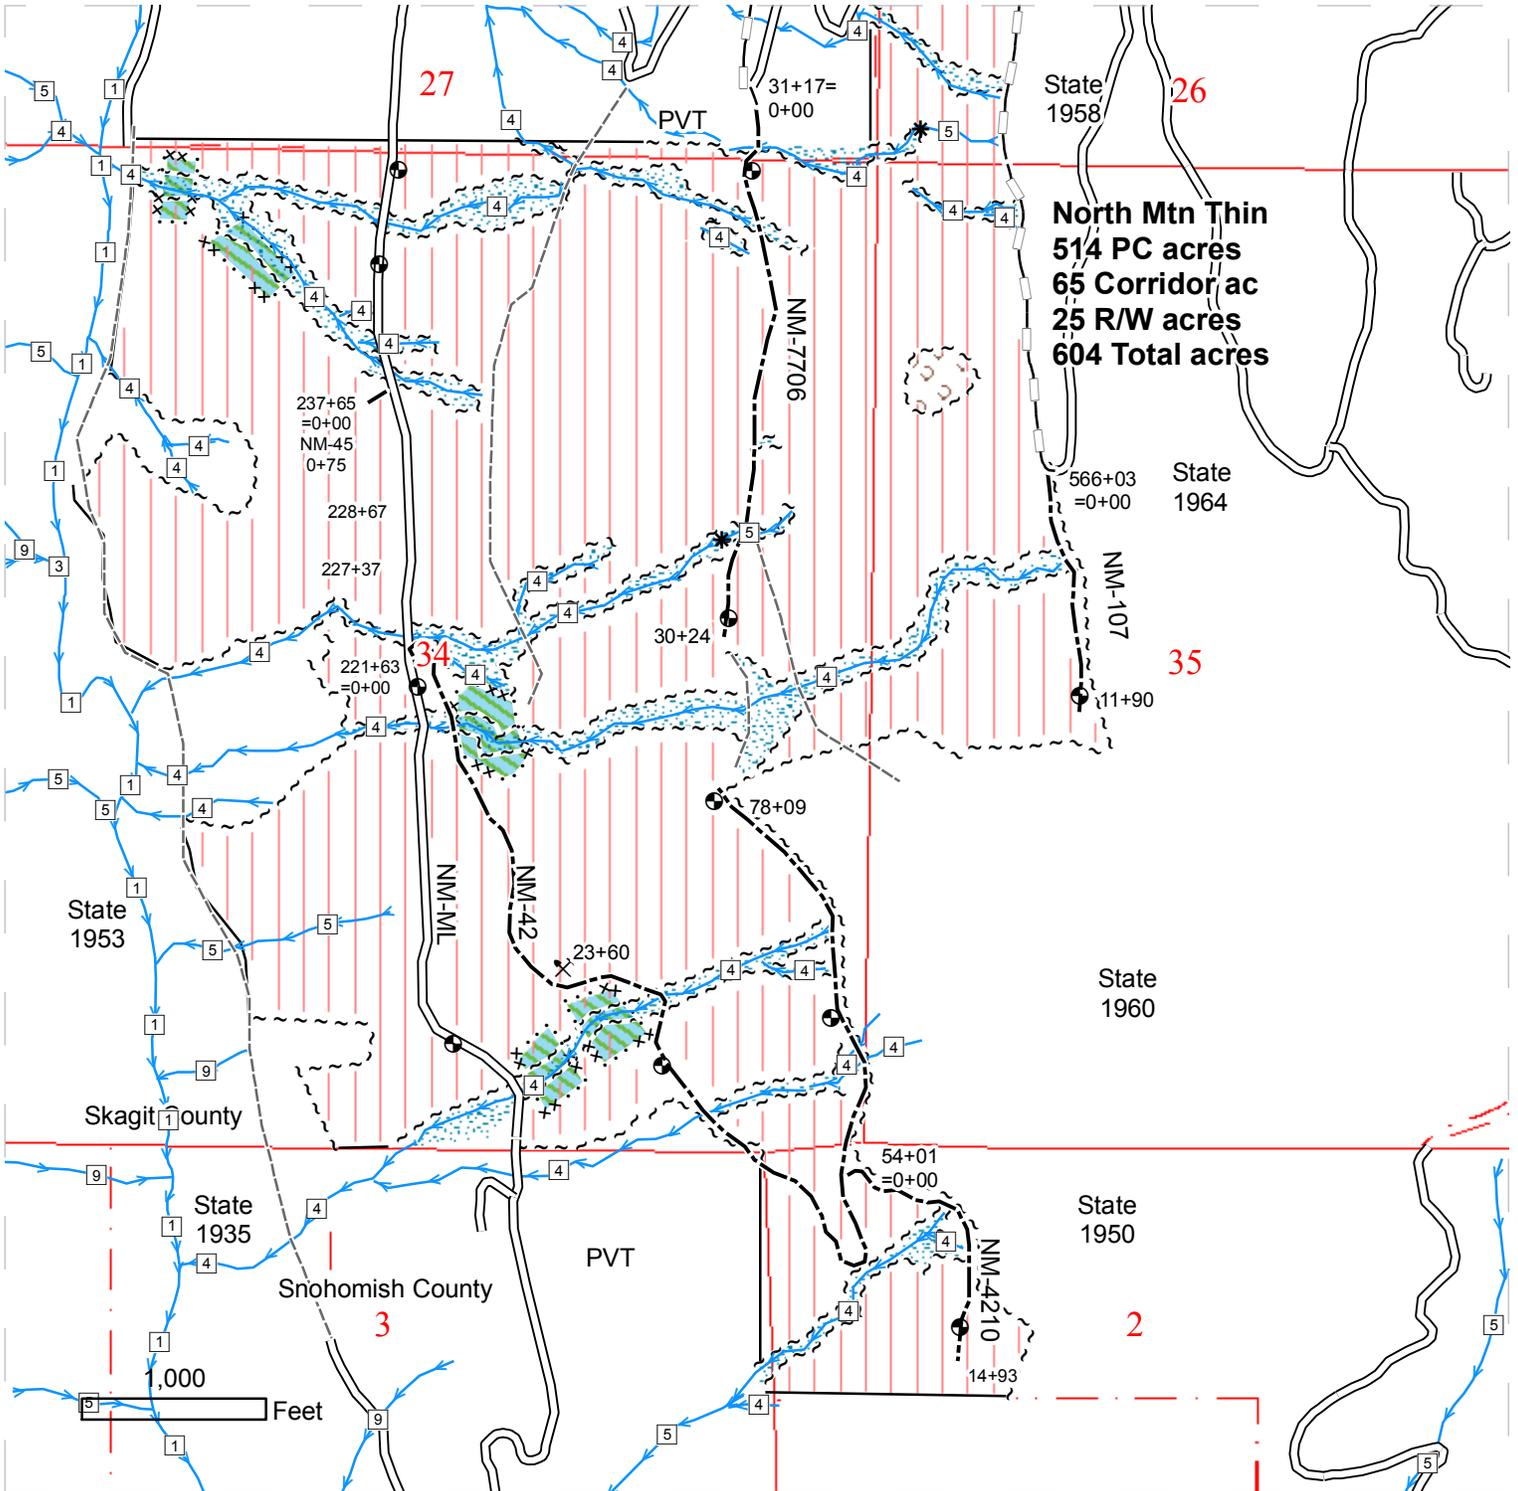

Landings will be located to provide for parallel yarding whenever possible. Corridors will be limited to 12 feet including rub trees. Corridors will be at least 100 feet apart when parallel as measured from the center of the corridors. Where possible, corridors should be located in a manner to minimize the damage to or removal of leave trees. It is not required to remove all leave trees from the 12-foot corridor. Additional corridors will not be permitted unless authorized in writing by the Contract Administrator.

6. Ground-Based Areas: Ground-based yarding corridors will be limited to 14 feet including rub trees and no less than 70 feet apart on slopes less than 30%, unless otherwise authorized in writing by the Contract Administrator.

On the day of sale the Purchaser must bring their bid deposit up to 10% of their total bid price. Complete bidding procedures and auction information may be obtained from the Southeast Region Office in Ellensburg, WA. Phone number (509) 925-8510.

HARVEST AND DELIVERY COSTS:

Purchaser must pay the forest excise taxes associated with the log sorts delivered to them. The tax rate for this sale is 4.2%. Taxable Stumpage = Total Delivered Value – (Harvest Cost + Haul Cost + ARRF). Use the following rates for estimating taxable stumpage: Harvest Cost = tons(\$25.00 - estimated). Haul Cost = (tons)(\$2.10) + tons(\$0.13x C miles) + tons(\$0.11 x A miles)). ARRF = \$22.25/mbf.

TIMBER NOTICE OF SALE

SPECIAL REMARKS: The successful Purchaser(s) will be required to purchase logs from the sale area upon delivery to their location specified in the bid submitted. Logs will be delivered to the Purchaser's delivery location by the State's contract harvester. Purchaser is responsible for weighing costs. All tonnage loads will be weighed at State approved scaling locations. The State reserves the right to determine where logs are authorized to be scaled and weighed.

This is a high elevation sale. Logging will occur over two seasons with a requirement for harvest to be completed in Units #3 and #6 during the first season. Additional units may be completed the first season. Harvest operations are expected to begin in June and will end when the snow causes it to become inoperable. Timber remaining will be reoffered in the spring of 2009. Harvester will be selected after the Sorts are sold.

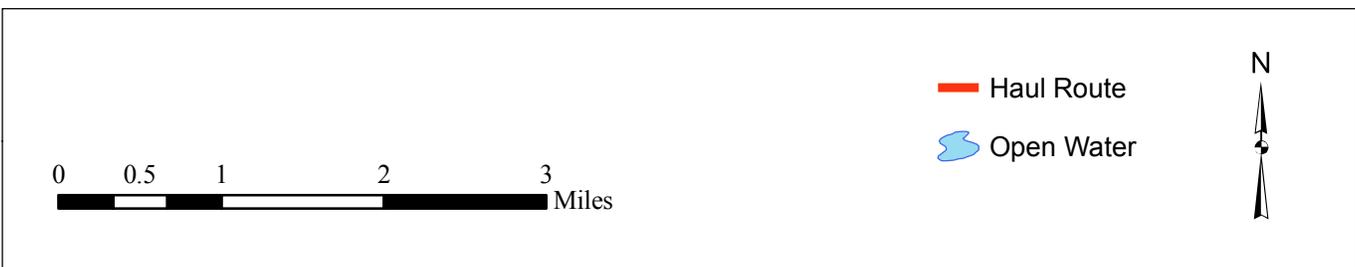

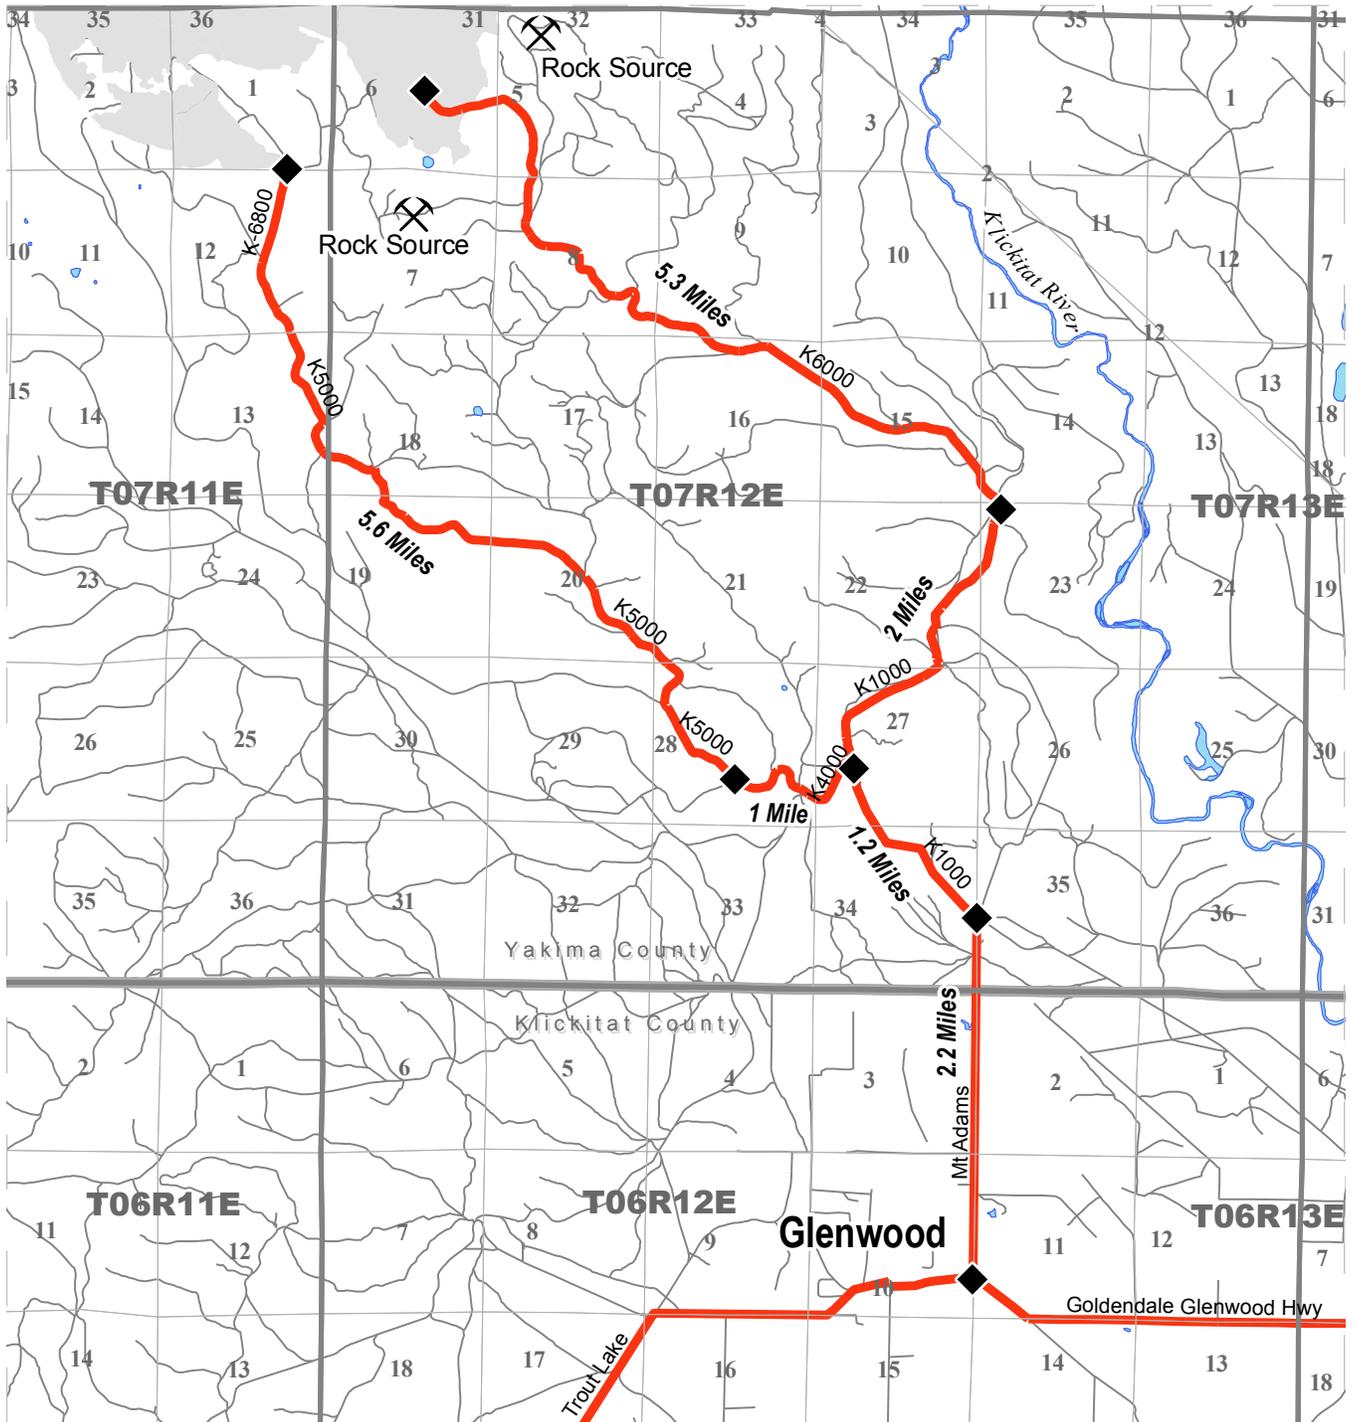

For more information regarding this log sort sale visit our web site:
<http://www.dnr.wa.gov/htdocs/fr/sales/>. If you have questions call Linda Hazlett at the Southeast Region office at (509) 925-8510.

CONFIRMATION: Final contract award is contingent upon the State's haul cost analysis. Allow up to 3 business days following bid opening for the State to announce the apparent high bidder. Each sort is subject to confirmation following auction. No sorts will be confirmed until at least 10 days after all sorts are successfully auctioned.
